Ce guide s'adresse aux producteurs, vulgarisateurs et étudiants qui s'intéressent aux techniques modernes de production du porc. On y présente un résumé des connaissances actuelles adaptées au contexte québécois, nord-américain. Les 8 parties du document contiennent des informations sur différents sujets comme: la production, la transformation et la commercialisation du porc; les races porcines et les principes de sélection; les techniques de reproduction; les ingrédients utilisés dans l'alimentation porcine; la prophylaxie médicale et sanitaire et les différentes affections; la construction d'équipements; le porc à l'engrais; et la gestion d'un élevage naissant et d'un engraissement.

La Pornographie -- Rev.

par D. Macdonald. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 23 p. Bibliogr. (Bulletin d'actualité ; 84-3F)
L'éd. anglaise (Pornography) sur la même fiche. ISBN 0-660-92158-8
MICROLOG 88-00792 1 fiche

La pornographie est plus répandue, plus explicite et plus violente que jamais au Canada. Face à ce phénomène, le gouvernement fédéral tente de modifier le droit pénal pour définir le concept de pornographie et en limiter la distribution. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, examine le débat sur la relation entre pornographie et préjudice, analyse la législation actuelle et aborde les propositions de changement au droit pénal. Un intérêt particulier est porté aux travaux du Comité Fraser et au contenu du projet de loi C-54.

Pornography -- Reviewed

by D. Macdonald. Ottawa : Library of Parliament, Research Branch, 1987. 20 p. Bibliogr. (Current issue review ; 84-3E)
French ed. (La pornographie) on the same fiche. ISBN 0-660-12603-6
MICROLOG 88-00792 1 fiche

Discussion of pornography and two views of the issues that have guided Parliament in establishing new legislation. One body of opinion states that pornography is immoral and harmful and the reliance on community tolerance has allowed what would have been forbidden 15 years ago to be presently tolerated, causing an accompanying decline in social values. The opposing side states that there is no convincing evidence to support a causal relationship between pornography and actual harm, both physically and socially, and even if there is social harm it is not significant enough to supercede constitutional protections of freedom of expression. This report gives a review of the dispute, with particular emphasis on criminal law.

Pornography : a guide to community and family education

Regina : Saskatchewan Consumer and Corporate Affairs, 1988. 37 p. ill. Bibliogr.
MICROLOG 88-03439 1 fiche

This document has been designed to assist the public in understanding the subject and the controversy which surrounds it. It outlines responsibility areas and ways that government, consumers and business can cooperatively agree on how to deal with pornography. The document traces a history of attitudes toward pornography reflecting the greater tolerance that has been shown in recent years, as well as tracing its legislated history.

Port of Quebec expansion project

Canada. Environmental Assessment Panel. Ottawa : The Panel, 1984. 33, 35 p. : ill., maps. (Federal environmental assessment review process ; 26) *Bilingual (Projet d'extension du port...)*. ISBN 0-662-53123-X
MICROLOG 88-05028 1 fiche

The Port of Quebec lies on the North shore of the St. Lawrence River in the heart of old Quebec City. In 1978, the Port of Quebec Authority announced plans for development to meet the needs of prospective customers. Aware that its proposal might have significant effects on the natural and human environment, the Port of Quebec Authority requested a public review of its proposal, under the federal Environmental Assessment and Review Process. This report discusses the issues raised during the review and presents the Panel's conclusions and recommendations.

Portable train-based wheelchair lift design

prepared for Transportation Development Centre of Transport Canada ; by Uwe Rutenberg, Dirk Mietzker. S.l. : Rutenberg Design Ltd. 1987. x, 62 p. : ill Bibliogr. *TP 8290E*
MICROLOG 88-00334 1 fiche

Since the inception of VIA Rail's program in 1981 for Special Need Passengers, the problem of boarding wheelchair passengers has remained unsolved. As present, VIA operates 20 manual mechanical and one electrical station-based lifts in major stations across Canada but operation is slow and tedious. At other stations, the passenger must be manually boarded. This report presents the development of a concept, and the building of a full-scale mock-up, of a wheelchair lift device which is both train-based and station-based and operated by one person.

Portrait de l'industrie de l'information électronique en Amérique du Nord

réalisation, André Martin. Québec : Gouvernement du Québec, Ministère des communications, Direction des technologies de l'information, 1987. ix, 79 p. : ill. Bibliogr. ISBN 2-550-17512-3
MICROLOG 88-03198 1 fiche

L'industrie de l'information électronique est aujourd'hui une réalité non seulement économique, mais également politique, sociale et culturelle. Cette étude s'inscrit dans le cadre d'une série de 7 documents traitant de cette industrie aux Etats-Unis, au Canada et au Québec. Le document contient d'abord la définition de cette industrie et ses composantes. On fournit ensuite un historique mettant en lumière les entreprises-leaders et les nombreux facteurs technologiques qui ont conditionné les développements de l'industrie depuis ses débuts. Puis chacun des types d'entreprises est décrit et on présente les différents produits générés par la production de banques de données. Finalement, on s'intéresse aux utilisateurs de ces produits et on analyse la nature et les tendances du marché.

Potential coal mine wastewater treatment options

Norecol Environmental Consultants Ltd., Hull, Quebec : Environmental Protection Programs Division, Mining, Mineral and Metallurgical Process Division, 1987. xi, 160 p. : ill. Bibliogr.
MICROLOG 88-04780 2 fiche

The Canadian coal mining industry, as well as other types of mining (base metals and uranium), are faced with resolving the release of large amounts of nutrients, especially nitrogen, from mining/milling operations to receiving water environments. There is currently no recognized cost effective method of treating large amounts of water to remove nitrogen even though there are a number of possible treatment techniques. A literature review was conducted to determine the feasibility of using aquatic plants and irrigation techniques to treat coal mine wastewater for the removal of nitrogen and other potential contaminants. In addition, a bench scale test was carried out with an aquatic plant, *Lemna minor* and *Spirodela polyrhiza*, to determine its effectiveness in removing nitrogen from coal mine wastewater.

Potential coal mine wastewater treatment options, II : emergent aquatic plants

Norecol Environmental Consultants Ltd., Hull, Quebec : Environment Canada, Conservation and Protection, Environmental Protection, 1987. xii, 155 p. : ill. Bibliogr. (Regional manuscript report ; MS 87-05)
MICROLOG 88-04781 2 fiche

Report of the second phase of a research program investigating the use of aquatic plants for wastewater treatment in the coal mining industry. A literature review was conducted on the physiology and ecology of emergent aquatic plants, along with an experimental study using cattails. The scope is limited primarily to the large rooted emergent macrophyte species that were identified as useful in water treatment. The report complements previous laboratory research on the use of floating macrophyte species, the duckweeds and *Lemnaceae*.

The Potential use of robotics in the Canadian aerospace industry

by A. Ranade. Ottawa : Transportation Development Centre, 1984. xi, 24 p. Bibliogr. *TP 5366E.*
MICROLOG 88-00336 1 fiche

Higher cost production, lower average productivity and loss of skills are some of the factors driving the manufacturing industry towards automation. The introduction of robotics in aerospace manufacture, although initially slow, is gathering momentum. This report examines the potential areas of robotics application in aerospace manufacture. For the purpose of this study, Canadair is taken as a typical airframe manufacturing operation. A survey was made of the potential application areas, they were analyzed and painting, routing, drilling, and water-jet operations were chosen for detailed study. Steps required for a demonstration phase are also described.

Pour une gestion intégrée des déchets : synthèse des discussions

Québec : Ministère de l'environnement, Direction de la récupération et du recyclage, 1988. v, 187 p. : ill. (Récupération recyclage ; QEN/RR-23) *Titre de la couv.*. ISBN 2-550-185557-9
MICROLOG 88-04317 3 fiche

Le ministère de l'Environnement s'est attelé à la tâche de l'élaboration d'une politique de gestion intégrée des déchets domestiques. C'est dans ce contexte que 37 organisations ont fait parvenir au Ministre leurs commentaires et leur recommandations concernant la mise en place d'une telle politique. Ce document se veut un compte rendu le plus fidèle possible des tenants et des aboutissants de cette consultation. On y retrouve l'ensemble des constats et des recommandations mises initialement sur la table par le Ministère afin de recueillir les opinions des divers intervenants. Il contient aussi le résumé des mémoires reçus et des discussions lors des ateliers et des séances plénières tenus en décembre 1987.

Pour une gestion intégrée des déchets, 2 : les moyens d'intervention

Québec : Gouvernement du Québec, Ministère de l'environnement, Direction de la récupération et du recyclage, 1987. iii, 21 p. Bibliogr. *Titre de la couv.*. ISBN 2-550-17844-0
MICROLOG 88-04316 1 fiche

Les déchets domestiques proviennent d'une activité individuelle de consommation et résultent de l'interdépendance des consommateurs. Les effets négatifs que sont les "externalités" ne passent pas par le marché et sont répercutés directement sur les consommateurs. Pour contrôler la production et l'abondance des déchets, les pouvoirs publics disposent de moyens d'intervention qui se regroupent en 3 grandes catégories: la législation et la réglementation, les instruments économiques et les méthodes incitatives. Ce document analyse les différents moyens d'intervention à partir de leur champs d'application, de leurs effets sur le marché et de leurs impacts sur les différents intervenants.
EV PR QU SC

Pour une gestion intégrée des déchets, 3 : les modèles d'intervention étrangers

Québec : Gouvernement du Québec, Ministère de l'environnement, Direction de la récupération et du recyclage, 1987. ix, 101 p. : ill. *Titre de la couv.*. ISBN 2-550-17848-3
MICROLOG 88-04315 2 fiche

La prolifération des déchets a amené plusieurs pays à se doter de programmes d'intervention afin de solutionner les problèmes causés par l'élimination de ces déchets. Ce document présente donc les principaux programmes d'intervention dans le domaine de la gestion des déchets domestiques. Les pays considérés ont été retenus en raison des caractéristiques particulières de leurs programmes: le programme ontarien d'aide financière à l'implantation de la collecte sélective: la diversité des programmes américains: le modèle belge d'internalisation des coûts dans le domaine de l'emballage: le système suisse de récupération du calcin; la loi suédoise obligeant les municipalités à ramasser les vieux journaux: le programme allemand d'intention politique et le système de gestion français.

Pour une gestion intégrée des déchets, 6 : la valorisation des déchets domestiques

Québec : Gouvernement du Québec, Ministère de l'environnement, Direction de la récupération et du recyclage, 1987. viii, 63 p. : ill. Bibliogr. *Titre de la couv.*. ISBN 2-550-17848-3
MICROLOG 88-04318 1 fiche

Au Québec, ce sont surtout les centres urbains qui sont confrontés à des difficultés aigues dans le domaine de la gestion des déchets municipaux, plus particulièrement, au niveau de leur élimination. La valorisation des déchets est l'une des solutions envisagées par différentes municipalités dans le but de donner une plus-value à certaines des composantes des déchets et de favoriser le prolongement de la vie utile des lieux d'enfouissement sanitaire qui sont de plus en plus difficiles à implanter. Ce document décrit donc les principales techniques de valorisation disponibles présentement et pouvant contribuer, par leur complémentarité, à une gestion plus rationnelle des déchets.

Prediction of combustion performance of low volatile Goodrich coal

by F.C. Lockwood and S.M.A. Rizvi. London, Ont. : The Authors, 1986. viii, 98 p. : ill. Bibliogr. *CANMET contract: OSQ84-00026.*
MICROLOG 88-00650 2 fiche

Report of research to develop a cost-effective general prediction procedure for describing physical processing in a two-dimensional axisymmetric combustor using high-volatile as well as low-volatile pulverised coals. This study involves the application of an earlier calculation procedure to the low volatile flames to assess the performance of the code and to improve it further. Experimental data was obtained for the low/high volatile flames and calculations were carried out for 4 swirling flames. The prediction procedure describes flow, combustion and heat transfer in turbulent pulverized coal flames and the mathematical formulation applies the eulerian conservation equations for the gaseous carrier-phase.

Prediction of wastewater characteristics from alkaline combustion wastes

Dearborn Environmental Consulting Services. Ottawa : Environment Canada, Environmental Protection Service, 1988. ix, 103 p. : ill. Bibliogr. (Report ; EPS 3/PG/11) ISBN 0-662-16159-9
MICROLOG 88-03676 2 fiche

Atmospheric fluidized bed combustion (AFBC) allows problem fuels to be combusted while achieving strict air emission requirements. Residues resulting from the pilot-scale combustion of a variety of fuels, including high sulphur coal and petroleum coke in beds of Canadian limestones, were subjected to a characterization program. The program included tests to characterize the physical, chemical, leachate and leachate toxicity properties of the AFBC residues. In addition, simple methods to predict the characteristics of combustion residue-contacted wastewaters were investigated. The effect of contact with the atmosphere on leachate chemistry and toxicity was also studied. The results were assessed to identify variations in wastes and their leachates, the implications of chemical reactions and the environmental consequences of AFBC waste management and disposal.

Prehistoric occupations at Coteau-du-Lac, Quebec : a mixed assemblage of archaic and woodland artifacts

by R. Lueger. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1977. 219 p. : ill. Bibliogr. (History and archaeology ; 12) (Histoire et archéologie ; 12) *Bound with: Analyses of two prehistoric copper artifacts from the cloverleaf bastion of the fort at Coteau-du-Lac, Quebec -- Identification of representative prehistoric stone artifacts and samples of unworked stone from the cloverleaf bastion of the fort at Coteau-du-Lac, Quebec -- Fish remains from the cloverleaf bastion of the fort at Coteau-du-Lac, Quebec -- The human osteological material from the cloverleaf bastion of the fort at Coteau-du-Lac, Quebec.*
ISBN 0-660-00959-5
MICROLOG 88-04056 3 fiche

Despite severe disturbance caused by the construction of a British fort in the 19th-century, the area covered by the cloverleaf bastion and perhaps other areas of the fort at Coteau-du-Lac can be shown to have been occupied or used periodically for some 5,000 years. The presence of certain diagnostic artifacts permits the identification of at least four prehistoric occupations of the site: the Brewerton and probably the Vergonnes phases of the Laurentian tradation; another later Archaic manifestation represented by Lamoka points; a Middle Woodland occupation represented by Point Peninsula pottery and human remains; and a Late Woodland presence, poorly but surely in evidence due to five Iroquoian potsherds.

Preliminary assessment of the current impact and potential risk of acidic deposition on walleye populations in Ontario

by D.L. Wales and V.A. Liimatainen. Toronto : Ontario Ministry of Natural Resources, 1987. i, 51 p. : maps. Bibliogr. (Ontario fisheries acidification report series ; no. 87-11) ISSN 0832-7629 ISBN 0-7729-3255-7
MICROLOG 88-06239 1 fiche

The chemical sensitivity of lake trout and brook trout populations to acidic deposition was described for Ontario lakes, but no similarly rigorous examination was completed for Ontario's walleye populations. This study examines the characteristics of the lakes the species inhabit, the characteristics of the species' life history, published and unpublished toxicity data, and water chemistry data for walleye lakes and stream spawning sites to determine the risk to Ontario's walleye resource from acidic deposition. Data sets used were the Walleye Atlas: the Comprehensive Data Set containing lake water chemistry, lake morphometry and fish species presence information; and a data set that contains stream chemical information collect at walleye spawning sites in 1981.

Preliminary characterization of pond cleaning techniques and wastes for salmonid enhancement facilities in British Columbia

by B.G. Shepherd and L.A. Ferriss. Vancouver, B.C. : Dept. of Fisheries and Oceans, Resource Enhancement Branch, 1988. v, 137 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1952) ISSN 0706-6473
MICROLOG 88-02191 2 fiche

The Phase I (1976-1984) and Transition (1984-1986) periods of the Salmonid Enhancement Program (SEP) resulted in the relatively rapid expansion in both the number and capacity of fish culture facilities in British Columbia. This expansion also increased concerns regarding the impact that hatchery effluents might have on receiving waters in British Columbia, particularly in the environmentally sensitive Central Interior region. This study presents the results of a summer student project to describe various cleaning techniques and the resultant effluents for several types of rearing containers presently in common use at SEP hatcheries.

Preliminary estimates of incidental small-mouth bass mortality in gill nets in Long Point Bay (1983-84)

by R.B. MacGregor. Port Dover, Ont. : Ontario Ministry of Natural Resources, Lake Erie Fisheries Assessment Unit, 1987. v, 43 p. Bibliogr. (Report ; 1987-1)
MICROLOG 88-00790 1 fiche

Commercial and sport fishing thrive on Long Point Bay, with the commercial fishing done for yellow perch using gillnets and the sport fishing concentrating on smallmouth bass. Complaints from sport fishermen on the low catch of smallmouth bass due to incidental catch in gillnets have increased recently. This report describes the results of some preliminary work carried out in 1983 and 1984 examining the incidental catch of smallmouth bass in commercial gillnet by on-board observations of commercial fishing catches, and by simulating commercial fishing at a time and in areas where incidental catches are thought to be highest.

A Preliminary examination of mental workload, its measurement and prediction

by P.S. Eisen and K.C. Hendy. Downsview, Ont. : Dept. of National Defence Canada, Defence and Civil Institute of Environmental Medicine, 1987. 42 p. : ill. Bibliogr.
MICROLOG 88-04172 1 fiche

A principal focus of DCIEM's proposed work in human operator workload is the area of subjective mental load. This report details a literature review, reviews the objectives of mental workload research, and defines terms which are related to the study of mental workload. A conceptual model of human cognitive behaviour is advanced which draws both from multiple resource theory and from hierarchical taxonomics of skilled behaviour. Potential indicators of mental workload are discussed and a set of criteria for judging workload metrics is described. Following this, a summary of available workload measures is presented. Finally, the report includes a discussion and recommendations for further research which is directed towards the validation of workload metrics in applied field setting and the establishment of the limitations of various measurements techniques.

Preliminary investigation of the microfiltration of oil sands tailings pond sludge

by B. Farnand and H. Sawatzky. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1987. 17 p. : ill. (Report ; ERP 88-02(TR))
MICROLOG 88-04570 1 fiche

Oil sands mining and extraction produce a large amount of tailings which are settled in ponds to give clarified water and sludge. The sludge residues appear to be very stable and consist of a stable oil-in-water (o/w) emulsion with low levels of heavy oil/bitumen and with very high solids contents, approximately 25% by weight. If residual water and bitumen could be removed from the sludge along with the natural surfactants that support the emulsion, the solids could settle. This would permit the use of recovered bitumen and water could benefit the oil sands refiner, and an adequate engineering material would reduce the cost of backfilling the oil sand quarries. Oil sands tailings pond sludge was processed by membrane microfilration to assess a process for dewatering sludge. Raw and deoiled sludges from the Syncrude tailings ponds were prepared by using a laboratory bench-scale model of a proposed commercial process.

Preliminary study of the possible impacts of a one metre rise in sea level at Charlottetown, Prince Edward Island : summary of a report

P. Lane and Associates Limited. Ottawa : Environment Canada, 1988. 7, 8 p. (Climate change digest ; CCD 88-02) *Bilingual (Etude préliminaire des effets...).* ISSN 0835-3980
ISBN 0-662-55649-6
MICROLOG 88-03745 1 fiche

One of the direct results of global warming is expected to be a rise in sea-levels from 20-140 cm or more by the middle of the next century. This rise in sea-level will have, in turn, significant implications for coastal areas. This study begins with the assumption of a one metre rise in sea level because of global warming, and predicts the impacts of this scenario on Charlottetown, Prince Edward Island. The study does not attempt to validate this assumption, however, nor does it deal with analysis of other factors affecting sea level such as tectonic subsidence.

Preliminary study of the regional distribution in the atmosphere of the vapour phase of widely used pesticides within western Canada

by S.R. Shewchuk and K. Wallace. Regina : Saskatchewan Research Council, 1988. iv, 33 p. Bibliogr. (SRC publication ; no. E-906-7-B-88) (SRC technical report ; no. 210)
MICROLOG 88-04385 1 fiche

Each year significant amounts of pesticides are applied to the agricultural lands of western Canada, with residues of these pesticides known to enter the atmosphere on dust particles and by volatilization from soil and water surfaces. This study determines if triallate, trifluralin, 2,4-D and other commonly used pesticides can be detected in the air mass of an agricultural area of the Canadian West. Samplers were located at Rock Point and Cree Lake and samples were analyzed for triallate, trifluralin, diclofopmethyl, bromoxynil, dimethoate, lindane and lorsban by chromatography and for 2,4-D, dicamba and MCPA using a derivatization procedure.

Prévisions démographiques pour la population de tétras des savanes *Dendragapus canadiensis* introduite à l'Ile d'Anticosti en 1985 et 1986

par J. Ferron et Y. Lemay. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, 1987. v, 33 p. Bibliogr. ISBN 2-550-17328-7
MICROLOG 88-01535 1 fiche

Le projet d'introduction du tétras des savanes *Dendragapus canadensis* sur l'île d'Anticosti a pour but d'améliorer la qualité de la chasse au petit gibier déjà existante et de développer une activité secondaire à la chasse au cerf de Virginie. Ce rapport présente d'abord les résultats de la capture des tétras sur le continent et la distribution des lâchers des oiseaux sur l'île d'Anticosti. On présente ensuite les résultats obtenus lors du suivi de la population introduite. L'accent est mis particulièrement sur les prévisions démographiques et la simulation de l'impact de l'ouverture de la chasse sur la croissance de la population de tétras sur l'île. Une discussion sur le bilan de l'introduction de tétras des savanes et sur la portée et les limites des modèles de prévisions démographiques conclut le document.

Des Priorités en éducation des adultes : avis au ministre de l'éducation et ministre de l'enseignement supérieur et de la science

Québec (Province). Conseil supérieur de l'éducation. Québec : le Conseil, 1987. 54 p. : ill. *CSI 67143.200.* ISBN 2-550-13747-7
MICROLOG 88-02965 1 fiche

Des citoyens en nombre croissant doivent affronter des défis nouveaux issus des modifications de la structure de l'emploi et des besoins de formation qui en découlent. Dans cet avis, le Conseil s'interroge sur la portée de cet important investissement dans le secteur de l'éducation des adultes. En considérant les choses dans leur globalité, il se demande si les efforts considérables déployés en éducation des adultes rejoignent les besoins les plus pressants et si les groupes actuellement visées ou effectivement atteints sont bien ceux qui éprouvent les plus grands besoins de formation. Une série de recommandations est incluse.

Prismatic-shaped block insertion : an application of a multiprocessor robot controller using Harmony

by D.H. O'Hara and R. Kurtz. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1987. v, 60 p. : ill. Bibliogr.
MICROLOG 88-04448 1 fiche (Available on fiche only)

Description of an application of the Chorus/Harmony computing facility for realtime robot control. The ALTER link on the PUMA family of robots was adapted to provide versatile motion control from an external computer. Two aspects of the Harmony Operating System are demonstrated: the use of courier tasks to provide synchronized non-blocking inter-task communication and, the use of servers to distribute resources effectively. The block insertion task requires immediate manipulator control response. Both active accommodation through Harmony/Chorus manipulator control from the IRCC signal data and passive accommodation of the IRCC device were used in this application.

La Privatisation des prisons

par H. McKenzie. Ottawa : Bibliothèque du Parlement, 1986. 34, ii p. Bibliogr. (Etude générale pour les Parlementaires ; BP-145F) *L'éd. anglaise (The privatization of...) sur la même fiche.* ISBN 0-660-92023-9
MICROLOG 88-00705 1 fiche

L'idée de privatisation des prisons remet en question le monopole d'Etat du système correctionnel et soulève de nombreuses questions concernant les responsabilités juridiques. Elle peut prendre de nombreuses formes: organisation d'ateliers industriels, construction des établissements de détention ou fourniture de services. Cette étude examine le fonctionnement de ces types d'entreprises aux Etats-Unis et au Canada et examine les avantages d'un tel système, les problèmes qui y sont inhérents et des incidences économiques, juridiques et politiques.

The Privatization of prisons

by H. McKenzie. Ottawa : Library of Parliament, 1986. 33, ii p. Bibliogr. (Background paper for Parliament ; BP-145E) *French ed. (La privatization des...) on the same fiche.* ISBN 0-660-12437-8
MICROLOG 88-00705 1 fiche

The concept of privatization of prisons has suggested as a method of coping with the increasing difficulties of operating correctional systems within budgetary levels. The need for change occurs because of the growing inmate population and a scarcity of public funds. This report examines issues related to taking prison operations out of the public domain and placing them in control of the private sector. Discusses the "Free Venture Model" of the US example, and other US prison industries, private enterprise for service delivery in the area of post-release supervision, the role of volunteers, for-profit service delivery, non-profit operations, private enterprise building prisons, as well as the delegation of responsibility and power and other related political issues.

Probabilistic networks

by B.L. Fox. Montreal : Université de Montréal, Centre de recherche sur les transports, 1975. 16 p. Bibliogr. (Publication ; no. 33) (Publication ; no 217) *Presented at the ORSA/TIMS Joint National Meeting, Las Vegas, Nevada, November 1975.*
MICROLOG 88-06311 1 fiche

Networks with random arc lengths, which arise naturally in PERT/CPM problems and in traffic assignment, are considered using Monte Carlo calculation of criticality and path length distribution. Anomalies that can arise with the conventional definition of criticality are pointed out and a new definition that to some extent gets around the problem is proposed. The conceptual and computational advantages of k-th shortest paths in this connection are indicated. Novel control variates for estimating shortest (or longest) path length distribution are used.

A Procedure to lower the limits of detection for silver, cadmium and lead in the analysis of geological materials by atomic absorption spectrometry

by G.E.M. Hall and J.L. Bouvier. Ottawa : Geological Survey of Canada, 1988. 5 p. Bibliogr. (Paper ; 87-27) ISSN 0068-7650 ISBN 0-660-53843-1
MICROLOG 88-03059 1 fiche

The current method by which geological materials are analyzed for silver, cadmium and lead on a large scale at the Geological Survey of Canada is based upon their determination by atomic absorption spectrometry after a total decomposition procedure producing a digesate which is also used for the determination of a suite of other trace elements by ICP-emission spectrometry. Presented here is an efficient and reliable preconcentration method employing extraction of Ag, Cd and Pb as their iodide complexes into an organic medium (Aliquat 336/IBMK) from the same digestate.

Proceedings of the Canadian Agricultural Outlook Conference, December, 1987

Canadian Agricultural Outlook Conference (53d : 1987 : Ottawa, Ont.). Ottawa : Agriculture Canada, 1988. 227 p. Bibliogr. (Market commentary) *French ed. (Analyse du marché...) : 88-04168/3.*
MICROLOG 88-04167 3 fiche

The theme of the Conference was "The Changing Face of the Agriculture and Food Sector". The presentations from the first plenary session on the Conference theme are included in the proceedings, providing an overview of the changing structure in agriculture and examining the implications for the future directions of the agri-food sector. In the second plenary session, the papers presented summarize the outlook for major commodities, farm income, food markets and trade. The proceedings also include invited papers in the seven concurrent sessions on commodity markets, food markets, farm costs and income, and the family farm forum. Specific aspects of the Conference theme were dealt with during these sessions.

Proceedings of the Symposium on Interbasin Transfer of Water : Impacts and Research Needs for Canada

edited by W. Nicholaichuk and F. Quinn. Saskatoon, Sask. : National Hydrology Research Centre, 1988. viii, 502 p. : ill. Bibliogr. ISSN 0838-1984 ISBN 0-662-16017-7
MICROLOG 88-03679 6 fiche

The volume of water transferred between drainage basins in Canada is larger than in any other country in the world. The recent slowdown in growth of water demand for agricultural and energy production provides an opportunity to reassess economic, social and environmental realities and the limits of our predictive and management capabilities. This national symposium was held to compare experiences with different kinds of interbasin transfer projects across Canada, including hydrological, morphological, engineering, biological, social, legal, economical and political aspects; to review the adequacy of pre-project and post-project monitoring activities in support of more comprehensive assessment of project impacts; and to identify the data and research needed to improve our understanding of the implications of water transfer in terms of natural processes, social values and policy alternatives. The papers are as submitted by their authors and abstracts are included.

Process audits reveal benefits of automation in wastewater treatment

Burlington, Ont. : Environment Canada, Wastewater Technology Centre, 1988. 3, 3 p. (Environmental technology notes) *Bilingual (Une évaluation sur...).*
MICROLOG 88-04801 1 fiche

When industrial and municipal wastewaters are biologically treated to render them less harmful to the environment, part of the process usually involves aeration or the provision of oxygen. Typically, aeration systems are manually controlled by plant operating staff. This manual control operation leads to excess energy costs by up to 50%, which could be reduced by automation. In 1983, the Tillsonburg, Ontario water pollution control plant was evaluated for a demonstration, using a microprocessor-based audit. This note describes the system used and the energy savings involved.

Profil de la pauvreté, 1988 : rapport

Conseil national du bien-être social (Canada). Ottawa : le Conseil, 1988. 126 p. : ill. *L'éd. anglaise (Poverty profile, 1988...) : 88-03850 2 CSI 22251.004.* ISBN 0-662-94728-2
MICROLOG 88-03851 2 fiche

Le taux de pauvreté monte et descend constamment au Canada depuis 20 ans. Ce rapport présente une image statistique détaillée de la pauvreté au Canada et examine la pauvreté actuelle ainsi que les changements qu'on a pu noter au fil des ans en matière de pauvreté. Il indique aussi les tendances des revenus et des salaires moyens et se penche sur la répartition toujours inégale du revenu. On y trouve entre autres des statistiques sur la féminisation de la pauvreté, la pauvreté selon la province et l'âge, les liens entre le niveau de scolarité et la pauvreté, ainsi que sur la source de revenu principale.

A Profile of the Manitoba trapper from questionnaire analysis

by C.S. Johnson. Winnipeg : Manitoba Natural Resources, Wildlife Branch, Biological Services, 1986. vi, 101 p. Bibliogr. (Technical report ; no. 87-8)
MICROLOG 88-02572 2 fiche

Fur management in Manitoba in the past 40 years has depended largely upon the Registered Trapline system with variations allowing for local differences. A survey was instituted, based on traplines which were grouped based on geographic and cultural homogenity and classified into Northern Registered, Eastern Registered, Western Registered, and Open. The questionnaire included questions on trapping techniques and equipment, socio-economic status, marketing and use of furbearers and issues of major importance to trappers. Characteristics of non-respondents were assumed to be identical to those of respondents. Three thousand six hundred and ninety-eight licensed trappers were surveyed in 1986/7 and the results are based on 1,037 responses.

Programme interprovincial de fertilisation des forêts, 1968-1983 : 81 dispositifs expérimentaux normalisés établis dans des peuplements non aménagés d'âge moyen de 7 provinces participantes, rapport final : résultats des remesurages de l'accroissement décennal

par G.F. Weetman...et al. Ottawa : Gouvernement du Canada, Service canadien des forêts, Direction générale des sciences forestières, 1987. xi, 55, xi, 53 p. : ill. Bibliogr. (Rapport d'information ; DPC-X-21) *Bilingue (Interprovincial forest fertilization...)*. ISSN 0705-324X ISBN 0-662-55143-5
MICROLOG 88-04121 2 fiche

Le Programme interprovincial de fertilisation des forêts comporte quelque 81 dispositifs expérimentaux normalisés qui ont été établis par les services forestiers provinciaux du Nouveau-Brunswick, du Québec, de l'Ontario, du Manitoba, et de l'Alberta, et par le Service canadien des forêts en Nouvelle-Ecosse et en Saskatchewan. 72 de ces dispositifs étaient remesurés après 10 saisons de croissance. Ces expériences avaient pour but d'étudier les effets de l'application d'azote sous forme d'urée aux taux de 112 et de 224 kg/ha, seul ou combiné au phosphore ou au potassium ou aux deux à la fois, sur la croissance des peuplements de résineux au stade de perchis ou en voie d'atteindre leur maturité. Ce document présente les résultats de la recherche et inclut une discussion de ceux-ci.

Progress report : the effects of well casing materials on groundwater chemistry

by Y.M. Chae...et al. Edmonton : Alberta Environment, Environmental Protection Services, Earth Sciences Division, Hydrogeology Branch, 1987. iv, 50 p. : ill. Bibliogr.
MICROLOG 88-04154 1 fiche

The effects of different well casing materials on groundwater chemistry were studied by using six wells constructed with two different types of well casing material at three sites. These six wells include two wells at each site, one constructed with steel casing and the other with PVC casing. Groundwater samples were obtained each month and analysed for routine chemical constituents, COD and heavy/trace elements. EC and pH were also measured on-site at the time of sampling.

Project 'Frigonav' Hovercraft type 140 operating experience, February - March 1987

prepared for the Transportation Development Centre ; by D. Jones., Hamilton, Ont. : Ice Control Enterprises Inc., 1987. ix, 32 p.
MICROLOG 88-03196 1 fiche

The area around Chicoutimi is supplied with fuel from the storage tanks normally filled by ships docking at the oil pier at Point d'Islet. Ice in the channel between Point d'Islet and the furthest point that can be reached by the Coast Guard ice breaker at Grande Anse limits the navigation period, and results in any winter resupply being carried out by truck. Project "Frigonav" was instigated by Ports Canada to determine if a medium hovercraft could open the channel earlier. The project centred around the Airtrek 140, evaluating the ice breaking performance, and gaining experience in operating such a vehicle. This report presents the data for early February to the end of March.

Projets nouveaux, nouveaux défis : le multiculturalisme au Manitoba au cours de la prochaine décennie

Conseil interculturel du Manitoba. Winnipeg : le Conseil, 1987. 17, 19 p.
MICROLOG 88-02595 1 fiche

Le Conseil interculturel du Manitoba entreprend une campagne de consultation au Manitoba pour discuter de la réalisation de 3 projets affectant toutes les communautés culturelles. Ces projets incluent le rapport du Comité permanent de la Chambre des Communes sur le multiculturalisme, le groupe de travail sur le multiculturalisme au Manitoba, ainsi qu'une étude de la répartition des fonds des loteries au Manitoba. Deux annexes présentent les procès-verbaux et témoignages du Comité permanent de la Chambre des Communes sur le multiculturalisme et le texte d'un projet de loi canadien sur le multiculturalisme au Canada.

Promoting the health of Albertans : a study of practices, attitudes and beliefs impinging on chronic disease prevention

by G. Parakulam. Edmonton : Alberta Community and Occupational Health, Management Support Services, 1987. xi, 161 p. : ill. Bibliogr.
MICROLOG 88-02776 2 fiche

In June 1985, Statistics Canada carried out the Health Promotion Survey. It covered all ten provinces as well as the Yukon and its objective was to collect information on the knowledge, attitudes and behaviours of Canadians concerning health promotion issues. Data pertaining to Alberta constitute the basis of this report and can be summarized under the following areas: behavioural risk factors; health promoting behaviours and attitudes; subjective health; and environmental factors. Includes findings on smoking, alcohol use, seatbelt use, drug use, exercise, high blood pressure, cancer screening among women, general health perceptions, stress, nutrition and dieting, first aid and safety in the home, and health and the workplace. The report concludes by identifying some of the limitations of the method and data used in the study.

La Propagande haineuse -- Revu

par P. Rosen. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 21 p. Bibliogr. (Bulletin d'actualité ; 84-6F) *L'éd. anglaise (Hate propaganda) sur la même fiche.* ISBN 0-660-92166-9
MICROLOG 88-00796 1 fiche

Le propagande incitant à la haine et préconisant l'inégalité raciale a probablement toujours existé, mais le dernier quart de siècle a été le témoin d'un débat généralisé sur ce qu'il convient de faire à ce sujet. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, rappelle d'abord les deux vagues successives d'activités racistes qui ont eu lieu après 1960. Ensuite, on présente les dispositions de code criminel et des lois provinciales qui sont utilisées pour lutter contre la propagande haineuse. Une liste des mesures parlementaires et une chronologie complètent le document.

Propane/diesel injection system for diesel truck engines

prepared for the Transportation Development Centre : by F.W. Eyre and P. Nikolaiczuk. Ottawa : Transportation Development Centre, 1986. xvii, 201 p. : ill. Bibliogr. *TP 7707E.*
MICROLOG 88-00320 3 fiche

This report presents the results of a test program sponsored by the Transportatin Development Centre (TDC) to investigate the use of propane in diesel engines utilizing the technique of direct liquid injection of propane with ignition provided by a pilot injection of No. 2 diesel fuel. The objectives of the program included: determining the performance of a laboratory engine operating in two modes of propane fuelling, assessing the potential of a dual-fuel liquid propane injection system as an alternative fuel technology, based upon laboratory test results using prototype hardware.

Propane/diesel injection system for diesel truck engines : summary report

by F.W. Eyre and P. Nikolaiczuk. Ottawa Transportation Development Centre, 1986. xi, 25 p. : ill. *TP 7709E. French ed. (Système d'injection propane/diesel...) on the same fiche.*
MICROLOG 88-00345 1 fiche

Propane is commonly used as a fuel for vehicles owing to its low cost, good performance, and low emission characteristics. It is usually introduced into the engine intake manifold at low pressure, a process known as fumigation. The study researched the injection of liquid propance at high pressure directly into the combustion chamber of a diesel engine, with ignition provided by a pilot injection of No. 2 diesel fuel. The results, obtained using a single-cylinder engine, indicate that good engine thermal performance and greatly reduced smoke emissions can be achieved. Economic studies show that a developed liquid 2-fuel injection system would be of interest to truck fleet operators in several regions of Canada.

Province-wide directory of substance abuse programs, 1988-89

New Brunswick Advisory Council on the Status of Women. Fredericton : New Brunswick Advisory Council on the Status of Women, Alcoholism and Drug Dependency Commission of New Brunswick, 1988. v, 48, v, 45 p. *Bilingual (Répertoire des programmes...) CSI 46100.006*
MICROLOG 88-05945 2 fiche

While it has become acceptable during the last two decades for women to drink, it has not been acceptable for women to admit to a problem of alcohol or other drug dependency. Women's chemical dependence is often well hidden or not acknowledged until the problem has reached a severe stage. At the request of the Advisory Council on the Status of Women, this directory of substance abuse programs available for women in New Brunswick was developed. The material presented also provides background information on the scope of the problem of substance abuse along with a summary of available programs

Regional self-sufficiency in health care delivery is a desirable and achievable goal in Newfoundland, except for the tertiary care provided only in St John's. This detailed study on the requirement for acute and long term care services was conducted between August 1985 and March 1986. The study, conducted by region and hospital, determines the role and service function of each region and hospital, the requirement for general hospital beds up to the year 2000, and the potential for reduction of existing beds to realize savings equal to the closure of approximately 355 beds. Also discusses the development of plans for the construction of 700 additional nursing home beds.

This document presents tables which are predominantly standard reports produced annually by the Ministry from data collected from the school districts as of September 30. The report was organized according to the four broad learning areas on which schools are expected to focus and the six attributes of a quality school system. Includes tables on intellectual development, vocational development, accessibility, relevance, and professionalism.

Public transit network assignment method

by C. Chriqui. Montreal : Université de Montréal, Centre de recherche sur les transports, 1975. 10 p. Bibliogr. (Publication ; no. 21) (Rapport de recherche ; no 75-08)
MICROLOG 88-06304 1 fiche

Description of a public transit network assignment method based on a line-node structure for the network. Input data consisted of a node identifier and its x-y coordinates in a geocoded system, and for each route, the identifier frequency, commercial velocity, and a list of identifiers for nodes. Routes are defined for use in both directions and provision is made for different paths on these directions. Output consists of a computer file on which nodes on any line can be traced and all lines passing through any node can be described. Time travel between two adjacent nodes on a given route is also available.

Publications of the province of Nova Scotia, 1986 : a check list compiled in the Legislative Library of documents received during the calendar year 1986

Nova Scotia. Legislative Library. Halifax : The Library, 1988. iv, 119 p. ISSN 0550-1792
MICROLOG 88-03079 2 fiche

As the depository for Nova Scotia government publications, the Legislative Library is responsible for collecting all the published output of provincial government departments, agencies and crown corporations. These publications form the basis for this list. It includes pamphlets, brochures, flyers as well as reports, studies, books and periodicals, but not confidential reports. This listing is divided into two main categories: official and departmental publications. Official publications, consisting of gazettes, bills, statutes and regulations, debates, journals and other publications of the House of Assembly are included in the first category with departmental publications (in alphabetic order of the issuing department, board or commission) making up the second category.

Pulp and paper modernization grants program : an assessment

by K.E.A. De Silva. Ottawa : Economic Council of Canada, 1988. ix, 152 p. : ill. Bibliogr. (Discussion paper ; no. 350) *CSI 22215.209.* ISSN 0225-8013
MICROLOG 88-05158 2 fiche (Available on fiche only)

During the 1970s, the pulp and paper industry experienced a slowdown in demand caused by a rapid increase in costs which reduced the industry's international competitiveness. Believing that the slump was due to a capital shortage, the federal and provincial governments established the Pulp and Paper Modernization Program, distributing over $500 million in subsidies. This study evaluates the various arguments advanced in favour of the Program. It also examines the issue of incrementality, that is, whether PPMP led to an increase in investment which would not have occurred otherwise.

Qu'Appelle fishing lakes nutrient loading study, 1980 to 1983 : final report

by D.J. Munro. Regina : Environment Canada, Western and Northern Region, Water Quality Branch, 1986. iii, 39 p. Bibliogr.
MICROLOG 88-04726 1 fiche

Intensive sampling for nitrogen and phosphorus was undertaken in the Qu'Appelle River from April, 1980 to June, 1983. This work was intended to fulfill a recommendation made by the Qu'Appelle Valley Management Board and federal and provincial government agencies, that trends in nutrient loading to and from the Fishing Lakes be determined. At the upstream site 72 hour composite samples were collected, while below the Fishing Lakes a grab sample was collected every 72 hours. The nutrient data and Water Survey of Canada flow data were used to calculate nutrient loads.

Qualité de l'eau à son entrée dans le fleuve Saint-Laurent, de 1977 à 1983

par A. Sylvestre, K.W. Kuntz et N.D. Warry. Burlington, Ont. : Direction générale des eaux intérieures et des terres, Institut national de recherche sur les eaux, Centre canadien des eaux intérieures, 1987. v, 60 p. : ill. Bibliogr. (Collection des rapports techniques ; étude no 142) *L'éd. anglaise (Water quality...) : 88-01158/1.* ISBN 0-662-94500-X
MICROLOG 88-05383 1 fiche

La Direction de la qualité des eaux, région de l'Ontario, a établi en 1976 une station de contrôle quotidien de la qualité de l'eau, à Banford Point, sur la rive sud de l'île Wolfe, dans le chenal sud du Saint-Laurent. Ce rapport contient la première évaluation complète des données sur la qualité de l'eau obtenues à cette station. Ces données sont comparées à celles d'une série de relevés, le long de transects effectués autour de l'île Wolfe et aux données obtenues lors des missions de surveillance dans la partie est du lac Ontario. Le rapport fournit de plus les variations saisonnières et les tendances à long terme des principales variables de la qualité de l'eau et présente des estimations de charge pour le fleuve Saint-Laurent. Il comprend également des recommandations sur de futures activités d'échantillonnage à la station de l'île Wolfe.

Quantitative metallographic assessment of high temperature components

by H.J. Westwood and F.W. Smith. Toronto : Ontario Hydro, Research Division, 1987. iv, 35 p. : ill. Bibliogr. (Report ; no. 87-267-K)
MICROLOG 88-01747 1 fiche

Surface replication is an important tool used in life assessment of thermal units. The immediate application is damage/defect detection but it can also be used to characterize and quantify more subtle changes in the microstructure of low-alloy steels, changes which weaken the material and lead ultimately to failure. Quantitative metallographic techniques based on replication have been used to estimate metal temperatures in selected locations of several Lakeview units. The report analyses the methods and results in some detail and identifies areas where work is needed. Also considered is the potential of estimating creep strain from microstructural studies.

Quaternary geology of the Tuktoyaktuk coastlands, Northwest Territories

by V.N. Rampton. Ottawa : Geological Survey of Canada, 1988. 98 p. : ill. Bibliogr. (Memoir ; 423) *Folding maps not filmed.*
MICROLOG 88-02809 2 fiche

The Quaternary geology of the Tuktoyaktuk Coastlands was initially investigated in the 1960s because of active exploration for oil and gas. Continuing exploration in the Beaufort Sea region resulted in the need for support and transportation facilities throughout the Tuktoyaktuk coastlands and emphasized the importance of the surficial geology studies. This report synthesizes the observations made during the last 2 decades. It establishes the sequence and age of Quaternary deposits and landforms; the distribution of permafrost and ground ice relative to the various Quaternary landforms and stratigraphic sequences; and the effect of modern, especially periglacial, process upon the landscape.

Quelques problèmes de tarification du transport des voyageurs à Montréal -- Rév.

par M.J.I. Gaudry. Montréal : Université de Montréal, Centre de recherche sur les transports, 1977. 13 p. Bibliogr.
(Publication ; no. 50) (Cahier ; no 7611)
Communication faite au Colloque de l'Association des économistes québécois d'octobre 1976.
MICROLOG 88-06313 1 fiche

Cet article fait état d'éléments dont il faut tenir compte lorsqu'on élabore une structure tarifaire des modes de transport des voyageurs en milieu urbain. La plupart des arguments s'attachent à souligner ce qu'on sait des coûts de transport et des réactions des consommateurs aux prix et conditions de transport. On souligne aussi l'importance de la structure institutionnelle de gestion et des réglementations des réseaux.

Radiation levels in backfilled areas at Denison Mines Ltd.

by J. Bigu, M.G. Grenier and A. Frattini. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1985. iv, 60 p. Bibliogr. (Report ; MRL 87-180(TR))
MICROLOG 88-05519 1 fiche

A backfill program was initiated at Denison Mines Ltd., Elliot Lake, Ontario, to assist in pillar recovery operations in areas of the mines where there was low extraction during primary stoppings. The backfill materials used are residues derived from uranium extraction operations by hydrometallurgical processes, containing Ra-226, a radioactive isotope. Two samplings stations were set up to monitor on a continuous, unattended basis the radon daughter Working Level, thoron daughter Working Level, radon gas concentration, and thoron gas concentration. In addition, a meteorological package,data logger and associated sensors, gave information regarding temperature and barometric pressure, with readings every hour every day. Grab-sampling was also conducted periodically at several relevant locations of mine air flow, relative humidity, and radon gas (Ra-226) concentration dissolved in water draining from drainpipes through bulkheaded backfilled stopes.

Radioactivity conditions in a non-uranium underground mine in the absence of mining operations

by J. Bigu, A. Frattini and E. Edwardson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iv, 39 p. : ill. Bibliogr. (Report ; MRL 88-67(TR))
MICROLOG 88-05526 1 fiche

Uranium mines are not alone in exhibiting appreciable concentrations of radon and its progeny. This report presents data regarding a comprehensive radiation and ventilation study carried out at a non-uranium underground mine. A radiation/ventilation survey was conducted when no operations were carried out and another survey was done about 2 months later when the mine was in full operation. The first survey determined build-up and clearance times of radioactive mine atmospheres when the ventilation system of the mine was turned off and on and the 2nd phase was conducted to assess the effect of mining operations on the radiation level of the mine atmosphere. This report presents data from the 1st phase.

Radioactivity emissions from bacterially-assisted leaching in uranium stopes

by J. Bigu and D. Schryer. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. iii, 29 p. : ill. Bibliogr. (Report ; MRL 87-174(TR))
MICROLOG 88-03166 1 fiche

Bacterially-assisted leaching provides a relatively inexpensive and simple way of recovering uranium from mined-out stopes or low-grade uranium ores in some Canadian underground uranium mines. A study was conducted to characterize the radioactivity environment of a typical mined-out uranium stope where uranium was being recovered by bacterially assisted heap-leaching of muck brought down by drilling and blasting operations. Measurements were carried out on radon gas and its progeny, thoron progeny, and air flow through the stope during several experimental phases of the leaching operation. Experimental data were compared with theoretical models.

The Radiological implications of using Port Hope sewage sludge on farm land

by P.M. McKee and D.L. Lush. Ottawa : Atomic Energy Control Board, 1987. x, 65 p. : ill. Bibliogr. (Research report ; INFO-0262)
MICROLOG 88-03557 1 fiche

For several years, sewage sludges from the Port Hope Pollution Control Plant were used as agricultural fertilizer. In 1985, the sludges were found to contain uranium, originating primarily from a uranium refinery, and, in the absence of guidelines for land application of sludges containing uranium, landspreading was suspended. This research project was undertaken to determine the levels of uranium and its decay products in Port Hope sludge, compare these with levels found in other sewage sludges, determine whether any build-up of uranium has occurred in soils fertilized with Port Hope sludge, and calculate the dose to farmers.

Railway radio operated power switch machine control system

prepared for Transportation Development Centre ; by Signalcom Canada Corporation ; by G. Armstrong...et al.. S.l. : Signalcom Canada Corporation, 1987. xvii, 75 p. : ill. *TP 8067E.*
MICROLOG 88-00330 2 fiche

This report describes a research project to develop a railway radio operated power switch machine control system. The project included the design and construction of the electronic equipment required to remotely control a railway track power switch machine. A MITAP control head in the locomotive was modified to communicate to a wayside MICROLOK, which in turn monitored the track circuits and vitally controlled the power switch machine. The serial communications link was designed to provide a vital link through an existing radio system. Vital software was implemented to allow the train engineer to select the switch position and have the position confirmed within a safe stopping distance from the switch.

Rapport annuel national sur les drogues, 1986-87 et indicateurs de tendances d'ici 1989

Ottawa : GRC, Direction de la police des drogues, 1988. x, 103, ix, 101 p. : ill., cartes géogr. *Bilingue (National drug intelligence...) CSI 22279.002.* ISSN 0820-6228 ISBN 0-662-55323-3
MICROLOG 88-03600 3 fiche

Ce rapport a pour objet de présenter une analyse détaillée de l'origine, de la quantité, des voies d'acheminement, des modes de transports et des méthodes de contrebande des drogues du marché illicite canadien, de même que des opérations financières associées à cette activité Il vise principalement à coordonner le rassemblement, la collation, l'analyse et la diffusion des renseignements nationaux et étrangers sur les drogues pouvant intéresser les législateurs, ainsi que les organismes et les personnes chargés de la lutte anti-drogue. Le rapport débute par le sommaire des activités de 1986/87 et présente les tendances d'ici 1989. Il analyse ensuite chacun des grands groupes de drogues: l'héroïne, la cocaïne, les drogues chimiques et le cannabis. Finalement, le rapport fournit la liste des principales saisies de drogues au Canada ou en route vers le Canada en 1986.

Rapport annuel sur l'écoute électronique : requis par l'article 178.22 du Code Criminel, 1987

Ottawa : Solliciteur général Canada, 1988. iv, 42, iv, 39 p. : ill. *Bilingue. CSI 21121.004.*
MICROLOG 88-05898 2 fiche

La Partie IV.1 du Code criminel fournit un moyen de protéger la vie privée des Canadiens ordinaires en considérant l'interception des communications privées comme une infraction sous réserve des dispositions prévues par la loi. Elle permet aussi à la police d'utiliser, moyennant autorisation judiciaire, une méthode d'investigation pour le dépistage, la prévention et la poursuite d'infractions criminelles graves au Canada et les enquêtes dont elles font l'objet. Ce rapport annuel contient de nouvelles données et informations relatives à l'écoute électronique pour l'année 1987, ainsi que pour les 4 années précédentes (1983-1986). Il présente également des statistiques et analyses sur la surveillance électronique autorisée légalement à l'égard d'infractions pour lesquelles des poursuites peuvent être engagées.

Rapport annuel sur les assurances 1986

Québec : Gouvernement du Québec. L'inspecteur général des assurances. Direction générale des assurances. 1986. xix, 481 p. *CSI 66101.002.* ISSN 0225-8579 ISBN 2-550-17403-8
MICROLOG 88-00384 6 fiche

Ce document contient des informations sur l'identité des assureurs qui détenaient, au 31 décembre 1986, un permis pour exercer au Québec. On trouve également les catégories d'assurances que chacun des assureurs était autorisé à pratiquer de même que les modifications apportées au registre des assureurs. On fournit des données sur la situation financière des assureurs et le résultat de leurs opérations, et des données statistiques sur les primes, les sinistres et les assurances en vigueur. Les informations qui y sont consignées proviennent de deux sources: les états financiers que les assureurs doivent déposer annuellement auprès de l'Inspecteur général et les divers registres qu'il doit tenir en conformité avec la Loi sur les assurances. On traite aussi de la mission et de la structure organisationnelle de la Direction générale des assurances.

Rapport de l'enquête visant à évaluer les mérites de la création d'un office national de commercialisation des pommes de terre

Ottawa : Conseil national de commercialisation des produits agricoles, 1988. viii, 105 p. : ill. *L'éd. anglaise (Report of the inquiry...) : 88-03206/2.* ISBN 0-662-94741-X
MICROLOG 88-03207 2 fiche

Avant de recommander la création d'un office, la Loi exige du CNCPA qu'il effectue un enquête sur les mérites de la création et qu'il s'assure qu'une majorité de producteurs sont favorables à une telle mesure. Ce document examine d'abord la politique et les programmes antérieurs pour résoudre les problèmes de l'industrie. Ensuite, le rapport étudie la production de pommes de terre et sa commercialisation. Finalement, une synthèse et une analyse sont incluses. Le document est complété par les conclusions et les recommandations du Conseil.

Le Rapport de la Commission d'enquête sur certaines questions liées à la bande indienne de Westbank

Commission d'enquête sur certaines questions liées à la bande indienne de Westbank (Canada). Vancouver, B.C. : la Commission, 1988. xx, 585 p. : ill. *L'éd. anglaise (The report of the Commission...) : 88-04080/6.*
ISBN 0-660-92307-6
MICROLOG 88-04081 7 fiche

Deux tâches distinctes ont été confiées à cette Commission d'enquête. La première consistait à enquêter sur certaines controverses soulevées par la gestion de la bande indienne de Westbank et les relations entre celle-ci et le ministère des Affaires indiennes et du Nord entre les années 1975 et 1986. La deuxième tâche de la Commission consitait à passer en revue la Loi sur les Indiens, le texte fondamental qui régit actuellement les affaires indiennes, et à recommander tout changement qu'elle jugeait bon d'apporter à cette Loi, à la gestion des terres et des deniers des Indiens, ou aux politiques et procédures du ministère des Affaires indiennes et du Nord. Ce document contient les résultats de l'enquête ainsi que les recommandations.

Rapport environnemental sur l'industrie du raffinage du pétrole au Canada, 1983-1984

par M.-L. Geadah. Ottawa : Environnement Canada. Service de la protection de l'environnement, 1987. xxiv, 169 p. Bibliogr. (Rapport ; SPE 1/PN/1) *L'éd. anglaise (Environmental status report...): 88-01051/2.* ISBN 0-662-94379-1
MICROLOG 88-01052 2 fiche

Le présent rapport porte sur l'industrie du raffinage du pétrole au Canada, et particulièrement sur ses rejets de résidus gazeux, liquides et solides, ses méthodes de dépollution et ses pratiques d'élimination des déchets. Le cas échéant, les exigences fédérales et provinciales en matière de qualité de l'air, d'effluents et de déchets solides sont présentées. Le rapport contient également une évaluation de degré de conformité de l'industrie aux règlement et directives fédéraux sur les effluents des raffineries de pétrole, pour les années 1983 et 1984. D'autres études environnementales récentes concernant cette industrie font également l'objet d'un examen, dont les polluants à l'état de traces dans les effluents; les méthodes d'analyse des effluents; la contamination des eaux souterraines; la désaffectation d'usines de raffinage et les mesures qui s'y rattachent.

Rapport sur la tarification en assurance automobile, 1987

Québec (Province). Inspecteur général des institutions financières. Québec : l'Inspecteur, 1988. 129 p. : ill. *CSI 66101.003.* ISSN 0837-7006 ISBN 2-550-18414-9
MICROLOG 88-04653 2 fiche

Ce rapport contient une analyse des données statistiques et des manuels de tarifs qui sont remis à L'Inspecteur général des institutions financières par les assureurs qui pratiquent l'assurance automobile au Québec. Cette analyse débute par un aperçu de l'offre d'assurance ainsi que de l'importance des divers intervenants, suivi par une description des règles de classification et des rabais. On traite ensuite de la rentabilité de l'assurance automobile en 1987 et de celle reliée aux différents types de véhicules au cours des dernières années. Finalement, on aborde les perspectives quant à l'evolution des coûts en regard des primes exigées par les assureurs pour les voitures de tourisme.

A Raptor study for the proposed Grandy Brook station to Hope Brook Mine transmission line : environmental impact statement -- Revised

prepared for Newfoundland and Labrador Hydro ; submitted by Fudge, Lane and Associates Limited. St. John's : Newfoundland and Labrador Hydro, 1987. 32 p. : maps.
MICROLOG 88-05738 1 fiche

The proposed Grandy Brook Station to Hope Brook Mine transmission line study area occupies a remote area of south-central Newfoundland. Raptors have been identified as a valued ecosystem component which may be adversely affected by the proposed transmission line. Little information on population numbers and activities in the study area is available. A raptor survey was conducted to determine raptor use of the proposed transmission line route to minimize adverse impacts the development may have on these birds. The primary information source was field data, but also used were information from government officials, recent surveys of raptors in the Hope Brook Mine area, and visual recording and use of taped raptor calls for response from other raptors. An impact assessment and recommended methods of mitigation are also given.

document proposes a medium term outlook for Canada with solutions for previous economic problems and policy constraints with a base case scenario and optimistic and pessimistic case. Also covers tax reform and economic growth. Future trade prospects are discussed in terms of the new global protectionist climate, current barriers to Canada-US trade, tariff barriers, nontariff barriers, agricultural subsidies, manufacturing productivity gains' potential, the impact of bilateral trade on output and employment with a regional and sectoral analysis. Also discussed are global pressures on domestic policies with a look at the new protectionist mood of the US Congress, and specific areas of concern: regional and industrial initiatives, unemployment insurance, health care and cultural issues.

Read-aloud books : an annotated bibliography : grades 4-8

Winnipeg : Manitoba Education, Curriculum Devlopment and Implementation, 1987. 32 p. ISBN 0-7711-0655-6
MICROLOG 88-00677 1 fiche

Research in the areas of language and reading development shows that reading aloud to children promotes growth in language and in reading abilities and instills a further desire to read more thereby, perhaps, leading to a heightened sensitivity to others. This list has been prepared to assist teachers, librarians and parents in their search for educative and entertaining books to read to their children or students. It is suggested that titles should be read aloud to introduce an author or series encouraging students to complete the series.

Real-time implementation of the CHA algorithm using an array processor

by E. Bossé. Ottawa : Government of Canada, Dept. of Communications, Communications Research Centre, 1988. 38 p. : ill. Bibliogr. (CRC report ; no. 1422)
MICROLOG 88-03734 1 fiche

The Correlation Height Analysis (CHA) technique was developed to improve the performance of tracking radars against sea-skimming missile targets, receiving video data from the radar and using signal processing to extract the target altitude, all of which must be done within a certain time. This report presents the results of the real-time implementation of the CHA algorithm on a Floating Point System AP-120B array processor. A brief description is given of the physical phenomena under investigation and the mathematical algorithm used to model them, followed by a description of the AP-120B and a description of a GPIOP interacting with the AP-120B and an external device. An evaluation of the implemented CHA processing time is then presented.

Rearing of chinook salmon *Oncorhynchus tshawytscha* in cold water : Kalum Pilot Hatchery experiences, 1980-83

by D.D. MacKinlay and R.F. Fielden. Vancouver, B.C. : Dept. of Fisheries and Oceans, Salmonid Enhancement Program, 1987. v, 48 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1943) ISSN 0706-6473
MICROLOG 88-01597 1 fiche

Chinook salmon were incubated and reared in a pilot-scale facility to assess the feasibility of using the Dry Creek spring water source as the water supply for a production-scale facility and to begin assessment of release strategies for a Skeena chinook stock. The Kalum Pilot Hatchery was operated for 3 years. The first 2 years assessed the suitability of the site for future development as a hatchery and the last year produced different sizes of juvenile chinook to assist in defining suitable release strategies for northern (particularly Skeena) stocks.

Recent changes in the phytoplankton of the Bay of Quinte : the relative importance of fish and phosphorous

by K.H. Nicholls and D.A. Hurley. Toronto : Ontario Ministry of the Environment, 1987. 37 p. : ill. Bibliogr.
MICROLOG 88-05186 1 fiche

The Bay of Quinte of Lake Ontario became highly eutrophied earlier this century, and for several decades suffered from symptoms of excessive nutrient enrichment, including turbid phytoplankton-rich waters, blooms of blue-green algae, bottom water dissolved oxygen depletion, depreciation of the fish and bottom fauna communities, and loss of rooted macrophyte vegetation. In 1972, a multi-agency investigation of the aquatic ecosystem was initiated. An evaluation of the early response of phytoplankton to phosphorus loading control was based on the first 4 years of the phosphorus control period (1978-81). This report presents a summary of phytoplankton data collected recently (1982-86) with special emphasis on analysis of the relative roles of phosphorus and aquatic food-chain interactions as controlling factors.

Recent changes in waterfowl hunting effort and kill in Canada and the USA

by H. Boyd. Ottawa : Canadian Wildlife Service, 1988. 11 p. : ill. Bibliogr. (Progress notes ; no. 175) *French ed. (Effort de chasse...) on the same fiche.*
MICROLOG 88-03441 1 fiche

Studies of the relative importance of hunting in Canada and the USA, and in determining the size of the reported retrieved kill of ducks and geese in North America showed that in the 1970s and early 1980s the numbers of waterfowl hunters were declining, as was the kill of ducks, whereas the kill of geese was increasing. Changes in hunting activity and success need to be taken into account in planning conservation and regulatory strategies. This note updates the earlier studies by summarizing the amount of waterfowl hunting and the reported kill in four additional hunting seasons (1983-84 to 1986-87) to show whether trends evident in the previous decade have continued and whether other changes are becoming apparent. The data were collected by means of the National Harvest Survey and Species Composition Survey in Canada and the analogous surveys in the USA.

The Reciprocal effects of female labour force participation and fertility

by W.J.J. Yeung. Edmonton : University of Alberta, Dept. of Sociology, 1988. 38 p. : ill. Bibliogr. (Research discussion paper ; no. 53) ISSN 0317-2473
MICROLOG 88-05382 1 fiche

In this study, data drawn from the 1975 U.S. National Fertility Survey are utilized to examine the causal interaction between female employment and fertility for a marital cohort. Reciprocal effects are hypothesized between these two important aspects of life for young couples. Analysis, based on both nonrecursive and dynamic structural equation models, is performed.

Reclamation guidelines for northern Canada

Hardy BBT Limited. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, Land Resources, 1987. iv, 40 p. : ill., maps. Bibliogr. *French ed. (Directives de régénération...) on the same fiche.* ISBN 0-662-15735-4
MICROLOG 88-03806 1 fiche

Handbook written to assist contractors and operators of small-to-medium scale projects address Land Use Permit and Lease Conditions which deal with erosion control and land restoration. The procedures contained herein deal with northern Canada, where, because of the permafrost and short growing season, reclamation techniques can differ from those used in southern Canada. The handbook addresses reclamation situations where relatively simple reclamation techniques can be used. It does not apply to the reclamation areas such as drilling mud sumps and mine tailings ponds where complex soil chemistry problems may require assessment by technical specialists.

Reclamation of sulphur block basepads

by D. Parkinson and S. Leggett. Ottawa Environmental Protection Service, Western and Northern Region, 1988. iv, 50 p. Bibliogr. (Report ; CP(EP)WNR87-88-12)
MICROLOG 88-04777 1 fiche

Alberta produces 95% of Canada's elemental sulphur by converting the hydrogen sulphide present in sour natural gas to elemental sulphur. The majority of sour gas plants in Alberta were built between 1950 and 1970 and stored the recovered elemental sulphur by pouring the molten form into a large block on top of a basepad established directly over the soil and composed also of molten sulphur. Since 1980, few new basepads have been

Recommendations on a preferred site for the ocean disposal of bulky inert materials in Beaufort Sea waters adjacent to the Northwest Territories

Yellowknife, N.W.T. : Environment Canada, Conservation and Protection, Environmental Protection Western and Northern Region, 1987. iii, 24 p. : maps. Bibliogr.
MICROLOG 88-06214 1 fiche

Industrial operators in the Beaufort Sea region have noted a requirement to dispose of inert waste materials generated by hydrocarbon exploration or production activities. In 1982-83, a process was begun to assess the ocean disposal option for inert wastes as part of an overall waste management program, with the goal being the selection of a preferred site for dumping. This report, conducted in August, 1986, provides an overview of the factors considered during the selection process and establishes the rationale for the selection of the Pullen location. The report reviews the environmental, economic, and navigational factors considered during the dumpsite selection process and summarizes the physical, biological, and geochemical data obtained during the 1986 survey.

Recreational clam harvest survey, 1984

by N. Bourne, R.A. Carmichael and B. Bishop-Lowen. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. viii, 61 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1570) ISSN 0706-6457
MICROLOG 88-02922 1 fiche

Invertebrate resources are widely used in the recreational or sports fishery but there are little data. In 1984 a project was undertaken to begin initial sampling of the recreational invertebrate fishery by assessing the recreational harvest of intertidal clams on selected beaches along the southeast coast of Vancouver Island. Ten beaches were sampled during 4 low tide cycles in August and September on both weekdays and weekends. Categories used included temporal distribution, spatial distribution, harvester profile, catch, and overflights by aircraft to estimate number of clam harvesters.

A Recreational climatology of the National Capital Region

by J.M. Masterton and D.W. McNichol. Ottawa : Environment Canada, Atmospheric Environment Service, 1982. viii, 120 p. : ill. Bibliogr. (Climatological studies ; no. 34) *Bilingual (La Climatologie recreative...).* ISBN 0-660-51807-4
MICROLOG 88-03664 2 fiche

The influence of the climate of the National Capital Region (NCR) on patterns of outdoor recreation, including the nature of the activities and the people participating in them, is delineated. Basic relationships between weather and man are reviewed and the several climates existing within the NCR are described and explained. Recreation seasons are defined and the quality of the weather occurring during the seasons is evaluated for several groups of recreational activities. Techniques for incorporating weather and climate into decision-making procedures are outlined for major groups of user: individuals, recreational facility managers, facility developers and planners, and governments involved with long-term, land use planning.

Recreational Fisheries Conference : proceedings, 1986

National Recreational Fisheries Conference (8th : 1986 : Ottawa, Ont.). Ottawa : Dept. of Fisheries and Oceans, Communications Directorate, Information and Publication Branch, 1988. vi, 174 p. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 97) ISSN 0706-6481 ISBN 0-660-12610-9
MICROLOG 88-02602 2 fiche

The Conference was convened in October 1986 to review a draft national statement on recreational fisheries, released for public discussion by fisheries ministers in June 1986. The Conference also sought the views of participants representing federal, provincial and territorial governments, angling associations and recreational fishing industry groups across Canada on actions which can be carried out cooperatively to promote the development of Canada's recreational fisheries. Papers and workshop recommendations focussed on four areas: review of the national statement; resource conservation issues; resource use issues; and industry development and tourism issues. This publication contains papers contributed by the recreational fishing community, remarks by Ministers and summaries of workshop recommendations and conclusions presented at the Conference.

The Red alga *Chondrus crispus stackhouse* (Irish moss) and carrageenans : a review

by T. Chopin. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1986. v, 69 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1514) ISSN 0706-6457
MICROLOG 88-02283 1 fiche

Review bringing up-to-date knowledge on the red alga Chondrus crispus Stackhouse (Irish moss). This seaweed is a very commercially important marine plant along north Atlantic coasts from which polysaccharides, known as carrageenans, are extracted and used frequently in various industries (particularly in agro-foods, pharmaceuticals, and cosmetics) for their specific physical and chemical properties. The review deals on one hand with the biology, ecology, and physiology of the alga. On the other hand, it concerns the architectural organization, eco-physiological role, seasonal variations, and utilization of carrageenans.

Red-backed vole and snowshoe hare populations in relation to four boreal forest community types on Long Point Peninsula, Manitoba, 1981-1987

by W.H. Koonz. Winnipeg : Manitoba Natural Resources, Wildlife Branch, Biological Services, 1988. vi, 30 p. : ill. Bibliogr. (Technical report ; no. 88-04)
MICROLOG 88-04606 1 fiche

The abundance of many furbearers, and perhaps other species, is directly linked to the density of the snowshoe hare, making it the keystone species of the northern boreal forest community. A 10-year cycle in snowshoe hare numbers has been well documented and many authors have struggled with the cycle's mechanics. The objective of this study was to determine the annual and long term variations in red-backed vole and snowshoe hare densities in four boreal forest communities on Long Point Peninsula, Manitoba. The ground cover component and species composition of shrubs, saplings and trees were to be assessed in order to indicate forest productivity, age of stands and relative abundance of food available to small mammals and hares in relation to cover type.

L'actuelle Loi sur le droit d'auteur n'a pas été modifée depuis son entrée en vigueur en 1924. Sa réforme est débattue depuis plusiers années et plusiers rapports sur ce sujet on été déposés. Le 27 mai 1987, le gouvernement fédéral a présenté le projet de loi C-60, première phase de la réforme proposée. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, examine la nature du droit d'auteur et les grandes lignes de la loi actuelle et aborde certaines questions concernant la réforme de ce droit dans 2 domaines de la technologie moderne: la photocopie et l'enregistrement audio-visuel à domicile.

La Réforme des institutions financières au Québec : objectifs, principes directeurs et plan d'action

Québec (Province). Ministre délégué aux finances et à la privatisation. Québec Cabinet du ministère délégué aux finances et à la privatisation, 1987. 128 p. ISBN 2-550-17857-2
MICROLOG 88-01318 2 fiche

Le décloisonnement des institutions financières consiste à modifier la séparation des fonctions qui avaient été identifiées au siècle dernier pour répondre à des besoins spécifiques comme le financement industriel et commercial, l'administration des fiducies et la protection d'assurance. Ce document d'analyse est divisé en 4 parties: une partie descriptive, un examen des tensions et mutations dans le secteur financier, une présentation des objectifs et des principes directeurs devant encadrer la réforme des institutions financières, et finalement, un exposé du plan d'action envisagé.

La Réforme du régime d'impôt sur les sociétés

par L. Desbois. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 24 p. Bibliogr. (Etude générale ; BP-165F) *L'éd. anglaise (Reforme of the corporate...) sur la même fiche.* ISBN 0-660-92098-0
MICROLOG 88-01826 1 fiche

En mai 1985, le gouvernement canadien a publié un document de travail sur le régime d'impôt des sociétés, dans lequel il proposait d'élargir l'assiette fiscale et de réduire les taux d'imposition. Le but poursuivi était de simplifier le régime et d'encourager la prise de décisions en fonction du marché et non plus du système fiscal. Dans ce bulletin préparé à l'intention des parlementaires à Ottawa, on étudie les problèmes que pose le régime actuel d'impôt sur les sociétés et les propositions de changement, ainsi que le traitement fiscal spécial dont jouissent actuellement certains secteurs (agriculture, fabrication et transformation, ressources naturelles et banques).

Réforme fiscale 1987

par M.H. Wilson. Ottawa : le Ministère, 1987. 10, 9 p. *Bilingue (Tax reform 1987...).*
MICROLOG 88-01275 1 fiche

En juin 1987, le ministre des Finances du Canada a proposé un ensemble complet de réformes au régime fiscal. Six mois plus tard, le ministre déposait devant les Communes des mesures visant à mettre en oeuvre ces changements. Ce document présente le texte du discours présenté à cette occasion à la Chambre des communes. Les mesures ont trait à l'impôt des particuliers, à l'impôt des sociétés, à l'impôt des sociétés rentables, à l'équilibre financier et à la réforme de la taxe de vente.

Regional services centres assessment

Prince Edward Island. Charlottetown : Prince Edward Island, 1987. ii, 147 p. : ill.
MICROLOG 88-01857 2 fiche

As part of a general assessment of the Regional Service Centre's enhancement of the public's access to government services, this study examines the level of program decentralization to regions, the level of staff relocation to the region of service delivery (and the converse effect on goals of decentralization), and evaluates the effect of decentralization on the quality of service of the public. Identifies decentralized services outside the Centres' jurisdiction to determine benefits resulting from an integration with the Centres. Assesses the extent of coordination of all Provincial services and the potential scope for expanding Centres' role as a catalyst for economic development. This examination is done in the context of profiling existing government services available within each region and a profile of government positions indicating the extent of workers residing within each region of service delivery.

Regional study of coal mine waste dumps in British Columbia, stage II

Golder Associates. Vancouver, B.C. : Golder Associates, 1987. 2 v. : ill. *CANMET contract: 69188-01-SQ.*
MICROLOG 88-01570 4 fiche

This report presents the results of a study of the behaviour of waste rock dumps associated with open pit coal mining operations in the Rocky Mountain region of British Columbia and Alberta. The waste rock dumps comprise siltstones, sandstones, mudstones and shales from the overburden and interseam beds, produced at the rate of about 150 million tonnes per year. The study reviewed experience with past waste dumps and analyzed past events for patterns, correlations and unusual circumstances to review current practice for operating safety and efficiency, to refine understanding of mechanisms of deformation and failure, based on observation and technical analyses, and prepared improved predictive tools for prospective situations.

The Regulation of financial institutions : recent proposals for reform -- Reviewed

by B. Zafiriou. Ottawa : Library of Parliament, Research Branch, 1987. 18 p. Bibliogr. (Current issue review ; 86-24E) *French ed. (La réglementation des...) on the same fiche.* ISBN 0-660-12565-X
MICROLOG 88-00900 1 fiche

Banks, trust and mortgage loan companies, insurers, and investment dealers used to address different needs of the financial marketplace. This report documents the technological and market force changes that have broken down previous functional and geographic borders. Discusses issues such as the effect of Automated Teller Machines (ATM) to the increasing trend in larger institutions to expand globally. Comments on how the regulatory structure currently guiding financial markets predates these developments and discusses the weaknesses of the current system. Considers the two high profile failures of two relatively small banks and the Canada Trust takeover by Genstar with its controversy of mixing financial and non-financial enterprises. Discusses proposals for reform only at the federal level.

Remote and automatic control systems for longwall mining : a review report on potential applications for the Sydney coalfield

Associated Mining Consultants. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. 2 v. : ill. *CANMET contract: 79017-01-SQ*
MICROLOG 88-05979 5 fiche

In longwall mining, production of coal takes place along a continuous length of face, or wall, between two access entries. Longwall mining machinery manufacturers and research organizations were contacted throughout Europe and North America for information, leading equipment suppliers were visited, and extensive discussions were held with British Coal's specialists. The report describes the equipment used on longwall faces and their methods of operation, discusses the control of the coal getting machines and support systems, outlines methods of data transmission, appraises the benefits of control systems, and describes how the individual equipment systems can be combined to give a comprehensive face package. The existing conditions and practices in the Sydney Coalfield were documented and the potential for further automation assessed.

Répercussions d'un changement climatique sur l'industrie du ski alpin au Québec

préparé pour le Sommaire du changement climatique, Service de l'environnement atmosphérique ; présenté par Lamothe & Périard avec la collaboration de Joseph Litynski. Ottawa : Environnement Canada, 1988. 12, 12 p. (Sommaire du changement climatique ; SCC 88-03) *Bilingue (Implications of climate...). CSI 22138.222.* ISSN 0835-3980 ISBN 0-662-55770-0
MICROLOG 88-02892 1 fiche

Il est de plus en plus admis que l'accroissement des "gaz de serre" dans l'atmosphère entraînera une hausse des températures moyennes de l'ordre de 1.5 à 4.5 C dans les prochaines décennies. Cette étude avait pour but d'évaluer la sensibilité du ski alpin à cet éventuel changement climatique. La première partie du travail a consisté à identifier les critères météorologiques pertinents à la définition d'une journée skiable. En utilisant les conditions climatiques actuelles et celles prévues selon les scénarios de changement climatique, ces critères ont été réutilisés pour estimer les impacts d'un climat plus chaud sur l'industrie du ski et pour en évaluer grossièrement les retombées socio-économiques.

Répercussions de la Loi sur la Convention concernant les oiseaux migrateurs et de la phénologie sur la chasse sportive à la sauvagine dans le nord-ouest du Canada

par F.G. Cooch. Ottawa : Service canadien de la faune, 1988. 13, 13 p. : ill., cartes géogr. Bibliogr. (Cahiers de biologie ; no 173)
MICROLOG 88-02600 1 fiche

Le document examine les répercussions de la Loi sur la Convention concernant les oiseaux migrateurs et de la phénologie sur la chasse sportive à la sauvagine dans le nord-ouest du Canada. Au Yukon et dans le district de MacKenzie, la saison de chasse est brève et l'hiver précoce; en revanche, dans ces régions, les limites de prises quotidiennes sont élevées et les chasseurs ne se font guère concurrence, ce qui compense largement. Présente les résultats, ainsi qu'une analyse.

Répercussions du changement climatique sur l'agriculture dans les provinces des prairies : sommaire de rapports du département d'économie agricole

par L.M. Arthur. Ottawa : Environnement Canada, 1988. 13, 12 p. : ill. (Sommaire du changement climatique ; SCC 88-01) *Bilingue (The implication of climate...).* ISSN 0835-3980 ISBN 0-662-55621-6
MICROLOG 88-03313 1 fiche

L'atmosphère terrestre subit de grands changements dans sa composition à l'échelle mondiale. Les activités humaines, comme le déboisement, l'utilisation des combustibles fossiles et, même, les opérations agricoles ont nettement accru la quantité de gaz carbonique et d'autres "gaz de serre" de l'atmosphère. En 1978, le Canada a établi un Programme climatologique canadien ayant entre autres pour but de réaliser des études pour évaluer et déterminer les effets sociaux et économiques éventuels du réchauffement climatique. Ce rapport donne les résultats sommaires de 3 phases d'une étude destinée à déterminer l'effet probable du changement climatique sur l'agriculture des provinces des Prairies.

Répertoire : programmes et services du gouvernement fédéral, 1988 -- 9e éd.

Ottawa : Approvisionnements et services Canada, 1988. 594 p. *L'éd. anglaise (Index to federal...) : 88-05466/6.* ISSN 0824-3662 ISBN 0-660-92287-8
MICROLOG 88-05467 7 fiche

Ce répertoire renferme des renseignements sur 178 ministères, agences et sociétés de la Couronne. Il n'inclut cependant pas certains organismes, tel le Bureau du Conseil privé, dont les activités atteignent le public par le biais d'autres ministères. Par contre, certains autres organismes inclus dans ce répertoire n'offrent pas nécessairement un service direct au public mais sont engagés dans des activités qui touchent le public d'une façon ou d'une autre. La 1re partie donne la description des divers programmes et services du gouvernement fédéral tandis que la 2e partie présente l'adresse et, dans la mesure du possible, le numéro de téléphone des bureaux fédéraux desservant le public dans toutes les régions du Canada.

Réponse au huitième rapport du Comité permanent de l'energie, des mines et des ressources : le pétrole, rareté ou sécurité

Canada. Energie, mines et ressources Canada. Ottawa : le Ministère, 1988. 28, 25 p. *Bilingue (Resonse to the ..).*
MICROLOG 88-03434 1 fiche

Le rapport du Comité permanent déposé en septembre 1987 contenait une analyse détaillée de la conjoncture énergétique mondiale au cours du dernier siècle, plus particulièrement du secteur pétrolier. La réponse du gouvernement présente, en premier lieu, un court résumé du rapport ainsi qu'un aperçu de la politique énergétique canadienne. Les sections suivantes décrivent plus en détail les répercussions de la politique actuelle sur des questions particulières soulevées par le Comité: la sécurité des approvisionnements, les mégaprojets ainsi que les économies d'énergie et les énergies de remplacement. Fournit la position précise du gouvernement vis-à-vis chacune des 12 recommandations du Comité.

Report : a study of the economic availability of wood residues for fuel in New Brunswick

Fredericton : Canada/New Brunswick Conservation and Alternative Energy Agreement, 1987. ii, 80 p. Bibliogr. *CSI 45124.203*
MICROLOG 88-04766 1 fiche

Investigation into the production and utilization of wood residues, conducted the summer of 1987. Wood residues are classified as either 'harvest' or 'processing' residues and are defined as biomass material which remains after the production of the primary product or products. Detailed data on residue production by primary wood producers and by wood processing plants was assembled and catalogued in a computer program which is included in the report. Detailed data on the users of New Brunswick residue, both within the province and in adjacent provinces and the United States, is also included. The report also includes calculations of the heating value of various types of residue fuels and the development of costs for processing and transportation of wood residues from their source to the point of utilization.

Report : Public Inquiries Act

Prince Edward Island. Commission of Inquiry on Regional Administrative School Unit 3. Charlottetown : The Commission, 1987. 85 p.
MICROLOG 88-01863 2 fiche

Inquiry and report on the circumstances leading to the erosion of effective relationships among the parties in the education process of this Unit. This situation commenced with the resignation of the superintendent, Dr. Garland, for reasons suppressed by the Board initially and then cited in the media as 'personal reasons' when in fact he specifically mentioned that his resignation was related to the matters of principle as to the governing and administration of the Unit. Makes recommendations as to how the relationships may be re-established and ways in which the respective responsibilities and roles of all parties in the education process may be better defined.

Report and recommendations regarding the highway smoke hazard of fall, 1987

Edmonton : Alberta Transportation and Utilities, 1988. 15 p. : map.
MICROLOG 88-02760 1 fiche

The disposal of brush or peat has historically been undertaken by knocking down, piling and burning. Depending on weather conditions during the fall and winter, burning adjacent to the primary highway systems may result in a smoke hazard and lead to closing of the highway temporarily, particularly if coupled with fog. The smoke/fog experienced in the fall of 1987 was a more significant problem than before. This report addresses the situation, including legislation governing burning adjacent to highways, and recommends measures that will accomodate land clearing methods that are not counter to the safety of the travelling public.

MICROLOG 88-02934 2 fiche

Canada and other member countries of the Customs Cooperation Council are adopting the Harmonized Commodity Description and Coding System (HS) for purposes of customs and commodity classification. HS is based on inherent physical characteristics of goods as opposed to classification by their use. This is the second report of the Tariff Board on Phase V of Reference 163. Phase V examines the conversion of the statutory end-use items of the present Customs Tariff. Reviews the accuracy of the transposition of statutory concessionary tariff items (end-use items) consigned to proposed Schedule II of the revised HS-based Customs Tariff, while verifying the Most-Favoured-Nation rates of duty vis-a-vis the existing rates for such items of the Customs Tariff. Identifies possible alternatives to Schedule II for the maintenance of concessionary tariff items.

Report of inquiry into motor vehicle accident compensation in Ontario

Toronto : Ministry of the Attorney General ; Ministry of Financial Institutions, 1988. 2 v. : ill. Bibliogr. *Contents: Vol. 1 : Report -- vol. 2 : Research studies and vol. 1 appendices. Bilingual summary (68, 79 p.) laid in. CSI 55122.200.* ISBN 0-7729-3206-9
MICROLOG 88-04911 20 fiche

Report on the tort system compensation for injury by automobile accident and the consequences of the implementation of a no-fault automobile accident. Two major areas of concern dominated the study: no fault automobile insurance amd public automobile insurance. Both topics are discussed with reference to comparative data from other jurisdictions and conclusions are drawn as to their desirability for Ontario. The other related major topic is an evaluation of tort liability as the foundation for motor vehicle accident compensation. The second volume of the report contains research studies used in the inquiry.

Report of the Advisory Committee on Commercial River Rafting

British Columbia. Advisory Committee on Commercial River Rafting. Victoria : The Committee, 1988. iii, 122 p. ISBN 0-7726-0744-3
MICROLOG 88-02097 2 fiche

Report of an advisory commission set up in 1987 in response to a number of fatal rafting accidents. The report covers the history of commercial river rafting in the province, with a brief review of the origin of the sport and its practice internationally. Issues reviewed include: guide qualification and training requirements; regulation by the provincial or federal governments; effective enforcement of offences and tougher penalties to promote the proper application of all regulations and permit requirements; and fees for permits. Included also are a list of written submissions, rafting companies contacted, B.C. agencies/organizations contacted, legal contacts, and contacts made outside the province.

The Report of the Colleges Collective Bargaining Commission

Ontario. Colleges Collective Bargaining Commission. Toronto : The Commission, 1988. ix, 317 p. Bibliogr.
MICROLOG 88-04896 4 fiche

Publication presents an analysis of the effectiveness of the current collective bargaining process to protect the rights of employees to just and equitable remuneration and conditions of employment, and the ability of the province to pay. Specific issues investigated include the way negotiations between unionized staff and the Ontario Council of Regents should be changed to facilitate the operation of the collective bargaining process. Discusses who should be the parties to the negotiations and in what manner the negotiation process should be carried out, whether restrictions should be placed by legislation on issues that may be included in agreements, and whether restrictions should be placed in legislation on eligibility for membership in the union.

Report of the Joint Committee on Trustee Distribution to the Minister of Education

Ontario. Joint Committee on Trustee Distribution. Toronto : Ontario Ministry of Education, 1987. iv, 30 p.
MICROLOG 88-01236 1 fiche

When county and district school boards were brought into effect in 1969, trustee appointment was made dependent on equalized residential and farm assessment of the constituent municipalities and wards, resulting in representation by wealth rather than by population distribution. Subsequent studies have examined the basic issues related to the question of what or who school board trustees should represent, identifying alternative methods for the allocation of representation and data bases needed to apportion trustee positions on school boards. These are reviewed in this report along with reports of meeting held by five presidents of provincial trustees' organizations which sought to make recommendations for legislative change, establish a timetable for implementation and make recommendations relative to communication of these changes.

Report of the Task Force on Alcohol and Drug Abuse in the Workplace

Task Force on Alcohol and Drug Abuse in the Workplace (B.C.). Victoria : Ministry of Health ; Business Council of British Columbia ; Workers Compensation Board of British Columbia, 1987. iv, 78 p. : ill. *At head of title : A search for solutions.*
MICROLOG 88-01057 1 fiche

Drug impairment in the workplace cannot be considered in isolation from the situation in the community at large with the critical problem of alcohol and drug abuse throughout British Columbia resulting in safety hazards and lost productivity. This report compiles information about the extent and effect on performance of alcohol and other drugs in the workplace to gauge their negative impact on occupational safety and health. Makes recommendations as a result of hearings held in April and May 1987 in 12 communities where 72 oral and 61 written submissions were tabled.

Report of the Task Force on Inflation Protection for Employment Pension Plans

Ontario. Task Force on Inflation Protection for Employment Pension Plans. Toronto : The Task Force, 1988. xi, 292 p. : ill. Bibliogr. *French ed. (Rapport du Groupe...) : 88-05434/4. CSI 56233.200.* ISBN 0-7729-3578-5
MICROLOG 88-04909 4 fiche

The purpose of the Task Force was to determine the most appropriate formula and phase-in procedures for inflation protection of employment pension plans. The main recommendation is that a consumer price index linked formula should be selected as the legislated minimum standard for inflation protection. Other recommendations deal with frequency of adjustments, the sale of indexed bonds, employer-sponsored group RRSPs, multi-employer pension plans, and withdrawal of surplus funds by plan sponsors

Report of the Task Force on the Implementation of Midwifery in Ontario, 1987 : executive summary & summary of recommendations

Task Force on the Implementation of Midwifery in Ontario. Ottawa : The Task Force, 1987. 18 p. *French ed. (Synthèse et sommaire des...) on the same fiche. Main report : 88-01144/5.* ISBN 0-7729-3134-8
MICROLOG 88-01529 1 fiche

Interest in midwifery has been growing in Ontario due to negative attitudes towards the predominantly male medical profession and the belief that midwives provide a more holistic approach than the medical profession. This summary overviews the process of establishing the Task Force and its work, through a review of the current system of reproductive care and makes recommendations for integration of a midwifery system. Sets out guiding principles, scope of practice and qualifications.

MICROLOG 88-01144 5 fiche

The Task Force gathered information on the practice of midwifery both inside and outside Canada, how Ontario midwives and other health care providers envision the integration of midwifery care into the health care system, and how the public perceives its needs. Extensive consultations were held with organizations representing physicians, nurses, hospitals, health sciences educators, and midwives, and public hearings were held in Toronto, Ottawa, Hamilton, Windsor, Kingston, London, Thunder Bay, Dryden and Sudbury. Two surveys were commissioned and midwifery schools, practices and regulatory bodies were visited. In addition, an extensive literature review was conducted. A summary of submissions is also included.

Report of the Task Force on the Surveying and Mapping Industry in Canada

prepared for the Department of Regional Industrial Expansion ; by the Canadian Institute of Surveying. Ottawa : Government of Canada, Regional Industrial Expansion, 1985. xiv, 124 p. Bibliogr.
MICROLOG 88-00216 2 fiche

The surveying and mapping industry encompasses the disciplines of land surveying, geodetic surveying, photogrammetry, hydrography, cartography, engineering surveying, mining surveying, geophysical surveying, remote sensing and spatial information management. The study determined the industry's strengths and weaknesses, and described the domestic and international constraints and opportunities it faces, including perspective, prospects, interactions, and issues. A statistical base was developed through the use of questionnaires sent to all surveying and mapping firms in Canada, all government agencies involved in surveying and mapping, and to Crown corporations and large public companies with a direct or indirect interest in surveying and mapping. Written submissions and interviews were also used in the development of the study recommendations.

A Report on 1983 Lake Superior water quality surveillance cruises

Ottawa : Water Quality Branch, Ontario Region, 1985. 35 p. : ill., maps. Bibliogr.
MICROLOG 88-04713 1 fiche

After the signing of the 1972 Great Lakes Water Quality Agreement, the International Joint Commission (IJC) was requested to carry out a comprehensive study on the pollution problems of Lake Superior, Lake Huron and the St. Marys River. Subsequently, the IJC appointed the Upper Lakes Reference Group to undertake appropriate studies on the Upper Great Lakes, the findings of which were tabled in 1976. The renewal of the Great Lakes Water Quality Agreement in 1978 again stressed the need for surveillance activities in the open lakes. In 1983 the Department of the Environment and the United States Environmental Protection Agency implemented the open lake surveillance plan for Lake Superior. This is a preliminary report on the nutrient and major ion chemistry of Lake Superior.

Report on fraudulent conveyances and preferences

Victoria : Law Reform Commission of British Columbia, 1988. vii, 180 p. Bibliogr. ISBN 0-7718-8631-4
MICROLOG 88-03815 3 fiche

A person who is unable to pay his debts in full, or who is faced with satisfying a substantial obligation, is often tempted to shield or hide his assets, in order to pay some creditors in preference to others, or convey his property to a friend or relation and put it beyond the reach of persons who have claims against him. Problems of this kind have been recognized by law and, in British Columbia, are addressed by both provincial legislation (the Fraudulent Preference Act and the Fraudulent Conveyance Act) and the federal Bankruptcy Act. Due to the overlapping nature of these legislative remedies, this report sets recommendations to repeal both provincial acts and introduce new legislation under the Court Order Enforcement Act.

Report on Microtox toxicity screening tests on Ottawa River water and suspended sediment samples collected near Lemieux Island, 1985

by K.K. Kwan, B.J. Dutka and R.C. McCrea. Ottawa : Environment Canada, National Water Research Institute, 1988. 9 p. : ill. Bibliogr. (AMD report ; no. 135-AMD-5-86-KKK)
MICROLOG 88-04727 1 fiche

Study carried out to obtain baseline information on toxicant loading and distribution in the Ottawa River and to evaluate the applicability of the Microtox screening test and water elution procedures to test for toxicants in suspended sediments. A total of 56 water samples were collected on a weekly basis from January to December 1985. Water samples were collected from a polyethylene multi-intake system which was secured to a stainless steel frame, 50 metres from shore and 1 metre from the river bottom north of the Lemieux Island. At each collection time, the system was flushed for a minimum of an hour before microbiological water samples were collected. In addition to the weekly water samples, centrifuged water and suspended sediment samples were also collected in November and December.

Report on the Court Order Interest Act

Law Reform Commission of British Columbia. Victoria : The Commission, 1987. 139 p. *LRC 90.* ISBN 0-7718-8561-X
MICROLOG 88-00569 2 fiche

In 1973 the Law Reform Commission made recommendations for legislation to provide for prejudgment interest. These were implemented in 1974 by the Court Order Interest Act. Twelve years of experience and jurisprudence has highlighted areas of difficulty and the nature of civil litigation has changed dramatically. Recent economic developments have led to a sharpened perception of issues such as the relationship between interest and inflation rates and problems arising from rate volatility. A much more sophisticated understanding of the economic role of prejudgment interest has emerged. This report looks at judgment interest, in the light of these events and a number of recommendations are made aimed at simplifying and rationalizing this area of the law.

Report on the in-tank mixing study

by A.M. Godon and J.H. Milgram. Ottawa : Environment Canada, Environmental Protection Directorate, 1988. 83 p. : ill. Bibliogr. (Report : EE-100)
MICROLOG 88-03016 1 fiche

Oil tankers operating in the Arctic could suffer long delays between damage of the tanker and arrival of help. Installation of gas bubble plume systems in the compartments of oil tankers was suggested as a method which the tanker crew could use to mix treating agents into the oil in the damaged compartments, with dispersants being the most likely treating agent. This report investigates the feasibility of of in-tank mixing in such a situation. The report also compares three arrangements of the plume: a plume along one wall of the tank, along two coincident walls, and a 'T' arrangement. To study the mixing, scale model tests were carried out in a cubical and in a rectangular tank. Water is used as the test fluid to be mixed. Flouroscein dye in water is added to the tank fluid in place of dispersant to trace the mixing.

Report on the Law of Mortgages

Ontario Law Reform Commission. Toronto . Ontario Ministry of the Attorney General, 1987. xiii, 401 p. ISBN 0-7729-2320-5
MICROLOG 88-01232 5 fiche

The Commission set out to review the law of property with particular emphasis on the law relating to interests in land. This report describes various types of land security interest prevalent in Ontario, and considers the creation and nature of security agreements. It looks at priorities among lenders and examines the borrower's right to prepay loans and to receive a discharge of the security agreement upon satisfaction of the loan obligation. It addresses issues relating to possession of the secured property including borrower entitlement to retain possesion after default and other miscellaneous issues raised by the Rules of

Report on the Prince Edward Island Program and Expenditure Review Commission

Prince Edward Island Program and Expenditure Review Commission. Charlottetown : The Commission, 1987. 100 p.
MICROLOG 88-05201 2 fiche

For the past 13 years, expenditure increases have been approximately 2% higher than revenue increases in the province. It is projected that continuing on this course would result in deficits in the area of $60,000,000 to $70,000,000 per annum before the end of this government term. This document presents the results of the Commission's investigation and review of departments by means of a questionnaire process.

Report on the St. Boniface General Hospital/Manitoba health community-based management of pregnancy-induced hypertension pilot project

Manitoba. Manitoba Health. Manitoba Health. Winnipeg : The Ministry, 1987. vii, 117 p. Bibliogr.
MICROLOG 88-01026 3 fiche

The St. Boniface General Hospital in cooperation with the Manitoba Health Services Commission and Winnipeg Region of Manitoba Health developed a home care program for women with mild, non-proteinuric pregnancy-induced hypertension, referred by obstetricians, to be supervised on a daily basis by specially trained public health nurses. This home care program was the 2nd phase of a pilot program designed to demonstrate the feasibility of providing community-based, rather than hospital-based, perinatal care. Over the 15 months of the project, which began in April 1985, 79 patients were instructed in self-monitoring of blood pressure, weight, urinalysis, fetal movement count, and bed rest requirements. The public health nurse assessed maternal and fetal status and well-being daily, and provided supervision, teaching, case coordination, and referral to other services as required.

Report to CANMET : development of an outburst model for the Sydney Coalfield, Cape Breton, Nova Scotia

Mississauga, Ont. : Golder Associates, 1987. xiii, 302 p. : ill. *CANMET contract: 69025-01-SQ.*
MICROLOG 88-05006 5 fiche

A research study was undertaken to develop a mechanistic model for the initiation of rock - gas outbursts experienced in no. 26 colliery of the Sydney Coalfield. The research program included a worldwide review of similar phenomenon and of the published case histories and mechanistic models for the occurences of outbursts; and a field program to measure the effects of blasting and analyses of selected outburst events using numerical modelling techniques to develop the most probable mechanism for the outburst initiation. An experimental blast monitoring program was undertaken in a development heading in the Lingan Mine to monitor the dynamic and static stress changes during typical shotfiring rounds in roadway development. A series of elastic stress analyses were carried out to study the effects of location and thickness of the outburst-prone sandstone layer; the in situ stresses; the relative rock mass stiffness of the sandstone and the adjacent siltstone and the position of the extracted longwall panel. The combined effects of static stresses, pore gas pressure and blast induced dynamic stresses were studied by considering the effective principal stresses and Griffith's criterion of fracture initiation.

Reports of working groups : the working group on early childhood education; the working group on the parents' role; the working group on business and education; the student task force

Victoria : British Columbia Royal Commission on Education, 1988. i, 64 p. (Commissioned papers ; v. 7) ISSN 0840-5069 ISBN 0-7726-0845-8
MICROLOG 88-05800 1 fiche

This document contains the recommendations of the four working groups which have participated to the B.C. Royal Commission on education. The first paper identifies issues in the area of pre-school care and early childhood education in relation to the experience and development of the child from birth to school entry. The second document examines the means by which the role of parents can be recognized by other partners in education. The members of the working group on business and education directed their comments and recommendations toward two aspects of the education system: expectations of those working and learning within it, and cooperative business/education projects. Finally, the fourth section represents the concerns of a selected group of Grade 10, 11 and 12 students on six different areas: student-personnel concerns, rights and responsibilities, counselling, graduation, curriculum, and miscellaneous concerns.

Research on potential cover materials for potash tailings

by the University of Saskatchewan ; for Potash corporation of Saskatchewan and CANMET. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. viii, 86 p. Bibliogr. *CANMET contract: 79220-01-SQ.*
MICROLOG 88-05993 1 fiche

Study investigates potential cover materials for use in sealing potash tailings. Precipitation falling on potash tailings dissolves the tailings, producing brine, one of the industry's most serious problems. The rate of brine generation is increasing, and environmental concerns are growing. Therefore, the industry is interested in preventing brine generation by sealing the surface of potash tailings. One method of minimizing this cost is to use materials readily available at the mines, such as the insoluble fraction (slimes) of the waste potash tailings.

Residential renovation overview : summary report

Ottawa : Canada Mortgage and Housing Corporation, 1988. iv, 31, v, 34 p. *Bilingual (Aperçu de la rénovation...).*
MICROLOG 88-06469 1 fiche

CMHC has been actively involved in the renovation field for many years. To address the lack of information on the renovation market, CMHC conducted national surveys of homeowners, landlords, tennants, and renovation firms in 1986. The purpose of this study is to communicate the findings of the these surveys and their implications for the renovation market. The report provides a comprehensive review of residential renovation activity in Canada. It examines the physical condition of the low-rise housing stock and the characteristics and behaviour of firms and property owners participating in the renovation market. Evidence on the presence or absence of market problems is assessed in order to identify areas where remedial action may be appropriate.

Residential wood heating : a homeowner's guide

by M. Masse. Ottawa : Energy, Mines and Resources Canada, 1987. 34, 37 p. : ill. *Bilingual (Le chauffage au bois...).* ISBN 0-662-15415-0
MICROLOG 88-02854 1 fiche

For many people, heating with wood reduces bills for expensive fuel oil, electricity, propane or natural gas. This booklet describes types of wood-heating equipment available and how to install and operate a wood-heating system. Describes buying guidelines, installation procedures, firewood availability and costs, chimneys and vents, connecting wood-burning appliances to the chimney along with operating, inspecting and cleaning guidelines.

Les Résidents du C.R.C. Radisson : qualité de leur adaptation sociale ultérieure et profil prédictif sur la base des données d'entrée et de sortie : rapport final

par M. Bossé. Trois-Rivières, Québec : Université du Québec à Trois-Rivières, 1986. 133 p. : ill. Bibliogr. *En tête du titre: Recherche Radisson : évaluation de programme*
MICROLOG 88-02725 2 fiche

Depuis le début des années 1960, plusieurs chercheurs ont entrepris d'évaluer l'impact et l'efficacité réelle des maisons de transition. La présente recherche a duré 5 ans pendant lesquelles les chercheurs ont isolé, parmi les données disponibles au moment de l'admission, des prédicteurs d'adaptation au programme d'un centre résidentiel, la Maison Radisson de Trois-Rivières. Les éléments suivants sont inclus dans le rapport de recherche: le contexte théorique, la méthodologie et l'analyse, ainsi que l'interprétation des résultats.

Résidus d'insecticides dans l'air de certaines municipalités suite aux pulvérisations aériennes contre la tordeuse des bourgeons de l'épinette, en 1986

par J. Dugal et L. Major. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Service des études environnementales, 1987. 26 p. Bibliogr. ISBN 2-550-1765-2
MICROLOG 88-00623 1 fiche

Le ministère de l'Energie et des Ressources a réalisé en 1986 sa 17e opération de pulvérisations aériennes contre la tordeuse des bourgeons de l'épinette. Dans le cadre du suivi environnemental relié, une étude servant à évaluer les concentrations d'insecticides chimique (fénitrothion) et biologique (Bacillus thuringiensis) dans l'air de municipalités localisées à proximité des secteurs traités, a été effectuée. Au total, 141 échantillons d'une durée de 24 heures ont été prélevés entre le 24 mai et le 8 juillet. Ce rapport présente et analyse les résultats.

Resolving conflict : a case study : a discussion paper prepared for the Alberta Conservation Strategy project

by J. Lilley. Edmonton : Environment Council of Alberta, 1988. 21 p. Bibliogr.
MICROLOG 88-02832 1 fiche

In attempting to satisfy all resource users on a sustainable basis, there undoubtedly will be conflicts. A premise of the Alberta Conservation Strategy is that resource users have a sincere interest in finding solutions to existing and impending resource development conflicts. The discussion in this paper is intended to increase public awareness of the potential of alternative conflict resolution techniques to resolve these conflicts. The example used is from the energy industry, but as the paper points out, the principles underlying the successful resolution of the conflict can be applied to achieve win-win results in a broad range of policy and project decisions.

Response characteristics of dual MOSFET gamma-ray sensors produced by Mitel Corporation

by S. McGowan and R.A. Gravelle. Ottawa Defense Research Establishment Ottawa, 1987. iii, 26 p. (Report ; no. 971)
MICROLOG 88-01326 1 fiche

Recent development of the MOSFET gamma-radiation sensor has results in a sensor capable of measuring doses as low as 1 cGy. This sensor is being used in the individual dosimeter under development for the Canadian Forces. To obtain an accurate reading of the gamma-ray dose with the proposed Canadian Forces dosimeter, these sensors must be reproducible with predictable sensitivity. This report investigates some of the packaging parameters which affect the sensitivity of the MOSFET sensors fabricated by Mitel Corp. and packaged using different procedures by two other commercial firms.

Response of containerized black spruce and jack pine seedlings to fertilization rate and growing medium

by S.J. Colombo and W.A. Smith. Toronto : Ministry of Natural Resources, 1988. i, 15 p. : ill. Bibliogr. (Forest research report : no. 116) ISSN 0301-3924 ISBN 0-7729-3572-6
MICROLOG 88-04322 1 fiche

Despite the presence of handbooks for the production of containerized tree seedlings, the determination of appropriate rates of fertilization remains an inexact science, since the rate and timing of fertilization can be affected by factors such as local variation in water chemistry, growing media, and the environment in each greenhouse. This report presents the results of semi-operational trial of fertilizer rates and growing media to assess for black spruce and jack pine container seedlings: the range of fertilizer concentrations and seedling nutrient contents resulting in best seedling growth; and the effect of fertilization on bud development and fall freezing damage. Black spruce and jack pine seedlings were grown at the Swastika Tree Nursery according to operational greenhouse practices, at 0, 1 3, 1, 3 or 9X the operational fertilization rates for each species in three growing media.

Results of shear testing on Paradise River specimens

by R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. v, 46 p. : ill. (Report ; MRL 88-31(TR))
MICROLOG 88-05523 1 fiche

Direct shear tests were performed on four intact banded tuff specimens obtained from the Paradise River hydro-electric project by ShawMont Newfoundland Ltd. The specimens were initially sheared along kink bands running perpendicular to the schistosity at normal loads of 200, 500, 1000 and 2000 kPa. Having sheared an intact specimen at its respective normal stress, the resulting shear plane was subjected to a normal stress of 200 kPa and sheared in the opposite direction. This was subsequently repeated for normal stresses of 500, 1000 and 2000 kPa.

Results of X-ray diffraction analyses of mineral species in low temperature coal ash

David E. Pearson & Associates Ltd.. Victoria : David E. Pearson & Associates Ltd., 1987. 8 p. *CANMET contract: 5902/01-SQ*
MICROLOG 88-01563 1 fiche

Final report describing the semi-quantitative mineralogical make-up of low-temperature ash samples, as determined by X-ray diffraction analysis isolated by radio-frequency plasma-ashing techniques and provided by CANMET. The X-ray diffraction analyses were carried out on a Phillips Noreico diffractometer using copper K radiation, operating at a power level of 40 KV and a current of 25 mA. The samples were scanned and the X-ray diffractograms analysed. All peaks were measured and their corresponding d-values and surfaces were determined. Individual mineral species were identified using the characteristic reflections as described by ASTM.

Résumé des rapports des travaux faits sous contrat en 1983-1984 dans le cadre du Programme de recherche et de développement en génie rural (RDGR)

Ottawa : Agriculture Canada, Direction générale de la recherche, 1988. iii, 49 p. : ill. *Bilingue (Summary of 1983-1984 contract...)*.
MICROLOG 88-04249 1 fiche

En plus de confier des travaux de recherche à son propre personnel, la Direction générale de la recherche d'Agriculture Canada applique un Programme de recherches contractuelles lui permettant de passer des contrats avec des particuliers ou des organismes extérieurs aux services fédéraux. Ce bulletin contient le résumé des rapports de recherches émanant des participants à ce programme. Inclut entre autres les sujets suivants: la fabrication d'une récolteuse à cueillette multiple de cornichons à confire; l'étude de systèmes aéroportés de pulvérisation; la mise au point d'une récolteuse auto-motrice pour fraises; l'essai de chargeurs à fumier semi-liquide; les caractéristiques physiques des sous-produits utilisés dans les meuneries; ainsi que l'étude de faisabilité et de commercialisation d'une goudronneuse pour fossés d'irrigation.

A Review of geophysical investigations at the site of Chalk River Nuclear Laboratories, Ontario

by M.D. Thomas and J.G. Hayles. Ottawa : Geological Survey of Canada, 1988. 29 p. : ill., maps. Bibliogr. (Paper ; 88-13) ISSN 0068-7650 ISBN 0-660-12874-8
MICROLOG 88-05462 1 fiche

The site of the Chalk River Nuclear Laboratories was one of the first research areas located on crystalline rocks to be extensively investigated under the Canadian Nuclear Fuel Waste Management Program. Standard methods such as gravity, magnetics and seismic sounding were used to investigate bedrock structure, and the seismic method was also used to estimate overburden thickness. Standard geophysical borehole logging was used to obtain in situ estimates of physical properties, to locate fracture zones and to make hole to hole corrections. Several standard electrical (e.g., resistivity) and electromagnetic (VLF-EM) techniques proved successful in identifying water-filled fractures and faults. Relatively new techniques used include ground probing radar to investigate overburden; borehole TV and acoustic televiewer and VLF-EM to locate fractures; and studies of seismic tube-waves, well tides and temperature logs to investigate fracture location and permeability.

MICROLOG 88-05836 2 fiche

Summary of quantitative information on seabird distribution based on standardized observations made off eastern Canada by shipboard observers between 1969 and 1983. The area covered lies north of 40N and west of 40W and includes the Gulf of St. Lawrence and the waters off the Atlantic provinces, the eastern Canadian Arctic, and west Greenland. General information is given on the oceanography of the area, conservation and management, and vulnerability, with more specific data on particular species, including breeding and pelagic distribution.

The Revised safety system : a computer software package on accident reports and related information

by J. Pressnail. Toronto : Ontario Hydro, Research Division, 1987. 83 p. Bibliogr. (Report ; no. 87-72-K)
MICROLOG 88-00161 1 fiche

The Construction Group at the Pickering NGS required a computer software package that would generate reports on accidents incurred on the job, and reports on the medical history of each employee. A first version of the Safety System software package was described in Research Division Report 86-330-k. A separate computer software package was written, and named the Training System. This package generates the training reports previously produced by the Safety System. This report is on the revised Safety System package. It contains a Users' Guide, and a Programmers' Guide, containing information needed if modifications to the system are desired.

Révision du volet du programme de suivi de l'exploitation du cerf d'Anticosti touchant la structure d'âge et la productivité des biches

par A. Gingras, A. Lussier et F. Potvin. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction régionale de la Côte-Nord, 1987. v, 23 p. : ill. Bibliogr.
MICROLOG 88-03508 1 fiche

Avec l'établissement d'un bureau permanent du Service de l'aménagement et de l'exploitation de la faune à l'île d'Anticosti, il a été possible d'instaurer un programme de suivi de l'exploitation sportive du cerf de Virginie dans l'île. Ce suivi est basé principalement sur l'analyse des données d'exploitation par la chasse, soit les statistiques de récolte, l'effort de chasse, le nombre de cerfs vus par chasseur, l'âge et le taux de lactation des biches. Ce rapport fait l'analyse des données sur l'âge et le taux de lactation des biches.

Right-of-way rehabilitation of sandy slopes in northern Ontario : phase 2

by T. Hilditch and C. Hughes. Downsview, Ont. : Ontario Ministry of Transportation and Communications, Research and Development Branch, 1987. 41 p. : ill. Bibliogr.
MICROLOG 88-01132 1 fiche

This report summarizes results to the end of the second of three phases of revegetation research. Reports on the investigation of certain sedges as well as some grasses, distinguished from sedges by a variety of morphological characteristics. Sedge seeds unavailable commercially, were collected in the field. Various treatments were tested to stimulate germination of these seeds. The seed of grasses selected for study were obtained from American seedhouses. The selected sedges and grasses, all normally found in sandy, droughty habitats were planted on slopes of approach fills to a bridge structure near Gravenhurst, Ontario. Planting was carried out in the fall of 1985 and the spring of 1986 on both the north and south slopes to determine the effects of season and aspect on the initial growth of these plant species in comparison with growth of a standard MTC seed mix.

The Role of the opposition in parliament : the dilemma for New Brunswick

by C. Wood. Edmonton : Legislature Library, 1988. 16 p. Bibliogr.
MICROLOG 88-05744 1 fiche

The 1988 New Brunswick provincial election gave the Liberal Party a clean sweep of all 58 seats in the Legislative Assembly. This monopoly of the Assembly by one political party creates a difficult dilemma for the parliamentary system of government. This paper evaluates some options to deal with this situation. To begin with, the paper develops a conceptual set of roles and functions of an opposition to serve as a framework by which to evaluate the various alternatives to an elected opposition. Before these current options are examined the only precedent for the New Brunswick election, namely the Prince Edward Island election of 1935, is considered. Finally, the various alternatives to an elected opposition are evaluated. The paper concludes by determining how best to deal with the situation in New Brunswick.

Root deformities in plantations

Fredericton : Dept. of Forests, Mines and Energy, Timber Management Branch, 1985. 16 p. : ill. (Technique) *Appendices not filmed..*
MICROLOG 88-00010 1 fiche

General description of root deformities of planted bare-root stock (particularly pine) and different types of container stock in New Brunswick tree plantations. Assessments of the lateral stability and extent of root deformities of trees in 3-14 year old jack pine and spruce plantations established by the Department of Natural Resources were conducted in the summer of 1980. Trees were classified into one of five stability classes and sample roots were excavated and labelled.

Routing and scheduling for the transportation of the disabled persons : test problems and evaluation of results

by S. Roy...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. iv, 55 p. Bibliogr. (Publication ; no. 414A) *French ed.*

(Elaboration des routes...) : 88-00541/1.
MICROLOG 88-00540 1 fiche

Third report on a research project involving the development of software for route and schedule construction for the transportation of the handicapped. This report contains tests on a typical day for the cities of Montreal, Toronto and Sherbrooke, as well as an evaluation of the routes actually executed in Montreal and Toronto. The tests attempted to adapt the software to different contexts and validate it, although the tests did not take into account operating rules such as reservation periods and user call-back, cancelations and 'no-shows'.

Routing and scheduling for the transportation of the disabled persons : the algorithm

by S. Roy...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. ix, 21 p. Bibliogr. (Publication ; no. 412A) *French ed. (Elaboration des routes...) : 88-00539/1.*
MICROLOG 88-00535 1 fiche

This document describes the technical aspects of the route and schedule preparation algorithm for a semi-collective transportation system for the handicapped. This software may also serve as a tool to evaluate operating strategies. Two types of problems related to this kind of transportation have been studies in the literature. The first problem involves the construction of routes to respond to a set of requests known in advance [2.5]. The second involves the integration of a new request into an already existing route [4]. This paper proposes a heuristic which can handle both problems in which the second problem merely becomes a special case of the first. This heuristic can solve large scale problems. In the first step, the objective is to maximize vehicle productivity with the quality of service fixed for each request. In the next step, the quality of service is maximized while maintaining vehicle productivity at the value obtained in the previous step.

Routing and scheduling within a job shop framework

by J. Blazewicz and G. Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. 10 p. Bibliogr. (Publication : no. 511) (Cahiers du GERAD ; G-87-07)
MICROLOG 88-00542 1 fiche

In this paper, an extention of the classical scheduling problem is considered. It is assumed that tasks are processed on parallel processors, available at different production sites. Each task also requires for its processing additional (reusable) resources which, at the beginning, are available at resource sites and production sites. The problem is to find a schedule for processing all the tasks and transporting the resources required between resource and production sites in order to minimize certain objective functions. In the paper, several variations of the problem are considered and mathematical programming formulations for each subproblem are given.

Sandstone reduction by attritor grinder : product evaluation as foundry moulding sand

by R.K. Collings, M. Lavallée and E.I. Szabo. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 21 p. : ill. (Report ; MSL 87-138(IR)) *Project 30.21.02 beneficiation/grinding studies of selected minerals.*
MICROLOG 88-02654 1 fiche

Canada continues to import significant quantities of high-purity sand, chiefly from the US, for use in glass manufacture and by the foundry industry. There are a number of potential sources of high-purity silica sand in Canada, one of the more promising being the Potsdam sandstone formation of eastern Ontario and southern Quebec. This report presents the results of two methods of preparing sand by the reduction of 2500 um (8 mesh) Potsdam sandstone, the first a combination of Simpson muller mixer reduction, Wemco attrition scrubbing and water washing, the second a Union attritor mill and product washing. The two methods were investigated to determine whether the latter, in particular, was superior for the production of agglomerate-free, round-grained sand specifically suitable for foundry moulding applications.

MICROLOG 88-06492 2 fiche

This report is a response to recommendations adopted by Metropolitan Council regarding the Transportation Corridor. It supplies a proposal which minimizes the costs of retaining the Corridor by disposing of as much surplus property as possible and by leasing lands within the Corridor for interim uses; it determines acceptable interim uses which will maximize the utilization of Corridor lands during the period prior to construction of a transportation facility; and minimizes the adverse impacts of the Corridor lands on adjacent properties and the public in general through increased maintenance and selective landscaping.

School board : 3 year statistics, 1985-86-87

Toronto : School Business and Finance Branch, Grants Services Section, 1987. 124 p. *CSI 55108.003.*
MICROLOG 88-01387 2 fiche

Since the late 1970s, the Ministry has compiled and distributed on request three year statistics for Ontario school boards indicating on a board-by-board basis, selected enrolment and financial information. The statistics are extracted from school board financial statements for 1985 and 1986 and from estimates for 1987. The data shows the direction over a three-year span for each board in areas including proximity to the grants ceiling, enrolment growth or decline, change in grant weighting factors, and comparative mill rates for operating purposes. Includes assessment and information on continuing education.

School bus routes generator in urban surroundings -- Rev.

by G. Dulac, J.A. Ferland and P.A. Forgues. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 35 p. : ill. Bibliogr. (Publication ; no. 143) (Publication ; no 298)
MICROLOG 88-06419 1 fiche

Comprehensive study of the school bus routing problem in an urban setting, particularly in a district including several schools. The problem is defined as a multi-stage process where the stops are generated, the students are assigned to these, and the bus routes are then generated. Several suited versions of vehicle routing techniques are analysed and compared and branch exchange procedures to improve the solutions are studied.

Schools, computers, and learning project : interim report 1 from the Kingston Regional Pilot Test Centre : a description of the research setting

project co-ordinator, Donaleen Hawes. Toronto : Ministry of Education, 1988. ix, 112 p. : ill. Bibliogr. (Education and technology series) ISBN 0-7729-3749-4
MICROLOG 88-05099 2 fiche

This report is a description of the research setting for the schools, computers, and a research project that is both longitudinal and multidimensional. The report presents the mutual adaptation of schooling and technology that occurs when a computer-rich environment is established. In addition to global questions, a wide range of curricular, developmental, organizational, and social concerns are examined. Issues addressed focus on integrating computer use and styles of learning, teaching and school administration, and include peer tutoring and learning through social interaction, students' control over their own learning, fundamental developments in mathematics, science, and the arts, professional research and writing tools, new ways of managing the classroom in light of the increased freedom that the computer affords, and the presence of volunteers in the classroom and the sense of a school community.

Scirpus americanus : its growth characteristics and variation on the Fraser and Skagit-Stillaguamish estuaries, summer 1987

by W.S. Boyd. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1988. vi, 61 p. Bibliogr. (Technical report series ; no. 44) ISSN 0831-6481 ISBN 0-662-16346-X
MICROLOG 88-06245 1 fiche

A relatively large population of Lesser Snow geese winters on the Puget Trough, alternating between the Fraser Estuary (British Columbia) and the Skagit-Stillaguamish Estuary (Washington) from early October to late April. High concentrations of wintering geese can have profound effects on the structure and composition of marsh communities. Biweekly surveys of three square bullrush growth were conducted to determine differences within and between the two estuaries. A destructive sampling was undertaken at peak site length to determine the relationships between growth indices and biomass. The three transects surveyed on the Fraser Estuary supported three distinct bullrush communities, reflecting differences in key environmental factors. Those factors likely include salinity, tidal inundation/exposure ratio, and Snow goose and swan grazing pressure.

Seasonal changes in abundance and size frequency distribution of the dominant macrozooplankton in Frobisher Bay, N.W.T.

by J.A. Percy...et al. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1988. v, 208 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 705) ISSN 0706-6465
MICROLOG 88-05101 3 fiche

Data on the seasonal changes in abundance and size frequency distribution of four macrozooplankton species present in Upper Frobisher Bay, NWT. Data are presented for the ctenophore Mertensia ovum, the hyperiid amphipod Parathemisto libellula, the chaetognath Sagitta elegans and the pteropod Clione limacina. Passive samplers strained the strong tidal currents at stations in Upper Frobisher Bay during 64 sample periods in the winter, spring and summer months of 1981 to 1985.

Seasonal salinity, temperature and density data for the Canadian Beaufort Sea shelf, 1986

by G.E. Hopky, D.B. Chiperzak and M.J. Lawrence. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1987. iv, 268 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 661) *16th data report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6465
MICROLOG 88-00690 3 fiche

This report contains salinity, temperature and density (CTD) data collected at various stations in the waters of the Canadian Beaufort Sea Shelf during 1986. Salinity and temperature profile data were measured using a Guildline Model 8870 probe deployed from the ice surface in March and May, and from the M.V. Sequel during July to September. Ice thickness and secchi depth were measured during periods of ice cover and open water, respectively. Salinity values were measured with an Autosal Model 8400 salinometer. Density was calculated using salinity and temperature values.

Seasonal salinity, temperature and density data for the Canadian Beaufort Sea Shelf, 1987

by G.E. Hopky, D.B. Chiperzak and M.J. Lawrence. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1988. iv, 162 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 685) *21st data report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6465
MICROLOG 88-03404 2 fiche

This report contains salinity, temperature and density (CTD) data collected by the Department in the waters of the Canadian Beaufort Sea Shelf during 1987. Salinity and temperature profile data were measured using a Guideline Model 8870 probe deployed from the ice surface in March and May, and from the M.V. Sequel during July to September. Ice thickness and secchi depth were measured during periods of ice cover and open water, respectively. Salinity values for samples collected from bottle casts were measured with an Autosal Model 8400 salinometer. Density was calculated using salinity and temperature values. During the ice cover periods of March and May, CTD profiles were measured at five and nine stations, respectively. For the open water July to September period, CTD profiles were meaured at 41 stations. One additional station was sampled using bottle casts. Replicate CTD profiling was conducted at a number of stations, on a seasonal basis.

Seasonality and distribution of marine birds in Saanich Inlet, Vancouver Island, B.C.

by K.H. Morgan, R. Hay and K. Vermeer. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1987. iii, 53 p. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 95) ISSN 0711-6764
MICROLOG 88-01539 1 fiche

Seasonal changes in species and populations of marine birds were monitored in Saanich Inlet, Vancouver Island, from March to mid-December 1986. Spatial and temporal patterns of distribution and abundance were monitored and habitat types and geographic areas of importance to marine birds were identified.

A Second checklist and bibliography of the lichens and allied fungi of British Columbia

by W.J. Noble...et al. Ottawa : National Museums of Canada. National Museum of Natural Sciences, 1987. 95 p. Bibliogr. (Syllogeus ; no. 61) ISSN 0704-576X
MICROLOG 88-03287 2 fiche

Checklist based on the Preliminary Checklist of Otto and Ahti (1967) which was based, in turn, on 110 literature reports and specimens found at the University of British Columbia. Many specimens on which literature records were based were checked, with misidentifications deleted. A total of 1013 species in 205 general, 18 subspecies, 33 varieties, and 2 forms are reported for British Columbia. Synonyms and unreliable records are also recorded. The 40 taxa originally described from the province are listed. The checklist is based upon reports in approximately 300 papers as well as herbarium specimens.

Secondary physical education program of studies

Alberta. Alberta Education. Edmonton : The Ministry, 1987. 17 p.
MICROLOG 88-00743 1 fiche

While the unique contributions of physical education to the school program are motor skill development and physical fitness, physical education is concerned with the whole being and therefore consists of learning modes that are based upon the inter-related cognitive, affective, and psychomotor behaviours of students. The physical education program, a vital part of the schooling process, features a student-centered learning environment that attempts to meet the needs of all students in order to encourage their optimal development. The program is designed for a wide range of student abilities and, therefore, is comprised of varying activities, progressions in difficulty, and standards of achievement.

Le Secteur de la machinerie et du travail du métal au Québec : importance économique et analyse comparative

Québec (Province). Direction des études sectorielles. Québec : Gouvernement du Québec, Ministère de l'industrie et du commerce, Direction des communications, 1987. xxiii, 195 p. : ill. *En tête du titre: Profil. CSI 66108.205.* ISBN 2-550-17729-0
MICROLOG 88-04221 3 fiche

Document de base qui présente un portrait global du secteur de la machinerie et du travail du métal au Québec. De portée générale, il est destiné à servir de document de référence pour tous les agents économiques intéressés au développement du secteur. On présente, dans un premier temps, une description et une analyse de l'importance économique du secteur, de son intégration à l'économie du Québec et de son évolution récente au Canada et au Québec. Puis, on analyse l'inventaire des équipements de production de l'industrie, réalisé par le MIC en 1984-85, en portant une attention particulière sur les technologies d'automatisation utilisées par l'industrie.

Section 23 of the Charter : provincial implementation -- Reviewed

by R. Soucie. Ottawa : Library of Parliament, Research Branch, 1987. 16 p. Bibliogr. (Current issue review ; 87-4E) *French ed. (L'article 23 de la...) on the same fiche.*
ISBN 0-660-12576-5
MICROLOG 88-00831 1 fiche

Section 23 of the Charter guarantees, with some conditions, access to schooling in both official languages. This paper analyzes the origin of minority language rights through to the problem English Quebeckers encountered because of Quebec's 1977 Bill 101 and the problems of Franco-Ontarions not able to receive a French language education. Comments on provincial governments' failure to follow through on the now four year old provisions of Section 23 and lack of cohesive action taken by linguistic minorities. Also projects changes that may occur with the large number of cases before the courts on this issue. Documents a chronology of related parliamentary action.

The Sectoral and regional sensitivity of Ontario manufacturing industries to tariff reductions : Canada-U.S. Free Trade Agreement : preliminary transcript, background paper, November 17, 1987

Toronto : Ministry of Industry, Trade and Technology, 1987. 192 p. : ill.
MICROLOG 88-02712 3 fiche

For the Ontario economy, manufacturing accounts for nearly a third of the province's output. Tending to be more productive than other industries, manufacturing is also a major source of new technologies and of products that improve the efficiency of primary and tertiary industries. This report examines the effects of the international liberalized trade and specifically, the US-Canada Free Trade Agreement, and discusses the adjustment policies necessary to protect job loss in industries that may not survive freer trade. Contains results of consultations with private sector and determines those jobs most likely to be affected. Discusses adjustment measures in light of the size and importance of manufacturing in the provincial economy, with analysis of income and employment, international trade of manufactured goods, regional distribution of manufacturing, linkages with other sectors, output and employment by sector, and composition of trade. Concludes with a discussion of factors contributing to competitiveness, structural characteristics, and trade performance with the US.

Sediment data : Milk River Basin

by M.O. Spitzer. Ottawa : Environment Canada, Conservation and Protection, Inland Waters and Lands, Western and Northern Region, 1988. vi, 294 p. : ill. Bibliogr. *Technical bulletin IWD-WNR(A)-WRB-SS-87-2.*
MICROLOG 88-03013 4 fiche

Sediment data were collected in the mid-seventies and the early eighties at seven gauging stations situated along the reach of the Milk River from above the western crossing of the International Boundary to immediately below its re-entry into the U.S.A. at its eastern crossing of the International Boundary. This report documents the available sediment information, presenting the data in various tabular and graphical formats. In particular, for each gauging station, varying amounts of the following data are documented and discussed: descriptions of the gauging station sites (including air and ground photos), hydrometric details at the gauging station sites, suspended sediment data (concentration, load and particle size), bed material data, dissolved solids data, bed load data (only at the eastern crossing site). The data are contained in individual appendices for each gauging station, while comparisons among the sites are contained within the main body of the report.

Sediment transport and associated contaminant movement within the Humber River

a report of the Toronto Area Watershed Management Strategy Steering Committee ; prepared by S.R. Klose. Toronto : Toronto Area Watershed Management Strategy Steering Committee, 1987. v, 71 p. : ill. Bibliogr. (Technical report ; no. 10)
CSI 55123.205.
MICROLOG 88-05196 2 fiche

In 1981, the Ministry of the Environment initiated a 5 year project, the Toronto Area Watershed Management Strategy Study, to investigate Metropolitan Toronto river systems, to identify areas where water quality improvement is required, and to develop cost-effective measures for achieving these improvements. One of the tasks within the study is to evaluate sediment transport mechanisms and related contaminant movement in the Don and Humber Rivers. This report examines the sediment transport and associated contaminant movement within the Humber River, including spatial sediment depositional patterns, sediment transport of various reaches of the river both through theoretical calculations and historical information, and sediment quality through the interaction of sediment and contaminant movement.

Sediments in water quality assessments : opportunities for integrating Water Quality and Water Resources Branches' activities

by D.P. Blachford and T.J. Day. Ottawa : Environment Canada, Inland Water Directorate, Water Resources Branch, Sediment Survey Section, 1988. v, 71 p. Bibliogr.
MICROLOG 88-06167 1 fiche

Sediments play a dominant role in the quality of the aquatic environment. Determining the status of aquatic quality is the primary responsibility of Water Quality Branch. Water quality assessments conducted by the Branch provide data and information regarding aquatic quality. Water Resources Branch, through its Sediment Survey activities, provides expert advice on sediment dynamics, interpretation and physical description of sediment. Water Quality Branch provides advice on ecosystem ynamics, pathways that include sediments, environmental processes and interpretation. This report identifies opportunities for a new and improved working relationship between the Branches.

A Selected bibliography of scallop literature

by C.A. Hodgson, N. Bourne and D. Mottershead. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 133 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1965)
ISSN 0706-6473
MICROLOG 88-04790 2 fiche

Literature on scallop culture has been growing at a rapid rate with studies published in journals, government documents, symposia, and secondary publications. This bibliography focuses on scallop culture literature and is intended primarily for researchers and industry people involved in the field of scallop culture. Most of the references are of papers published in English. Each reference lists the author, year of publication, title, journal or publishing agency, and key words. All references are cross-indexed under author, species, geographic region, and subject. The literature search was conducted in March 1987.

Selected forestry statistics, Canada, 1987

Ottawa : Government of Canada, Canadian Forestry Service, Economics Branch, 1988. xxii, 188 p. : ill. (Information report ; E-X-40) *French ed. (Recueil de statistiques...) : 88-05296/3. CSI 22189.009.* ISSN 0834-938X
ISBN 0-662-16113-0
MICROLOG 88-05295 3 fiche

Series of tables on Canadian forest resources and related management activities, commodity production, shipments and trade, principal and employment statistics by industry sector, as well as selling price indexes, financial statistics, and economic indicators. Some transportation, construction, and international data have been added to complete the picture. Over 115 tables of forest economic data at the national and provincial levels are included, with data extracted from approximately 55 different publications and the CANSIM data base. A special effort was made to compare forestry figures with those for agriculture, fishing, mining, and energy.

MICROLOG 88-01172 2 fiche (Available on fiche only)

A Memorandum of Understanding was signed in 1984 by CANMET and the Ministry of Research and Technology of the Federal Republic of Germany concerning the study of coal-slurry systems. This report presents the results of part of that study including some aspects of the Wilson model for slurry flow, and its connection with the formulae of Durand and of Newitt. Some comparative calculations are given to illustrate the equivalance of Wilson's and Shook's use of the force balance equations, as well as short studies of some theoretical and practical topics relating to the Wilson model. A plan of data accumulation based on dimensional analysis is also proposed.

Selection of an area in the Canadian Beaufort Sea for disposal of inert bulky materials such as scrap metal : an assessment of options

Yellowknife, N.W.T. : Environment Canada, Conservation and Protection, Environmental Protection, Western and Northern Region, 1986. vi, 58 p. : maps. Bibliogr.
MICROLOG 88-06215 1 fiche

Project to assess the possible biological, physical, environmental, legislative, and industrial constraints which might affect the designation of a bulky inert waste ocean disposal site in the Beaufort Sea, and based on this analysis, to recommend one or more preferred dumpsite locations. In conjunction with this objective, information regarding the possible ocean dumping requirements of northern businesses and the alternate modes of transport of wastes were examined. The screening of areas was based on a review of the nature, quantities and sources of wastes to be dumped, the factors affecting dumpsite selection (including biotic populations, pertinent climatological and oceanographic features, ecological features, government legislation and policies, oil and gas development, shipping, and other uses of the sea) and the effects of ocean disposal.

Selective sorbents for Ontario Hydro nuclear systems : a preliminary appraisal

by S.A. Dias. Toronto : Ontario Hydro, Research Division, 1987. ii, 30 p. Bibliogr. (Report ; no. 87-216-K)
MICROLOG 88-00091 1 fiche

The conventional organic ion exchange resins currently in use in the nuclear purification circuits at various Ontario Hydro nuclear stations lack sufficient selectivity for long-lived nuclear species and are therefore under-used and continue to generate large volumes of nuclear waste, adding to the cost of handling. As part of the program to evaluate selective sorbents to reduce these costs, a review of the relevant literature and current technologies for removal of radioactive isotopes of long life spans from CANDU purification systems was carried out. Several proprietary sorbents specifically designed for nuclear waste removal were also evaluated.

Sensitivity study of the continuous release dispersion model (CRDM) for radioactive pollutants

by F. Camacho. Toronto : Ontario Hydro, Research Division, 1987. 21, 86 p. : ill. Bibliogr. (Report ; no. 87-114-K)
MICROLOG 88-00096 2 fiche

The Continuous Release Dispersion Model was developed for use in the Ontario Nuclear Emergency Plan to calculate projections of spatial distribution of pollutants and the radiation doses expected within the exposure area, given predicted source terms and meteorological conditions in the event of accidental releases of radioactive materials from nuclear generating stations. A sensitivity analysis was carried out to develop a method for quantifying the expected output uncertainty due to inaccuracies and uncertainties in the input values. A simulation approach was used to explore the behaviour of the sensitivity functions such as wind speed, temperature, heat flux, surface roughness, wind measurement height, downwind distance, crosswind distance, height, date, time, cloud cover and latitude of the source.

Le SIDA -- Revu

par R. Milko. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 22 p. Bibliogr. (Bulletin d'actualité ; 85-15F) *L'éd. anglaise (AIDS) sur la même fiche.* ISBN 0-660-92113-8
MICROLOG 88-00798 1 fiche

Depuis l'identification du SIDA, de grands progrès ont été réalisés dans le compréhension de cette maladie complexe. Il reste toutefois bon nombre de questions importantes aux quelles il faudra répondre avant de pouvoir limiter efficacement la propagation de cette maladie. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, propose un tour d'horizon de la question. Il est fait mention de l'étiologie et du mode de transmission de la maladie, des maladies liées au virus HIV, de l'évolution du virus, de la mise au point d'un vaccin, de l'efficacité des médicaments, des aspects sociaux et des programmes de prévention. Une liste des mesures parlementaires et une chronologie complètent le document.

Sigles des bibliothèques canadiennes, 1987 -- 12e ed

Bibliothèque nationale du Canada. Ottawa : la Bibliothèque, 1987. vi, 122 p. *Bilingue (Symbols of Canadian...).* ISSN 0316-1196 ISBN 0-662-55509-0
MICROLOG 88-01945 2 fiche

Les sigles des bibliothèques canadiennes sont attribués par la Bibliothèque nationale du Canada et constituent la clé, normalisée, de l'identification des bibliothèques, des centres d'information, des archives, des collections et des services d'information du Canada dont beaucoup participent ou sont inscrits à une vaste gamme d'activités informatives faisant appel notamment à des bases de données, à des bibliographies, à des catalogues collectifs, et à des réseaux locaux et régionaux. Les sigles sont présentés en double séquence. La première dresse par province ou territoire une liste alphabétique des sigles et des établissements auxquels ceux-ci ont été attribués; la seconde, un liste alphabétique des noms des établissements et des sigles qui les représent.

Silices non cristallines

Ottawa : Centre canadien d'hygiène et de sécurité au travail, 1987. i, 10 p. Bibliogr. (Fiche toxicologique ; no 27) ISSN 0827-8849 ISBN 0-660-92197-9
MICROLOG 88-01467 1 fiche

Les silices non cristallines synthétiques (fabriquées) comprennent le gel de silice, la silice précipitée, la silice sous forme de fumées et la silice fusionnée. On s'en sert largement dans l'industrie comme agents de séchage, épaississants, catalyseurs, produits de remplissage et enduits de surface. Une autre forme de silice non cristalline est la fumée de silice ou fumée de silice condensée, un sous-produit de la production du silicium ou du ferrosilicium. La fumée de silice est utilisée comme additif dans le béton. Le présent document porte sur les dangers des silices non cristallines. On y décrit la toxicité de ces produits, en mettant l'accent sur la signification des renseignements pour le milieu de travail.

Silvicultural consequences of forest harvesting on peatlands : site damage and slash conditions

by A. Groot. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Great Lakes Forestry Service, 1987. 20 p. : ill. Bibliogr. (Information report ; O-X-384) ISSN 0832-7122 ISBN 0-662-15515-7
MICROLOG 88-00634 1 fiche

The degree of site damage that occurs during forest harvesting on peatlands is influenced by site type and harvesting method. This report presents quantitative information on site dammage and slash amounts on peatland cutovers by harvesting machinery. Plots used were commercial, peatland black spruce-dominated forest of FEC operational groups 11 and 12 (Ledum and Alnus/herb-poor) which had an understory well stocked with black spruce advance growth, all of which were located within 80 km of Kapsukasing, Ontario. The study was carried on from 1982-1984.

A Simple and effective method of cleaning the gravel of Atlantic salmon spawning habitat

by J.R. Semple. Halifax : Dept. of Fisheries and Oceans, Biological Sciences, Enhancement, Culture and Anadromous Fisheries Division, 1987. vi, 6 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1933) ISSN 0706-6473
MICROLOG 88-01021 1 fiche

A continuing search to enhance the production of Atlantic salmon identified a need to improve salmon spawning habitat by flushing fine particulate matter from natural erosion, road construction, logging, agricultural practices and land development out of the interstices of the gravel. This report assesses the merits of one method, including an evaluation and description of the cleaning equipment and the procedures used, with their resultant effect on gravel permeability. Two Atlantic salmon spawning sites on the North Branch LaHave River, Nova Scotia were selected for the work on gravel cleaning. Site selection was based on stream flow, depth and substrate characteristics.

A Simple edge elimation criterion in a search for the center of a graph

by J. Halpern. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 7 p. Bibliogr. (Publication ; no. 109)
MICROLOG 88-06380 1 fiche

The note proposes a new edge elimination criterion in an algorithm whose purpose is to locate the center of a graph. The new criterion requires the same amount of information and computation but generates a stronger lower bound. It therefore reduces substantially the number of edges that have to be thoroughly and costly checked for a possible centre point along them.

A Simplex-type approach to solve the engine scheduling problem

by J.A. Ferland and S. Pelland. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 17 p. Bibliogr. (Publication ; no. 157) (Publication ; no 357)
MICROLOG 88-06429 1 fiche

Paper exploring several variants of Benders' decomposition to solve a scheduling problem that is faced by any railway company using several engine types to provide power for its trains. The problem is to select the mix of engine types for each train that gives the lowest capital investment and operating costs. A straightforward Benders' decomposition was shown inefficient in solving it, but a new simplex-type approach is used and compared with several other variants of Benders' decomposition, showing its superiority.

Simulateur numérique de l'écoulement et du transfert de masse dans des réseaux stochastiques de fractures

par A. Rouleau. Saskatoon, Sask. : Direction générale des eaux intérieures, Institut national de recherche en hydrologie, 1988. viii, 206 p. : ill. Bibliogr. (Rapport de l'INRH ; no 39) (Collection des rapports techniques ; étude no 155) *L'éd. anglaise (A numerical simulator...) : 88-05388/3.* ISBN 0-662-94974-9
MICROLOG 88-05389 3 fiche

Le rapport décrit un progiciel de modélisation de fractures discrètes stochastiques (FDS) qui simule l'écoulement de l'eau souterraine et le transfert des contaminants dans des réseaux de fractures. Le programme NETWRK génère des réseaux de fractures bidimensionnels. Le programme APEGEN permet de générer des distributions d'ouvertures supplémentaires pour le réseau de fractures généré par le programme NETWRK. Un 3e programme, NETFLO, calcule l'écoulement fluide en régime permanent. Il calcule aussi certains paramètres statistiques dans chaque intervalle de direction de 10 degrés, notamment la longueur totale de segments de fractures, la vitesse d'écoulement totale et le débit total. Ces derniers paramètres directionnels sont utilisés par le programme NETRANS pour calculer le temps de transit des particules sur une distance arbitraire à l'aide d'une méthode stochastique de 2e niveau.

A Simulation analysis model for continuous surface miner and trucks operation using SLAM II

by W.H. Griffin and J.K. Szymanski. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories. 1988. vi, 22 p. : ill. (Report ; CRL 88-35(TR,OP,J))
MICROLOG 88-06053 1 fiche

A computer model was developed to simulate the operation of the continuous surface miner (CSM) with trucks in open pit mines. The performance measure and the production rate are combined with the dollar values to estimate the system's performance. Stochastic simulation is used to reflect the random variation in duration of CSM and truck activities. Data was collected from an operating mine through time studies and analysis of production records.

A Simulation model for the greater snow goose population

by J. Gauvin and A. Reed. Ottawa : Environmental Protection Service, 1987. 28 p. : ill., maps. Bibliogr. (Occasional paper ; no. 64) *French ed. (Un modèle pour...) on the same fiche.* ISSN 0576-6370 ISBN 0-662-15474-6
MICROLOG 88-01155 1 fiche

The greater snow goose population has recently undergone a rapid increase from 50,000 to more than 200,000. A mathematical model was developed to understand and simulate the growth of that population. Three parameters were used: the size of the population in spring, the percentage of juvenile geese in the fall flight, and the numbers of geese killed by hunters in the USA and Canada over the past 20 years. Survey data were used to estimate a rate of non-hunting mortality as well as probabilities for rates of reproduction and hunting mortality. The model could be refined by developing and introducing other factors such as the carrying capacity of the range, annual variations in non-hunting mortality, and a function relating kill rates to population size and age structure.

Simulation, gaming and training in a competitive multimodal multicompany intercity passenger transportation environment

by C. Lardinois. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 27 p. Bibliogr. (Publication ; no. 588)
MICROLOG 88-05756 1 fiche

This paper presents a micro-computerized simulation game designed as an analysis, experimentation and training tool in the field of intercity passenger transportation planning and management. The simulation deals with different transportation modes and companies in a competitive environment, whether it be regulated or not. The background, philosophy and objectives of the game are discussed in relation to the intrinsic complexity of decision making and the state of development of modelling in transportation.

Single entry short longwall retreating systems : final report

Monenco Consultants. S.l. : Monenco, 1988. 2 v. : ill., maps. *CANMET contract: 7-9022/01-SQ.*
MICROLOG 88-05982 7 fiche

Review of the possible application of single entry short longwall retreating faces as a practical and productive method of mining under certain conditions and circumstances in the Sydney Coalfield. Visits were made to Cape Breton Development Corporation offices and operating mines, and the Mines Inspectorate to obtain data on the condition and practices governing the operations in the Sydney Coalfield. Data on single entry short longwall retreating systems was obtained through literature searches, visits to mines in the United Kingdom, Belgium and West Germany, and talks with the Mines Inspectorate; discussions with manufacturers of equipment used in such systems; and a questionnaire to mines operating or which used the single entry system, and to coal mining research organizations in U.K., U.S., East Germany and Australia. The conditions at the Prince, Lingan and Phalen mines were evaluated and suitable sites for use of the system were selected.

Site assessment, phase 4B : atmospheric conditions : final report

prepared for Ontario Waste Management Corporation ; submitted by C.J. Baynes...et al., Ontario Research Foundation. Toronto : Ontario Waste Management Corporation, 1987. 4 v. : ill. Bibliogr.
MICROLOG 88-00987 11 fiche

Ontario Waste Management Corporation Phase 4B, Site Assessment, was conducted through detailed field programmes and technical studies to verify, define, predict, assess, and monitor all potential risks and impacts associated with the proposed industrial waste treatment and disposal facility, to be located in the Township of West Lincoln, Regional Municipality of Niagara. This report documents the potential effects on local air quality of the air emissions from the proposed facility, by first determining the baseline conditions and then predicting anticipated conditions during construction and operation of the facility. Pollutant concentrations in ambient air are predicted and assessed for the potential risk to human health and potential impacts on the environment. Only emissions due to construction and normal operation were addressed. A review of both Ontario and Canada regulations relating to air emissions, as well as those from other jurisdictions, is also included. Suggestions for mitigation and monitoring are given.

Site assessment, phase 4B : economic impact

prepared for the Ontario Waste Management Corporation ; submitted by Morehouse Economic Planning Consultants. Toronto : Ontario Waste Management Corporation, 1987. viii, 300 p. : ill. Bibliogr.
MICROLOG 88-02251 4 fiche

The OWMC Phase 4A Economic Impact Report compared the potential impacts of the siting of the OWMC industrial and hazardous waste treatment facility on a number of possible host communities. The purpose of the Phase 4B Economic Impact Report is to describe the economy of the Niagara Region and West Lincoln Township and to evaluate the impact on the economy if the OWMC Industrial Waste Treatment Facility were to be located in the West Lincoln Township and to identify ways of minimizing negative impacts and enhancing positive impacts. The economic impact is measured on employment, business activity, and property values. The economic bases of both the Region of Niagara and West Lincoln Township are described in computer models that present both historic and forecasted information. The economic impact of the proposed facility is estimated by describing the economic characteristics of the facility, through an OWMC employment profile (both construction and operational) and local purchases of goods and services by OWMC. These characteristics are then superimposed on the economic base model to produce an Adjusted Economic Base. Comparision of this with the original Economic Base model demonstrates the expected impact of the proposed facility on local employment.

Site assessment, phase 4B : municipal financial impact

prepared for the Ontario Waste Management Corporation ; submitted by Future Urban Research. Toronto : Ontario Waste Management Corporation, 1987. xix, 158 p. Bibliogr.
MICROLOG 88-02252 3 fiche

Report examining the possible impacts that the Ontario Waste Management Corporation's proposed industrial and hazardous waste management facility in West Lincoln may have on the financial structure of the affected municipalities. The report presents an evaluation of the potential cost, revenue and ultimate property tax impacts on both the Township of West Lincoln and the Region of Niagara. Mitigation is also proposed to minimize negative impacts and a monitoring programme is identified to quantify impacts as they actually occur.

Site assessment, phase 4B : noise : final report

prepared for Ontario Waste Management Corporation . submitted by S.S. Wilson. Toronto : Ontario Waste Management Corporation, 1987. 97 p. : ill., maps. Bibliogr. *Folding maps not filmed.*
MICROLOG 88-00984 2 fiche

Ontario Waste Management Corporation Phase 4B, Site Assessment, was conducted through detailed field programmes, and technical studies to verify, define, predict, assess, and monitor all potential risks and impacts associated with the proposed industrial waste treatment and disposal facility. This report documents the noise impact studies carried out, including a comprehensive analysis of noise generation and impact during the construction period and during the on-going process plant and landfill operations at the preferred site. The studies also assessed noise impact along the access routes, due to OWMC-generated traffic, for the construction period and ongoing operations. The noise environment with and without the facility for year 5 and year 10 levels of operation are predicted, with possible mitigation measures and a recommended ongoing noise monitoring program also included.

Site assessment, phase 4B : risk assessment

Environ. Toronto : Ontario Waste Management Corporation, 1988. 2 v. Bibliogr.
MICROLOG 88-02253 12 fiche

Report on the human and environmental risks in the siting of the Ontario Waste Management Corporation's hazardous waste treatment facility in West Lincoln Township. Consideration was given to long-term exposures associated with normal facility operations and short-term exposures associated with both on-site upsets and accidents and off-site transportation accidents; an evaluation of routine emissions from the facility as well as potential contaminant releases from the engineered landfill and the evaporation unit of the physical/chemical treatment plant; and specific public concerns such as the human risks associated with the inhalation of air, and the ingestion of beef, milk, pond water, cistern water, and leafy vegetables, consumption of various fruits and vegetables, pork, poultry, and eggs, incidental ingestion of soil, and dermal absorption of contaminants in soil. Exposures were assessed by identification of significant sources of contaminant release to the environment; characterization of the nature, magnitude, frequency, and duration of each selected release; modeling of contaminant fate and transport in the environment; and estimation of the total systemic dose received.

Site specific water quality criteria for fish and aquatic life in the Canadian portion of the Flathead River Basin : nitrate, nitrite and ammonia

by D.D. Macdonald, L.E. Fidler and D. Valiela. Vancouver, B.C. : Environment Canada. Conservation & Protection, Inland Waters and Lands, Pacific and Yukon Region, 1987. xii, 127 p. : ill. Bibliogr.
MICROLOG 88-05379 2 fiche

The Flathead River Headwaters are in the southeastern corner of British Columbia; the river then crosses the International Boundary, eventually reaches Flathead Lake in Montana, and ultimately joins the Columbia River system. Concerns relative to proposed developments in the Canadian portion of the basin have led to management efforts to conserve Canadian interests while minimizing the potential for disputes over water quality in the basin. Management of the problem would be facilitated by defining water quality conditions to be pursued (water quality objectives). Water quality objectives require a basis in criteria for specified water uses, such as the site-specific water quality requirements to support agreed-to water uses. This report develops site-specific water quality criteria for toxic components of nitrogen for relevant fish and aquatic life species in the Canadian portion of the Flathead River.

Slip effects in concentrated emulsions

by R. Pal, E. Rhodes and N.A. Mansour. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. vi, 29 p. : ill. Bibliogr. (Report ; CRL 88-8(TR))
MICROLOG 88-06047 1 fiche

A considerable amount of the world's crude oil is produced as stable emulsions, either water-in-oil or oil-in-water, the former being used mainly in primary production and the latter in secondary and tertiary production. To ensure that the rheological properties are those of the emulsion and not artifacts produced by the method of investigation, it is necessary to obtain comparative data from discometers of different designs. This report analyzes and compares emulsion rheological data obtained from viscometers of different designs to determine if "slip effects" were present. The emulsions used were made up to represent emulsions which might be encountered in the heavy oil recovery industry.

A three-day symposium was organized by the Department of Fisheries and Oceans and convened at Nanaimo, British Columbia in November 1985. Advice on subject matter and participation came from an external committee of senior scientists and administrators in contributing agencies in Canada, Japan, the United States, and the Union of Soviet Socialist Republics. The papers included in the proceedings deal with sockeye biology and stock management. Papers on sockeye biology are divided into those concerned primarily with life history strategies and enhancement and development. Papers dealing with management are divided into the tools of management and management of some principal stocks.

Software for the impedance analysis of ceramic dielectrics

by T.A. Wheat, A. Ahmad and J.D. Canaday. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 19 p. : ill. Bibliogr. (Report ; MSL 88-52(IR))
MICROLOG 88-04995 1 fiche

The present authors have previously described a computer-controlled system for the electrical characterization of ceramic dielectrics based on a low-cost controller and software driving a HP4192A spectral impedance analyzer. The present report describes additional routines which enable the operator to view the data graphically, to select appropriate portions of the data and to obtain a least-squares regression fit of a series of near semi-circles through those selected portions. The program reports the relative error of the best fit circle through the data, the maximum value of Y, the two values of X when the fitted arc is extrapolated to Y=0 and the so-called 'depressed angle' formed between the X-axis and the circle radius drawn between the circle centre and the point.

Software modifications to total data reporting accessory for metabolic measurement cart

by R.W. Nolan, C.W. Gibson and S.D. Livingstone. Ottawa : Defence Research Establishment Ottawa, 1987. iii, 10 p. : ill. (Technical note ; 87-32)
MICROLOG 88-03968 1 fiche

Measurement of metabolic rates traditionally involved the use of gas meters, Douglas bags or spirometers to determine volume, and a variety of chemical or physical methods to determine oxygen and carbon dioxide concentrations. Since these methods are cumbersome and time consuming, self-contained systems were developed, one such being the Bechman Metabolic Measurement Cart which is controlled by a programmable calculator. However, storage of test results and retrieval for subsequent analysis is awkward and data from only one individual at a time can be measured during a given test. This paper describes software modifications which were made to overcome these difficulties and presents an example of how the modified system is used in the laboratory.

Softwood growth response study after Roundup treatments

Fredericton : Dept. of Forests, Mines and Energy, Timber Management Branch, 1988. 5 p. (Technique : 88:01) *CSI 45124.206.*
ISSN 0821-8285
MICROLOG 88-05632 1 fiche

Very few studies have been undertaken or results documented on softwood growth response to Roundup treatments in New Brunswick, as it has only been registered for aerial plantation tending since 1984. Five to six circular plots in the control strips and the same number in the sprayed areas were permanently established in each plantation. The heights of only the planted crop trees were measured in each plot in 4 of the 5 plantations, while in the other plantation, the diameter of the tree was measured 6" above ground as well as the heights in order to determine a relative volume response. The average number of trees and the average height per tree were calculated for the control and treated areas, and converted into per hectare values.

The Softwood lumber dispute and Canada-U.S. trade in natural resources

by M.B. Percy and C. Yoder. Halifax : Institute for Research on Public Policy, 1987. xlii, 181 p. Bibliogr. ISBN 0-886445-057-8
MICROLOG 88-02371 3 fiche

Examination of the 1986 phase of the Softwood Lumber dispute and the political and economic pressures arising from a trade dispute between Canada and the US due specifically to the increase in US domestic consumption of Canadian imports of softwood lumber. Assesses relative cost levels and resource endowments, and explicit and implicit subsidies to Canadian softwood lumber producers in order to explain the current pattern of trade in softwood lumber between the two countries. Also examines the impartiality of quasi-judicial US trade bodies such as the International Trade Administration and the International Trade Commission.

Soil infiltration and snow-melt run-off in the Mackenzie Delta, N.W.T.

by P. Marsh. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 4 p. : ill. Bibliogr. (NHRI contribution ; no. 88007)
ISSN 0838-1992
MICROLOG 88-06251 1 fiche

Run-off from seasonal snowcovers is an important source of water in many alpine and northern environments. This paper demonstrates the importance of the cold, underlying soil in delaying and limiting snow-melt run-off in permafrost environments. Field work was carried out at a small lake approximately 5 km southwest of Inuvik. Daily changes in the soil moisture profile were determined at 3 sites at the lake using a twin probe gamma density meter. In addition, snow and soil temperatures were measured at each of these sites. Snow depth and density measurements were taken to determine mean snowcover water equivalent, and changes in snowcover properties were monitored daily at two snow-pits. Measurement of the lake stage provided estimates of melt run-off from the surrounding basin. Air temperature, relative humidity, wind, net radiation, and precipitation were measured and surface snow-melt was calculated.

Soil sensitivity to acid deposition and the potential of soils and geology in Alberta to reduce the acidity of acidic inputs

by N. Holowaychuk and R.J. Fessenden. Edmonton : Alberta Research Council, 1988. iii, 38 p. Bibliogr. (Earth sciences report ; 87-1)
MICROLOG 88-03184 1 fiche

In December 1982, the Western Canada Long Range Transport of Air Pollution (LRTAP) Committee initiated a project to prepare acid sensitivity maps of the four western provinces, the Yukon and the Northwest Territories. The maps were to show the expected sensitivity of soils to acid deposition and the potential of soils and surficial geological materials to reduce the acidity of atmospheric deposition. This report represents the results of Alberta's contribution to the Western LRTAP project. The rating criteria used to prepare the maps were drawn heavily from principles of soil chemistry, geology, and hydrology, as well as soil fertility and plant nutrition. Supporting investigations to confirm actual changes in soils and geology due to acidic precipitation are limited, as are studies of effects on a wide variety of plant species due to these changes.

Solar greenhouses for commercial growers

by G.J. Monk...et al. Ottawa : Agriculture Canada, Research Branch, 1987. 48 p. : ill. Bibliogr. *French ed. (Serres solaires commerciales) on the same fiche.* ISBN 0-660-12643-5
MICROLOG 88-01677 2 fiche

Despite the North American greenhouse industry's reluctance to adopt solar heating as a measure for reducing energy costs due to its expense, complexity and unreliability, greenhouse research has produced promising results. This publication is intended to supply commercial growers with some basic information on solar heating. Examines selected methods of storing excess solar energy and provides guidelines on the design, cost effectiveness, and reliability of solar greenhouses that are either new structures or retrofitted conventional ones. The guidelines are based on findings from experiments conducted at Saanichton, British Columbia. Includes information on climactic considerations, site selection, the earth thermal storage, water storage, and shed-type solar heating systems, and environmental control for greenhouses.

Solid waste curbside recycling pilot project : 'before' study of residents' perceptions in the City of Edmonton

by D.W. Stokes. Edmonton : Alberta Environment, Waste Management Branch, 1987. i, 47 p.
MICROLOG 88-01917 1 fiche

The City of Edmonton and Alberta Environment officially began a joint, one-year curbside recycling pilot project on October 7, 1986 in 3 Edmonton communities. In conjunction with the pilot recycling project, a 'before' and 'after' study of residents' perceptions in the selected communities was established to ascertain resident's opinions, present activity, and willingness to participate in recycling glass, metal, and paper. In addition, a small 'before' study of residents of the City of Edmonton, excluding the 3 pilot areas, was established to ascertain if their opinions and willingness to participate in a possible city-wide recycling program differed in any significant way from that of the residents in the pilot areas. The report describes the methodology and study data of both 'before' studies.

Solution algorithms for network equilibrium models with asymmetric user costs

by C. Fisk and S. Nguyen. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 31 p. Bibliogr. (Publication ; no. 167)
MICROLOG 88-06437 1 fiche

Examination of the properties of some algorithms designed for solving the fixed demand traffic equilibrium problem with asymmetric user costs for the case where path choice is user optimized, a generalization of the standard model where cost on each network link is considered to be a well-defined function of the flows on all the links. This paper compares empirically the performance of this algorithm with some of the heuristic methods using a small realistic network model in which the link costs have a particularly asymmetric form. The results serve as the basis for evaluating the effectiveness of each method for application on large urban transportation networks.

Some reflexions on epistemology, design and planning theory

by M. Los. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 51 p. Bibliogr. (Publication ; no. 110)
MICROLOG 88-06381 1 fiche

The debate in planning theory is focused on the link between knowledge and action. Epistemological assumptions are necessary to determine what this link is or what it ought to be. The point of view chosen to discuss that link is that of Jean Piaget's genetic epistemology which belongs to the dialectical tradition. The "objectivity" of theory in planning, the concepts of rationality and optimality are discussed. The implications of a Piagetian paradigm for the respective nature and role of a theory of planning and of a theory of design are presented.

Some silvicultural ecosystems in the Yukon

by W. Stanek and L. Orloci. Ottawa : Pacific Forestry Centre, 1987. 56 p. : ill. Bibliogr. (Information report ; BC-X-293) ISSN 0830-0453 ISBN 0-662-15696-X
MICROLOG 88-00716 1 fiche

This guide provides a key to the differentiation of eight silvicultural ecosystems, here called operational groups, contained within forest complexes in the southern Yukon. The operational groups are intended to aid the forester in designing silvicultural measures within the scope of a forest management plan, and are suitable for use in combination with or as the basis of forest inventories. The key to operational groups is based on 21 forest types, including wetland shrub types, identified by cluster analyses of vegetation data and by a mathematical method called ordination. To facilitate practical application of the key, merchantability of the forest trees, incidence of permafrost, and site index were introduced into the scheme in addition to lists of characteristics plant species. To aid in determining the operational group, one or several examples of forest types per operational group are presented. In the Appendices are tables for field determination of moisture regimes of mineral soils with and without permafrost, as well as diagrams of forest types in relation to selected environmental variables, and illustrations of plants used in the key.

The Canada-Ontario-Industries Rockburst Project was initiated to develop improved capabilities in rockburst monitoring, analysis, and prevention. In Ontario, 11 mines operate microseismic networks using the Electrolab MP-250 system with either velocity gauges or accelerometers as the sensors and the number of channels ranging from 16-64. Output, based on P-wave arrivals, is used to calculate the coordinates of the source location. This report gives short descriptions of each of the methods (least-square, USBM-ISA, block, and simplex). For the 2 linear methods (least-square and USBM-ISA) a simple geometrical interpretation is outlined and for the direct, non-linear methods (block and simplex methods) the form of the objective functions are presented.

Spatially autocorrelated errors in origin-destination models : a new specification applied to aggregate mode choice

by D. Bolduc, M.G. Dagenais and M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 24 p. Bibliogr. (Publication ; no. 576)
MICROLOG 88-04681 1 fiche

In this study, a first order spatial autoregressive (SAR(1)) formulation to model the correlation among the errors of a linear demand equation that explains origin-destination flows is used. The SAR(1) process splits the error term for each observation into a weighted sum of all the other errors and a purely random noise. The weights are new parametric functional forms defined to measure the proximity between origins and destinations of flows. The parameters of these weights, along with the other parameters of the model, are estimated by the method of Maximum Likelihood. The technique is applied to an aggregate binary Logit share model that explains peak a.m. trips to work in Winnipeg.

Spiny dogfish in Canada

by J. Salsbury. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region ; Vancouver, B.C. : Pacific Region, 1986. xii, 57 p. (Canadian industry report of fisheries and aquatic sciences ; no. 169) ISSN 0704-3694
MICROLOG 88-02623 1 fiche

On both the east and west coasts of Canada, there have been increasing claims that the dogfish infestation problem is so severe government must take action to resolve the problem. This report provides detailed information about spiny dogfish (Squalus acanthias) in Canada to help resolve the debate about whether dogfish is a nuisance or a valuable resource. The report outlines the dogfish issue on the East and West Coasts of Canada, reviews existing biological information on the dogfish resource, documents factors known about harvesting the species, reviews traditional dogfish products and processing techniques, reports on existing and potential market outlets for dogfish products, and outlines options for addressing the dogfish problem facing Canada at this time.

Split delivery routing

by M. Dror and P. Trudeau. Montreal . Université de Montréal, Centre de recherche sur les transports, 1987. 27 p. Bibliogr. (Publication ; no. 507)
MICROLOG 88-00459 1 fiche

Report examining a relaxed version of the generic vehicle routing problem in which a delivery to a demand point can be split between any number of vehicles. Vehicle routes are constructed using heuristic rules and the solution scheme allowing for split deliveries is compared with a similar solution scheme in which no split deliveries are allowed. The comparison is conducted on 6 sets of 30 problems each, with each problem set characterized by different demand parameters for the fixed set of 75 demand points.

Sport catch of Atlantic salmon from Margaree River, Nova Scotia, 1947 to 1987

by G.J. Chaput and R.R. Claytor. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1988. iv, 50 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 678) ISSN 0706-6465
MICROLOG 88-02604 1 fiche

A summary of the sport catch of Atlantic salmon (Salmo salar) from the Margaree River, Nova Scotia, for 1947-87 is presented. Data were collected by Department of Fisheries and Oceans, Conservation and Protection Branch field staff. Summaries include the catch of grilse and multi-sea-winter salmon by week and month, annual and monthly catches from specific river sections as well as the most productive angling pools of the river. In addition, a summary of the estimated size distribution of grilse and multi-sea-winter salmon in the sport catches is included.

Spray applied cellulose insulation for walls

by K. Manning. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1988. iv, 72 p. : ill. ISBN 0-88654-210-3
MICROLOG 88-05143 1 fiche

Study to develop a method for extending the use of weathershield cellulose insulation from an attic loose-fill to exterior wall systems where air leakage is known to be a difficult problem to control using conventional methods. A spray nozzle and application technique was developed which enabled spraying a moist mixture of insulation and adhesive into open stud cavities so as to form in place a free standing, full fitting blanket of insulation. Further laboratory work was done to establish actual moisture content of the installed material and the rate at which the moisture would dissipate from an enclosed wall cavity. Field installations were also undertaken and monitored.

Spring migration of waterfowl in the Yellowknife - Thor Lake area, Northwest Territories, 1987

by J. Sirois. Ottawa : Environment Canada, Canadian Wildlife Service, Western and Northern Region, 1987. vii, 38 p. : ill., maps. Bibliogr. (Technical report series ; no. 32) *CSI 21111.003*. ISSN 0831-6481 ISBN 0-662-15694-3
MICROLOG 88-02242 1 fiche

A survey of migrating waterfowl was conducted from 10-28 May 1987, in the area of the Thor Lake Mine development. Thirteen staging sites in the intervening area between the mine site and Yellowknife were also surveyed. Objectives of the study were: to document the waterfowl species which occur in the area; to determine the distribution (spatial and temporal) and abundance of waterfowl species in the area; and to evaluate the Thor Lake Mine site in a regional context, with regard to migrating waterfowl. A similar survey was completed in 1986. Nearby 32,500 sightings were recorded and a total of 29 species, including 24 waterfowl species, was observed.

State-of-the-art track technology and its application to improve track component performance and track maintenance management

prepared for Transportation Development Centre , by A. Moucessian, et al. Kingston, Ont. : Canadian Institute of Guided Ground Transport, 1987. xvi, 164 p. : ill. Bibliogr. ISBN 0-88911-049-2
MICROLOG 88-03193 2 fiche

Fatigue- and wear-associated defects, plastic flow and the existence of shatter cracks in the steel are the main causes of rail deterioration. Research findings on the degradation nature of each of the track components (rail, tie, ballast, sub-ballast, and subgrade) are reviewed, together with the use of geotextiles in track rehabilitation. The review is extended to methods of performance evaluation and improvement of each track component. Some of the track component degradation processes are then mathematically modelled in a number of computer programs which together make up a track system model that may be used for better and more efficient management of track maintenance.

Statistiques sur la recherche et le développement industriels au Québec, 1986

Québec : Bureau de la statistique du Québec, Statistiques économiques, 1988. 42 p. *CSI 67131.030.* ISBN 2-550-18909-4
MICROLOG 88-05269 1 fiche

Ce rapport statistique présente différents tableaux sur la recherche et le développment (R-D) industriels au Québec en 1986, ainsi que quelques tableaux comparatifs avec le Canada et les autres provinces. L'information est organisée selon la 'Classification type des industries de 1980'. L'information produite touche essentiellement les dépenses en R-D, le personnel affecté à la R-D et le financement de la R-D. Les données proviennent d'une enquête menée par Statistique Canada auprès des sociétés qui font de la recherche et du développement industriels au Canada.

Status of forest fertilization program, N.B. Department of Forests, Mines and Energy

Fredericton . Dept. of Forests, Mines and Energy, Timber Management Branch, 1986. iv, 34 p. : ill. (Technique ; 86:17) *CSI 45113.208.*
MICROLOG 88-01946 1 fiche

Forest fertilization in New Brunswick, as well as the rest of eastern Canada, is still very much in an experimental stage and a large number of localized trials are needed. Trials were established beginning in 1971 and continuing until 1983. This report presents the results of annual measurements for the first 5 years, and then a final measurement at 10 years. The report is to be updated every year. A height-diameter relationship was determined for each stand at fertilization, by measuring the dbh and the total height of two codominant trees per plot, total tree volumes were determined, merchantable tree volumes were calculated and the individual tree basal areas and volumes were used to give plot and treatment totals.

Status of invertebrate fisheries off the Pacific Coast of Canada (1985/86) : proceedings from the Shellfish Stock Assessment Subcommittee meeting, September 2-3, 1986

R.M. Harbo and G.S. Jamieson, editors. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. v, 158 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1576) ISSN 0706-6457
MICROLOG 88-02186 2 fiche

Invertebrate species status reports are given for those species commercially fished in British Comumbia in 1986. These reports were presented to resource managers and provided the biological advice used to establish 1987 shellfish fishing plans. Net, trap, diver and intertidal fisheries are included, as well as specific advice on size limits for pink and spiny scallops and on historical review of the use of size limits in the region's intertidal clam fisheries. This is the first annual report of the Shellfish Stock Assessment Subcommittee of the Pacific Stock Assessment Review Committee (PSARC) and as such, is the base document which will be updated in the provision of advice in future years.

Le Statut du suceur cuivré *Moxostoma hubbsi*, au Canada

par J.R. Mongeau...et al. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction de la gestion des espèces et des habitats, 1987. 19 p. : ill. Bibliogr. ISBN 2-550-17751-7
MICROLOG 88-03506 1 fiche

La suceur cuivré est exclusif aux eaux canadiennes. Sa répartition géographique est extrêmement limitée; il ne se retrouve que dans quelques rivières des terres basses du sud-ouest du Québec. Très fécond et longévif, il est malgré tout très peu abondant dans toute son aire de répartition. Le résultat des fouilles archéologiques laisse supposer qu'il a déjà été plus abondant. La pollution des eaux ainsi que la détérioration de son habitat semblent être les principaux facteurs responsables de son déclin. A la suite de l'analyse rapportée dans ce document, on recommande que le suceur cuivré obtienne le statut d'espèce menacée.

Steam injection experiments in scaled physical models : final report, 1985-87

by S.M.F. Ali...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. xxvi, 459 p. : ill. Bibliogr. *CANMET contract: OST85-00196.*
MICROLOG 88-03907 6 fiche

Steam injection is currently responsible for the production of over one million barrels/day of heavy oil. There are two principal variations of steam injection: cyclic steam stimulation, which has been success in Cold Lake oil sands formations, and is the only proven commercial heavy oil recovery method to-date for that area, and steamflooding, which has been highly successful in California, and is lately finding application in Saskatchewan. This final report covers July 1, 1985 to June 30, 1987 of the subject project. During this period, the work initiated in Phase I was continued, with minor changes in the original apparatus and numerous experiments conducted. Work was also continued on numerical simulation, with features such as foam flow and bottom water. Three papers on the experimental work were presented during this period, which are included. The work completed to date has pointed the way for Phase III of this project.

Steelhead harvest analysis, 1986-87

by S.J. Billings. Victoria : Ministry of Environment and Parks, 1988. 46 p. : ill. (Fisheries technical circular : no. 81)
ISSN 0319-9436
MICROLOG 88-04629 1 fiche

Since 1966, all anglers fishing for steelhead in the province have been required to purchase a steelhead licence and punchcard in addition to their basic angling licence, providing an opportunity for fisheries biologists to evaluate the steelhead trout sport fishery by conducting a mailout questionnaire survey of steelhead anglers. Those steelhead which escape the commercial fleet and Indian food fishery are available to the sport angler who is presently the only user group whose 'take home' catch can be easily regulated to ensure that enough steelhead survive to spawn. This report details the results of the 1986-87 Steelhead Harvest Questionnaire, as well as presents a comparative summary of previous years' data Included is a review of the 1987 juvenile stock monitoring program, as well as trends and forecasts of winter-run steelhead at the Keogh River, with predictions based on life history studies conducted since 1975.

Stewardship and opportunity : report of the Ministerial Task Force on Heritage Conservation

Project Pride Task Force (B.C.). Victoria : Ministry of Tourism, Recreation and Culture, 1987. 102 p. ISBN 0-7726-0723-0
MICROLOG 88-01708 2 fiche

A review of heritage legislation, policy and programs in British Columbia based on a consultation process of 388 submissions from a variety of organizations and individuals. Submissions contained discussions of the following subjects: Native heritage, archaeology, palaeontology, natural heritage, heritage landscapes, heritage trails, industrial heritage, maritime heritage, multiculturalism, archives, museums, historic sites, heritage tourism, education, compensation, legislation, roles of government, privately owned heritage resources, incentives for heritage conservation, British Columbia heritage trust, heritage conservation branch, organizational delivery, and special site issues. Investigates heritage conservation, its rationale, scope and principles of development, including conceptual and special issues. This discussion provides a background to understanding how the province and the public can cooperate on leadership policies for stewardship, through education and from the support of various government and private non-profit entities. Includes a discussion of the role of various levels of government in achieving leadership and makes recommendations.

Stochastic models for bulk inventories in transportation terminals

by N.D. Pizzolato and J. Ethier. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 56 p. : ill. Bibliogr. (Publication ; no. 565)
MICROLOG 88-03984 1 fiche

This research examines the problem of mathematical modelling of bulk inventories in transportation terminals given two arrival distributions: trains that resupply and ships that deplete the terminal. Two sets of models are proposed, both based on Markov chains. The first simply forecasts inventory levels. The second helps design the terminal, assuming it is composed of two sectors, a main and a reserve one which handles at a lower cost the excess of stock. Both models are applied to real situations encountered by the Quebec Cartier iron ore terminal.

Stock assessments for British Columbia herring in 1986 and forecasts of the potential catch in 1987

by V. Haist and J.F. Schweigert. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. ix, 63 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1929) ISSN 0706-6473
MICROLOG 88-00939 1 fiche

Report presenting the 1986 herring stock assessment in British Columbia waters, with forecasts for 1987. Methods used include an escapement model analysis and an age-structured model analysis. The escapement model was modified to introduce age structure information and explicitly separate growth and recruitment. The age-structured model was modified to incorporate an availability term to estimate partial recruitment. Diving spawn survey data were incorporated into the escapement model wherever available. Forecasts of pre-fishery biomass were obtained by weighting the estimates from the two models.

Stomach contents of salmonids and other fishes captured in Masset Inlet, B.C., in 1983, 1984, and 1985

by N.B. Hargreaves...et al. Nanaimo, B.C. Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 116 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 693) ISSN 0706-6465
MICROLOG 88-05736 2 fiche

Summary of data concerning the stomach contents of salmonids and other fishes captured in Masset Inlet, B.C. from 1983-85, obtained as part of a larger study designed to investigate the mortality of juvenile pink and chum salmon. Stomach contents sampling identified potential predators and assessed the possibility that predation was an important source of mortality of juvenile salmon during the early sea-life period. The majority of the predators were captured with beach seines, with sampling beginning in March or early April and continuing until early July each year. Some additional samples of potential predators were collected each year with other types of fishing gear.

Stopping air pollution at its source : clean air program : discussion paper

see Discussion paper : air pollution : general regulation (regulation 308)

Stopping water pollution at its source : evaluation of municipal sewer use control options, phase 1 : control practices in Europe, USA, Canada and Japan

prepared by M.M. Dillon Limited ; for Environment Ontario. Toronto : Environment Ontario, 1987. ii, 295 p. : ill.
MICROLOG 88-01482 4 fiche

As part of the Municipal/Industrial Strategy for Abatement, this study explores the options available to the Province and the municipalities to control the discharge to (or use of) municipal sewers. The study addresses the cost, achievability and effectiveness of the various options as seen by experience in the United States, Japan, United Kingdom, France and Germany, as well as various Canadian provinces and municipalities. Control options were identified for further detailed comparative analysis in the 2nd phase of the study. Information was obtained by interviews of agencies responsible for setting, implementing or enforcing regulations. The jurisidictional authority for sewer use control in Ontario was reviewed and data on sources and quantities of sewage produced and treated in Ontario is included. A short discussion of the technical, economic and legislative effectiveness of options is also presented.

Straight methanol and vehicle evaluation, phase 3 : further durability testing of a fleet of methanol-fuelled vehicles

prepared for D. Elliott ; prepared by D.K. Mitchell ; participating agencies Shell Canada Limited...et al.. Downsview, Ont. : Transportation Energy Management Program ; Ontario Ministry of Transportation and Communications, Transportation Technology and Energy Branch ; Ontario Ministry of Energy, 1986. v, 89 p. Bibliogr.
MICROLOG 88-00444 2 fiche

Phase 3 of a long-term program to evaluate the performance of methanol-fuelled vehicles. Six Ford Escorts modified by the manufacturer for near-neat methanol fuel were used in short-trip operation for approximately nine months by Shell Canada. Pairs of vehicles were run with three different engine oil formulations designed to control engine wear. The vehicle engines were stripped and measured at the beginning and end of the period so that direct assessment of wear could be made. This was supplemented with regular sampling and analysis of the oil to check for trace wear metals and deterioration of lubricant quality. A range of methanol fuel compositions containing from 78% - 90% methanol was used and the volatility was seasonally adjusted with the addition of gasoline, as well as, in some cases, dimethyl ether.

A Strategic plan for microcomputers in schools

Alberta. Curriculum Support Branch. Edmonton : The Branch, 1987. 70 p. ISBN 0-920794-82-3
MICROLOG 88-00741 1 fiche

A synthesis of studies on computers in Alberta's schools as well as an assessment of the current situation in the schools and a recognition of the difficulties of the current fiscal climate. Discusses risks and constraints, strategic planning, educational software, curriculum and learning resources, teacher knowledge and development, computer hardware, networking, and facilities, planning and research, and funding. The conclusion sets out a summary of Departmental direction and actions.

Strategies for a smoke-free world : a report of the International Workshop on Smoking and Health, Calgary, Alberta, 1985

organized by the Health Promotion Directorate, Health and Welfare Canada and The Alberta Alcohol and Drug Abuse Commisson in co-operation with the World Health Organization Program on Smoking and Health. Calgary, Alta. : Alberta Alcohol and Drug Abuse Commission, 1986. Bibliogr.
MICROLOG 88-05716 1 fiche

The addictive properties of tobacco cause people to continue smoking, even when they recognize the health consequences and would like to stop. Since few people smoke in moderation, there are inevitable and usually serious health consequences for virtually all users. This report of the workshop is an attempt to capture the tone of the discussions and to synthesize the major themes. It is written with three purposes in mind: to define further the issues in tobacco control from an international perspective; to foster political will to act on these issues; and to identify ways that the International Council on Alcohol and Addictions, and other addictions agencies, can contribute to tobacco control, in collaboration with other organizations and groups.

Strathcona design brief : amendment-cell 'H'

Calgary (Alta.). Planning and Building Dept., Calgary : The Dept., 1987. 21 p. : maps.
MICROLOG 88-01090 1 fiche

City Council adopted the Strathcona Design Brief at a public hearing held February 17, 1976. At that time, cells H and I were designated as areas requiring further study, and land use approvals were deferred pending resolution of storm and sanitary sewer and water services, a southwest roads study, and the effects of Sarcee Military Camp's firing ranges. With these problems resolved, this ammendment now deals with land use in the area, including proposed land uses (residential, open space, commercial and industrial), community services, municipal services and shallow utilities, and the transportation system.

Stream channel morphology : major fluvial disturbances in logged watersheds on the Queen Charlotte Islands

by R.G. Roberts. Victoria : Ministry of Forests and Lands, 1987. vii, 72 p. : ill. Bibliogr. (Land management report ; no. 48) ISSN 0702-9861
MICROLOG 88-03233 1 fiche

Reconnaissance investigations of disturbed stream habitats early in the Fish/Forestry Interaction Program studies identified extensive, recently accumulated sediments in mid-reaches of some streams. From historical air photo and land use studies it was determined that the sediment wedges were initiated by streamside and in-stream logging practices before 1970. A long term sediment budget was estimated for each basin to determine the relative importance of adjacent stream bank erosion (on-site land use effect) and other sediment sources - including off-site land use effects - in contributing to the sediment wedges. The most significant sediment sources in each basin were assessed in the field: minor sources were estimated from regional results.

Strength and stability of Railroad Ballast System

prepared for Transport Canada, Transportation Development Centre ; prepared by C.R. Duggan, J.F. Scott, C.J. Dalton. St. Laurent, Que. : CN Technical Research Centre, 1985. x, 37 p. : ill. *TP 7219E.*
MICROLOG 88-00316 1 fiche

The construction industry using aggregates for road beds, asphalt and concrete materials has established a set of tests and standards to obtain suitable materials to meet their needs. Generally, the aggregates used in road beds, concrete and asphalt do not experience the severe service conditions of aggregates used for railway ballast. The purpose of this investigation was to determine the effect of certain factors, namely gradation, degree of compaction, shape and surface texture on the shear strength of ballast. A series of laboratory tests was performed on four different aggregates to quantify the effect these factors have on shear strength.

Studies of the effects of acidification on aquatic wildlife in Canada : waterfowl and trophic relationships in small lakes in northern Ontario

by D.K. McNicol, B.E. Bendell and R.K. Ross. Ottawa : Canadian Wildlife Service, 1987. 76 p. : maps. Bibliogr. (Occasional paper ; no. 62) *French ed. (Etude des effets...) on the same fiche.* ISSN 0576-6370 ISBN 0-662-15213-1
MICROLOG 88-00405 2 fiche

First report of a series begun in 1980 to assess the impacts of acid deposition on wildlife and wildlife habitats in eastern Canada. The distribution, density and habitat preferences of waterfowl were examined throughout much of northeastern and central Ontario using aerial survey counts of indicated nesting pairs. In 1983, tropic relationships were studied on 123 small headwater lakes at different stages of acidification. Data on water quality, fish and macroinvertebrate community composition and waterfowl productivity were collected from an acid-sensitive area receiving moderate amounts of atmospheric pollutants (Ranger Lake) and a heavily acid-stressed area (Wanapitei) of northeastern Ontario. Lake environments were categorized by factor analysis into atmospheric deposition status, ionic strength, eutrophication and lake morphometry.

Studies on the reproductive biology of Pacific cod and English sole in Hectate Strait from the cruise of the *FR/V W.E. Ricker*, November 25-29, 1986

by A.V. Tyler...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iv, 43 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1937) ISSN 0706-6473
MICROLOG 88-00943 1 fiche

Report on the first in a series of cruises to investigate aspects of the reproductive biology of Pacific cod and English sole, important components of the multispecies trawl fishery in Hecate Strait, British Columbia. The program documents spawning timing and location, the rate of oocyte development, whether spawning time depends on size of fish, water temperature, or stock density, the differences, if any, in response between the Hecate Strait stock and the LaPerouse stock, and fecundity. The investigation of maturation cycle was carried out through histological preparations and ovary weighing. Fecundity was investigated by freeing oocytes from ovarian tissue and counting subsamples. A report is presented on length-frequency distributions, percentage mature ogives, length-weight data, and ovary weight-fish data.

A Study of aggregate bi-modal urban travel supply, demand and network behavior using simultaneous equations with autoregressive residuals -- Rev.

by M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 62 p. Bibliogr. (Publication ; no. 88) (Cahier ; no 7713) (Discussion paper ; no. 290)
MICROLOG 88-06331 1 fiche

Formulation and estimation of the parameters of travel demand, supply and cost functions in an urban context. Four aggregate demand, supply and cost models are formulated: each one regroups a subset of demand, supply and cost function for 2 modes in Montreal. A significant part of the analysis pertains to the study of regulated transit supplier. The parameters of all models are estimated by at least 2 of 4 limited-information and full-information estimation techniques. A sample comparison of results obtained by IFIVER and other full-information estimators is also provided.

Study of chemithermomechanical pulp (CTMP) production potential for Alberta

Ekono Consultants Ltd. ; a joint publication of the Canadian Forestry Service and the Alberta Forest Service pursuant to the Canada-Alberta Forest Resource Development Agreement. Edmonton : Canadian Forestry Service ; Alberta Forest Service, 1986. iv, 25, 8 p. ISBN 0-662-15045-7
MICROLOG 88-00664 1 fiche

The Province of Alberta identified several timber development areas that contain reserves of timber which could support a chemithermomechanical facility. This report presents the results of a study to determine the production potential, to assess current and future markets as well as industrial developments globally, and to assess Alberta's competitive position as a supplier. A list of chemithermomechanical mills is included.

A Study of flow conditions arising in horizontal coarse slurry short distance pipelining practice : final report

by R.G. Gillies, W.H.W. Husband, and M.H. Small ; for Shook Consulting Ltd., Saskatoon, Sask. : Saskatchewan Research Council, 1985. 2 v. *CANMET contract: OSQ84-00381.*
MICROLOG 88-01192 2 fiche

With growing interest in pipeline transportation of slurries of coarse coal, a reliable method is required to extend available data. Tests were conducted in a 250 mm diameter (nominal) horizontal pipeline loop using coarse coal-in-water slurries and coarse sand-in-water slurries. Pressure gradients, concentration profiles, particle velocity distributions and delivered mixture concentration were determined as functions of slurry flowrate and pipeline in-situ concentration. The results of both are presented in the two volumes of this report. The results of the pipeline loop tests were applied to improve the two-layer model for flow of slurries in pipelines. The model development work is also presented, as are the test results of a probe for measuring point values of solids concentration which was tested in a 495 mm diameter pipeline.

A Study of groundwater-surface water interaction in the Winter River, Prince Edward Island using seepage meters and mini-piezometers

by F.B. Cruickshanks, R.M. Francis and D.E. Jardine. Dartmouth, N.S. : Inland Waters/Lands, Atlantic Region, Water Planning and Management Branch, 1988. viii, 40 p. : ill., maps. Bibliogr. *Technical bulletin IWD-AR-WPMB-88-135.*
MICROLOG 88-03018 1 fiche

There is concern that municipal groundwater withdrawals from the Brackley and Union well fields in the Winter River basin, Prince Edward Island, may be diverting baseflow from the Winter River. Consequently, a field study, using seepage meters and mini-piezometers, was undertaken to measure zones of groundwater recharge and discharge through the bed of the Winter River from Brackley to Suffolk, a distance of nearly 17 kms. Also examined was the groundwater-surface water interaction occurring under the experimental conditions of excessive pumping and non-pumping in the Brackley and Union well fields. A field test of precipitation versus seepage flux response indicated no significant correlation with a small rainfall event.

Study of perchloroethylene still bottom residue wastes associated with the Alberta dry cleaning industry

by T. Trimble and M. Cubrilo. Edmonton : Alberta Environment, Pollution control Division, Waste Management Branch, 1987. 12 p.
MICROLOG 88-00491 1 fiche

During the summer of 1986, the Waste Management Branch of Alberta Environment undertook a study to determine the waste handling practices of the dry cleaning industry in Alberta. Tetrachloroethylene, more commonly known as perchloroethylene or "perc", is the cleaning solvent used by the majority of the dry cleaning industry. This solvent, and still bottoms resulting from the recovery of these solvents, are listed in Schedule II, of the Transportation of Dangerous Goods Regulations (TDGA). Under Alberta legislation they will be considered a hazardous waste and require proper disposal. The study focused on still bottom residue wastes generated by the industry and involved inspecting over 170 dry cleaners across Alberta and collecting 97 samples of still bottom residues from various dry cleaners. These samples were analyzed for perc concentration.

Study of photosynthetically active radiation and leaf development in a *Salix* energy plantation

by B.J. Dowsley. St. John's : Newfoundland Forestry Centre, 1987. iv, 40 p. : ill. Bibliogr. (Information report ; N-X-261) ISSN 0704-7657 ISBN 0-662-15717-6
MICROLOG 88-02373 1 fiche

This part of a research project into the possibilities of willows as an agroforestry crop, models the potential growth with respect to climatic factors in plantation environments, to predict the potential biomass production. Nilssons's (1963) equation, $LA=c\ H\ D$, where LA is shoot leaf area, H is shoot length, D is shoot basal diameter and c is a coefficient, was tested on one year old shoots of *Salix alba* grown at an experimental energy plantation site in central Newfoundland during July and August 1986. The coefficient ($c=0.67$) was derived from destructive measurements of shoot height and diameter, and the equation accurately predicted leaf area during the study period. Measurements of photosynthetically active radiation at the plantation site are also presented.

A Study of standing committees

by T.J. Wild. Edmonton : Legislature Library, 1988. 30 p. Bibliogr.
MICROLOG 88-05746 1 fiche

Because of a number of prevailing factors, the role of the standing committees is extremely limited. However, despite the limitations, standing committees continue to be important, but not in the sense of policy activism. Standing committees may serve to help partially in the enforcement of minority rights inherent in democratic theory as applied to partisan politics, and they may serve the twin pillars of participation and efficiency. This essay discusses the issue of standing committees in the Legislative Assembly of Alberta.

Study of the effect of titanium and sulphur on the toughness properties of weld metal deposits from low hydrogen

prepared for Canadian Liquid Air Ltd., R & D Research Laboratory ; by Sylvain St-Laurent, Larry Cutler, Gilles L'Esperance ; submitted by le Centre de développement technologique de l'Ecole polytechnique de Montréal. Montreal : Centre de développement technologique de l'Ecole polytechnique de Montréal, 1987. 250 p. : ill. *CANMET contract: 1SQ85-0222*
MICROLOG 88-01685 3 fiche

The possible development of welded structures for the Arctic environment has increased the notch toughness requirements, which must be achieved consistently. This report presents a literature review and experimental work on the use of shielded metal arc welding (SMAW) procedures to guarantee Charpy V-notch toughness of 27-50 J at -60C. The work also centered on the as-deposited area of the weld metal as it is usually the area exhibiting the lowest toughness values. A special welding procedure was developed to allow notch toughness samples to be taken from welds with largest amount of as-deposited metal possible, and the results obtained from this procedure were compared with those obtained with a standard multipass welding procedure for all weld metal deposits (CSA type). In addition, the role played by alloying additions on the microstructural development and on weld metal toughness was tested, using 3 titanium levels, 3 sulphur levels for a given amount of titanium and 2 strong deoxidants.

The New Brunswick Department of Municipal Affairs and Environment conducted a variety of monitoring surveys which include evaluation of lead concentrations in the province. In this submission, a description of lead information available from the Department, sources of information and a few examples of data are presented. The Department's lead data include information regarding air quality, industrial effluents, sanitary wastes, drinking water, surface water quality and uptake by biota.

Subtour elimination algorithms for the symmetrical travelling salesman problem and its variants

by G. Laporte and Y. Nobert. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 13 p. Bibliogr. (Publication ; no. 161)
MICROLOG 88-06433 1 fiche

Several routing problems are shown to have the same structure, with methods for their solution built around algorithms for the symmetrical travelling salesman problem. All problems are formulated as integer linear programs and constraint relaxation is used for their solution. This paper examines 3 basic cases: the m-travelling salesman problem; the truck dispatching problem; and the problem of finding the best depot location for the m-travelling salesman problem.

Suburban residential density standards

Regina : Regina, Urban Planning Dept., 1988. 27 p. ill.
MICROLOG 88-05772 1 fiche

This study arose from the recognition that density objectives set in the 1979 Development Plan have not been met. The study's purpose is to review and determine achievable residential standards, that will provide for a good living environment with affordable urban infrastructure. Its aim is to expose the conclusions reached for a wider discussion and debate, and to establish the linkage between this subject and the other studies, actions or initiatives that are being or will be undertaken.

Suicide in Saskatchewan : the alcohol and drug connection, 1988

Regina . Saskatchewan Alcohol and Drug Abuse Commission, 1988. 25 p. : ill. Bibliogr. *CSI 72214.200.*
MICROLOG 88-05623 1 fiche

The connection between suicide and alcohol and drug abuse is undeniable; however, the precise nature and extent of the relationship has eluded researchers. In 1986, the Saskatchewan Alcohol and Drug Abuse Commission undertook a research study to understand the relationship between substance abuse and suicide. The Commission was granted special permission to investigate the case records kept by the Office of the Coroner. All suicides in 1985 and 1986 were included in the study. Researchers compiled information reported by the coroners on the background of the suicide victim, particularly that pertaining to alcohol and drug abuse. This report presents the results of that investigation, and focuses on alcohol and drug involvement in suicide.

Sulphur and metals capture during combustion of Syncrude coke in a circulating fluidized bed combustion

by C.A. Hamer and D.T. Liang. Ottawa : Canada Centre for Mineral and Energy Technology, 1985. 12 p. : ill. Bibliogr. (Report ; MSL 85-158(TR))
MICROLOG 88-03894 1 fiche

The Mineral Sciences Laboratory (MSL) has been involved for several years in developing a method for and in evaluating limestones as sorbents for SO2 capture in fluidized bed combustion. Recently a pilot-scale circulating fluidized bed combustor was designed, built, and put into operation in MSL. The unit was built to investigate emissions of SO2, heavy metals, their capture with sorbents, and their corrosive effects. The first project for this unit is an investigation of the combustion of Syncrude by-product petroleum coke. This paper describes the circulating fluidized bed combustor as well as some of the results and problems.

Summary report : computer program for aerodynamic analysis of vertical axis wind turbine

by R.J. Kind and K.N. Goddard. Ottawa : National Research Council Canada, Division of Energy, Wind Energy Program, 1982. x, 45 p. : ill. Bibliogr. (Technical memorandum , TM-WE-013)
MICROLOG 88-04465 1 fiche (Available on fiche only)

A computer program for the aerodynamic analysis of vertical axis wind turbines (VAWT) was developed. The program was designed to provide maximum flexibility and ease of use. It is operated interactively and little familiarity with computers is required of the user for successful running. This document provides an overview of the program and its capabilities presented as a description of the various configurations of VAWT that can be analyzed, a brief review of the aerodynamic theory used in the analysis, and a description of the computer programs' structure and usage.

Superconductivity : recent developments and defence applications

by R.W. MacPherson. Ottawa : Canada Dept. of National Defence, Research and Development Branch, 1988. v, 27 p. Bibliogr. (CRAD report ; 1/88)
MICROLOG 88-05995 1 fiche

Recent advances in superconductivity have led to much speculation about the possible applications of the new technology to all walks of life, including the defence sector. This paper is based on ideas submitted by DRE and CRAD/HQ scientists who responded to a request to identify potential applications of the new superconductors to defence. Additional information came from a selection of magazine and journal articles, current as of the end of 1987.

The Supervisory officer in Ontario : current practice and recommendations for the future

by M.G. Fullan, P.B. Park and T.R. Williams. Toronto : Ministry of Education, 1987. xiii, 240 p. Bibliogr. *Onteris : ON03704. French ed. (L'agent de supervision...) : 88-00669/5.*
ISBN 0-7729-2717-0
MICROLOG 88-00668 3 fiche

This report summarizes a two-year study of supervisory officers in Ontario from both a policy objective and empirical standpoint. The research focuses on what supervisory officers do, what skills they need, how they are prepared and selected, and how they experience the job in terms of satisfaction and effectiveness. Recommendations for improvement address the issues of: training, certification, selection and professional development. A stratified sample of 25 boards and 4 ministry offices was selected for in-depth study with data gathered through interviews, primarily with supervisory officers, supplemented by a literature review.

Supplement to the estimates, fiscal year ending March 31, 1989

British Columbia. Ministry of Finance and Corporate Relations. Victoria : The Ministry, 1988. 105 p. : ill. ISSN 0712-4597
MICROLOG 88-03269 2 fiche

This publication provides supplementary detail on proposed voted expenditure for all special offices, ministries and other appropriations of the Government of British Columbia. In the Estimates, voted expenditure is classified for each vote and sub-vote by group accounts. These group accounts represent broad functional categories of expenditure (Salaries and Benefits, Operating Costs, Asset Acquisitions, Grants and Contributions, Other Expenditures and Recoveries). Each group account is comprised of several specific components of expenditure referred to as standard objects of expenditure.

Support systems for learning : finance

by J. Cutt...et al. Victoria : British Columbia Royal Commission on Education, 1988. iii, 104 p. (Commissioned papers ; v. 5) ISSN 0840-5069 ISBN 0-7726-0843-1
MICROLOG 88-05798 2 fiche

This report begins by outlining briefly the system of education finance as it exists now by describing the pre-1982 system, and by pointing out those changes made in 1982 which had such an impact on the following years. Also provided is a profile of education spending and provincial economic performance for the past 12 years. The issues related to the raising of revenue for education, specifically in the area of property taxation are addressed along with the adequacy and stability of funding, with emphasis on the fiscal framework, the sharing ratio, and collective bargaining. In addition, the report examines the structures and processes in terms of efficiency, effectiveness, and cost-effectiveness. The results of an in-depth survey of fifteen school districts is presented in this same chapter. The remaining concerns, the public funding of independent schools, capital grants, and demographic trends, are outlined briefly in the last chapter.

Surface treatment test sections with polymer-modified emulsified asphalt

by R.C. Aquin, P. Korgemagi and D.F. Lynch. Toronto : Engineering Materials Office, 1988. i, 16 p. : ill. (Materials information report : MI-116) ISBN 0-7729-4060-6
MICROLOG 88-03974 1 fiche

Modification with polymer enhances the low and high temperature properties of asphalt cement and surface treatments constructed with polymer-modified binders are claimed to provide better initial and long term aggregate retention, increased resistance to flushing and longer surface treatment life. Eight surface treatments were placed using polymer-modified high float emulsion in Northern and Northwestern Regions in 1987 as part of the routine construction and maintenance surface treatment programs. Special criteria were not used when selecting the locations. Styrelf HF-150P emulsified asphalt was used on all the 1987 trials to determine if polymer-modified high float emulsions could be used under normal construction procedures and to monitor the claims of improved performance. The control sections were built with standard HF-150S emulsified asphalt next to the trial sections. The trial and the control sections will be monitored for performance annually.

A Survey of mineral industry attitudes toward mineral exploration and development in New Brunswick and Nova Scotia

John A. Leslie and Associates. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1988. vi, 81 p. (Open file report ; 88-16) ISSN 0712-4562
MICROLOG 88-06220 1 fiche

The Canadian mineral industry was surveyed regarding its attitude towards mineral exploration and development in New Brunswick and Nova Scotia. Announcements of significant gold discoveries in New Brunswick and Nova Scotia over the past couple of years have seemingly not created the interest that comparable results have achieved in other regions of Canada. It was, therefore, thought timely to ascertain the industry's attitude towards the region from a national perspective. A combined mail and telephone survey was undertaken. Results indicate that collection of geologic data, financial considerations, governmental action and information regarding the activities of both government industry are among the factors. The report points out issues requiring remedial action.

Survey of shallow benthic habitat : eastern shore and Cape Breton, Nova Scotia

by D.S. Moore, R.J. Miller and L.D. Meade. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Scotia-Fundy Region, Halifax Fisheries Research Laboratory, 1986. vii, 49 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1546) ISSN 0706-6457
MICROLOG 88-02266 1 fiche

During 1984-85, 2,000 km of the Nova Scotia coast from Ship Harbour to Bay St. Lawrence were surveyed to determine the area of habitat sea urchins and seaweeds share, sea urchin size frequencies and biomass, the extent of sea urchin mass mortalities, the extent of colonization by seaweeds, the physical characteristics of the habitat, and summer-autumn temperature regimes. The length of shoreline bordered by rocky sublittoral was determined by cruising the shore in an outboard runabout. Divers recorded depth, distance from shore, substrate type, percentage bottom cover by seaweeds, dominant seaweed taxa present, and sea urchin density at 1,044 stations on 59 transects. Urchin size frequency and biomass were measured on 11 transects, and recording thermographs were moored at five sites.

A Survey of trumpeter swans and their habitat in southern Mackenzie District, Northwest Territories, 1986

by K.J. McCormick and L.J. Shandruk. Ottawa : Canadian Wildlife Service, Western and Northern Region, 1987. v, 44 p. : maps. Bibliogr. (Technical report series ; no. 26) ISSN 0831-6481
MICROLOG 88-02069 1 fiche

Trumpeter swans were surveyed and captured from July 27 to August 2, 1986 to determine distribution and abundance. Key morphological characteristics were measured on twenty adult swans to confirm that they were trumpeter swans. Captured swans were also banded and collared to determine migration routes and wintering areas.

Survey of wood fuel use in Prince Edward Island, 1986-87

by S.H. Bennie. Charlottetown : P.E.I. Dept. of Forestry and Energy, 1987. vi, 33 p. *CSI 61111.002.*
MICROLOG 88-01514 1 fiche

Fifth in a series of fuelwood surveys, conducted in May 1987 and designed to determine the number of households burning wood for space heating requirements, the primary wood burning appliances used by the households, the sources of the fuelwood, the consumption of the fuelwood, and the trends and variations based upon data from all 5 studies. In addition, this study includes a determiniation of the effect, if any, of relatively lower prices of residential fuel oil, security of supply of hardwood and softwood, the major advantages and disadvantages of heating with wood, and demographic factors of woodburners.

Survey report : air quality survey (TAGA), PPM Canada Inc. (PCB Destruction), Reliance Electric, Stratford, Ont., Sept. 1987

by G.B. De Brou. Toronto : Ontario Ministry of the Environment, Air Resources Branch, 1988. 26 p. (Report ; ARB-162-87) ISSN 0824-880X ISBN 0-7729-3231-X
MICROLOG 88-05030 1 fiche

In September 1987, the mobile TAGA (3000) unit conducted an air monitoring survey at Reliance Electric. The survey objective was to monitor the air downwind of PPM's mobile PCB destruction unit and determine if the destruction process led to contamination of the surrounding air with PCBs. The TAGA unit provided on-site monitoring for selected PCBs during the entire destruction procedure. A total of 150 2-minute air was screened for selected PCBs.

Suspended solids in liquid effluents : a literature survey

by J.J. McGrath. Ottawa : Atomic Energy Control Board, 1988. vii, 80 p. Bibliogr. (Research report ; INFO-0272)
MICROLOG 88-06127 1 fiche

An international non-Canadian survey of the published scientific and technical literature was conducted, supplemented by a letter and telephone survey of nuclear utilities and regulatory agencies around the world. The material received consisted of over 300 published papers, and responses from twenty countries which were synthesized to provide a core of technical data on the origin, nature, character and amount of suspended solids contained in routine low level radioactive liquid wastes released from nuclear power stations. Other aspects examined included the treatments for removal of these materials, their fate in the environment once released and the regulatory policy of national authorities in control of suspended solids in liquid wastes.

Système d'injection propane/diesel pour moteur de camion diesel

par F.W. Eyre et P. Nikolaiczuk. Ottawa : Centre de développement des transports, 1986. xi, 14 p. : ill. *TP 7709F. L'éd. anglaise (Propane/diesel injection system...) sur la même fiche.*
MICROLOG 88-00345 1 fiche

Le propane est normalement alimenté à basse pression dans le moteur à travers le collecteur d'admission, un procédé qu'on appelle l'aspiration. Cette technique pourrait s'avérer négative dans le cas des moteurs diesel et aurait pour résultat un allumage incomplet et une durée de vie réduite du moteur. Cette étude de développement portait sur l'injection du propane liquide à haute pression introduit directement dans la chambre de combustion d'un moteur diesel dont l'allumage était déclenché par une injection pilote de carburant diesel No. 2.

Tax reform : perspectives on the White paper

edited by Edward A. Carmichael. Toronto : C. D. Howe Institute, 1988. vi, 108 p. : ports. (Policy study ; no. 4) ISSN 0832-7912 ISBN 0-88806-177-3
MICROLOG 88-01824 2 fiche

The urgency to undertake reform has increased over the past decade, as most major industrialized countries embarked on reforms that lowered individual and corporate tax rates, broadened tax bases, and increased emphasis on sales or value-added taxes. The White paper proposes these basic reforms and this document reviews the tax reforms' impact on individuals, and on business. Also reviews the possible effects on Canada's tax competitiveness with the US, the impact on government finances, and sales tax reform.

Tax reform 1987 : a summary for taxpayers

Canada. Dept. of Finance. Ottawa : The Dept., 1987. 46, 48 p. : ill. *Bilingual (Réforme fiscale 1987...).*
MICROLOG 88-01274 2 fiche

The mandate of the reform is to create a fairer, more understandable system that encourages initiative, strengthens competitiveness, growth and job creation, and a reliable and balanced source of revenues to finance essential public services. The reforms outlined in this report are designed to lower tax rates and to broaden the tax base. This book provides a general summary of tax reform measures for Canadians. It outlines the main benefits of tax reform for Canadian families and individuals and the impact on Canadian corporations. Describes the basis on which discussions are proceeding to develop a fairer, more effective sales tax system.

Tax reform 1987 : tax treatment of farm losses

Canada. Dept. of Finance. Ottawa : The Dept., 1987. 17, 18 p. *Bilingual (Réforme fiscale 1987...).*
MICROLOG 88-01279 1 fiche

The June 1987 White Paper on tax reform put forward several proposals concerning the tax treatment of farm losses. These proposals provided objective tests for determining the extent to which farm losses could be deducted against other sources of income and proposed new accounting rules for farmers. This document sets out the details of the approach which will be used in further consultations considering tax measures for farm losses, and provides background information on the current issues surrounding the tax treatment of farm losses. Discusses the "profit test", the gross revenue test, start-up farmers, calculation of farm income and losses via the Commons Committee approach and an alternative approach (cash accounting with inventory adjustment).

Taxation and savings in Canada

by C.M. Beach, R.W. Boadway and N. Bruce. Ottawa : Economic Council of Canada, 1987. xvi, 144 p. Bibliogr. *French ed. (La fiscalité et l'épargne...) : 88-02937/2.* ISBN 0-660-12552-8
MICROLOG 88-02938 2 fiche

This paper is one of the outputs from the Council's three-year study of the taxation of capital income, of the income derived from savings and investments and how fiscal policies affect individual savings. The study begins with a review of the conventional life-cycle theory of savings behaviour and an analysis of the manner in which taxes affect the life-cycle pattern of savings and consumption. Discusses institutional aspects of taxation and savings in Canada, through surveys of the relevant provisions of the tax system as they affect capital income. Summarizes activities in aggregate savings and estimates aggregate consumption functions. The functions are then used for two types of simulation models: impact effects of interest-rate changes on consumption and savings, and the long-run effects over the remainder of the life-cycle resulting from permanent tax reforms. Discusses welfare economics and policy issues surrounding the taxation of capital income under the personal income system, outlining equity and efficiency differences between income and consumption taxation.

Technical evaluation of the Waterloo fast pyrolysis process

prepared for Bioenergy Development Program, Renewable Energy Branch, Energy, Mines and Resources Canada ; prepared by Waterloo Research Institute, Donald S. Scott, principal investigator. Ottawa : Energy, Mines and Ressources Canada, 1987. xvi, 210 p. ISBN 0-662-15614-5
MICROLOG 88-01582 3 fiche

Evaluation of the fluidized bed fast pyrolysis process for the thermal conversion of biomass to liquids being developed at the University of Waterloo. Optimal operating conditions for the maximum yield of liquids from hardwoods or softwood were determined by statistically designed experimentation in a 3 kg/hr reactor, the nature of the liquid product was characterized and from 80%-90% of the composition quantitatively identified. Similar studies were done for some commercial celluloses. Scale-up criteria for shell fluidized beds were studied and the results used to develop a model of the fluidized bed reactor process. A preliminary study of the carcinogenic and mutagenic properties of the oils were carried out. A preliminary conceptual design and economic feasibility study were also done for a full scale process.

A Technico-economic evaluation of conventional synthetic and oxygenated gasoline blending components : final report

by J.G. Spiro...et al. Ottawa : Petro-Canada Products Research & Development Centre, 1988. v, 137 p. Bibliogr. *CANMET contract: 1SQ85-00165.*
MICROLOG 88-05000 2 fiche

At least since the early 1970s, the North American petroleum industry has been actively exploring new fuel formulations (and processing) for spark-ignition engines. The present project considered the nature of Canadian gasolines of the future (early 21st century), their likely composition, properties and economics, the general business environment, and the state of the art of octane and volatility correlations (with composition). The work involved literature studies on synthetic crudes and novel gasolines, preparation and characterization of fuel components and blends, and economic evaluations. The latter employed a realistic refinery model (linear program), but must still be considered 'rough cut', because of scant information on prices and the operating environment.

A Techno-economic evaluation of CENTRAX deashing in direct coal liquefaction : final report

MITRE Corporation. McLean, Va. : MITRE Corporation, 1987. 192 p. *Work supported by the federal Panel on Energy R&D. CANMET contract: OSQ84-00279.*
MICROLOG 88-01190 3 fiche

The CENTRAX deashing process, developed by Sandwell Technologies of Canada, uses sequential centrifugation and extraction to separate solids from coal derived and coprocessing liquids. Laboratory experiments were conducted and a prototype unit with a 250 mm diameter was designed and operated, using coal liquids obtained from the Wilsonville coal liquefaction pilot plant. This report presents the results of an economic and technical assessment of the CENTRAX process as a conceptual commerical integrated two-stage liquefaction plant based on the scale-up of the pilot plant operations at Wilsonville. The performance of the CENTRAX unit was compared with the Kerr-McGee Critical Solvent Deashing technology which uses a solvent near or at its critical temperature to selectively extract non-distillable coal liquefaction products from ash and unconverted coal. The MITRE Coal Liquefaction Cost Model was used in the comparison.

Temperature and incubation in Pacific salmon and rainbow trout : compilation of data on median hatching time, mortality and embryonic staging

by F.P.J. Velsen. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. viii, 58 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 626)
ISSN 0706-6465
MICROLOG 88-01207 1 fiche

This report compiles numerical data on the influence of temperature on the incubation of Pacific salmon eggs. Data, from published and unpublished sources, were gathered to allow a comprehensive examination of the relationship between temperature and development time. They form the data base for an examination of a number of models, published elsewhere. The temperatures reported are divided into two groups, constant (mean plus or minus 1 degree Celsius) and ambient (variable). In general, the records provide information on time to median hatch and rates of mortality from fertilization to median hatch. Further information is provided on the timing to development of various embryonic stages prior to hatching in the six species.

Tendances de l'évolution de la société québécoise et priorités qui s'en dégagent pour l'éducation

par M. Lamarre. Québec : Conseil supérieur de l'éducation, 1987. 138 p. (Etudes et documents ; 1) ISBN 2-550-13713-2
MICROLOG 88-02981 2 fiche

Le Conseil supérieur de l'éducation du Québec a entrepris une consultation auprès d'une quarantaine de personnes considérées comme des témoins privilégiés de la réalité québécoise. La synthèse présentée dans les 3 premiers chapitres de ce document constitue un bilan descriptif qui suit l'ordre des questions soulevées en entrevue. Dans le 4e chapitre, on dresse l'inventaire des principaux souhaits formulés quant à diverses facettes de l'avenir du Québec. Le 5e chapitre fait état d'une série d'orientation retenues comme étant les balises que devrait se fixer le système d'éducation. Finalement, le dernier chapitre identifie les choix fondamentaux auxquels le monde de l'éducation sera inévitablement confronté au cours des années qui viennent. La questionnaire est inclus.

Teneur en or et géochimie des formations ferrifères au Canada

par G.A. Gross. Ottawa : Commission géologique du Canada, 1988. 54 p. : ill. Bibliogr. (Etude ; 86-19) *Bilingue (Gold content and...)*. ISSN 0068-7650
MICROLOG 88-04420 1 fiche

La teneur en or de 90 échantillons représentant 4 faciès lithologiques de formation ferrifères a été établie par la méthode d'activation des neutrons. Ces échantillons représentent des formations non altérées sans veine ni fracture renfermant des minéraux de formation plus récente, et l'or serait d'origine syngénétique. Les quantités des éléments principaux et secondaires des 90 échantillons analysés sont comparées à la teneur moyenne des 27 éléments constituant les formations ferrifères provenant des 28 régions du Canada, déterminées par l'analyse de 1 500 échantillons. Il n'a pu être noté aucune tendance de répartition de l'or en fonction d'autres éléments ou de types de roches associées. On étudie aussi la répartition des éléments chimiques dans les principaux faciès des formations ferrifères provenant de différentes régions.

Teneurs en BPC, pesticides organochlorés, composés phénoliques et HAP des poissons et des sédiments du bassin versant de la rivière des Outaouais en 1985

par M. Paul et D. Laliberté. Québec : Gouvernement du Québec, Ministère de l'environnement, Direction de la qualité du milieu aquatique, 1987. xv, 71 p. : ill. Bibliogr. *Sur la couv.: Assainissement de l'eau. En tête du titre: Réseau de surveillance des substances toxiques dans le milieu aquatique.* ISBN 2-550-17789-4
MICROLOG 88-04321 1 fiche

Ce rapport présente les résultats d'analyse de composés organochlorés, d'hydrocarbures aromatiques polycycliques (HAP) et de composés phénoliques dans les sédiments de surface et la chair des poissons recueillis sur le bassin de la rivière des Outaouais au cours de l'été et de l'automne 1985. L'aire d'étude s'étendait du lac Kinojévis au lac des Deux Montagnes et comprenait les tributaires québécois situés dans les régions les plus industrialisées du bassin versant de la rivière des Outaouais. Inclut des informations sur le réseau de surveillance des substances toxiques, ainsi que sur la contamination du milieu aquatique par les BPC, les pesticides organochlorés, les HAP et les composés phénoliques.

Tensile properties of ERW pipe welds with artificial flaws

by W.R. Tyson and K.C. Wang. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 14 p. : ill. (Report ; MTL 88-33(TR))
MICROLOG 88-04999 1 fiche

Electric resistance welded pipe is being considered increasingly for demanding applications, because it can be produced economically. However, because of the way it is made - essentially by hot forging - there is a risk that poor bond line properties and defects could occur if control of the process is inadequate. This report investigates the effect of bond-line defects on the tensile strength of ERW pipe welds. The work forms part of a larger project to evaluate the significance of weld defects in ERW pipe on the failure pressure of the pipe, the resistance of the pipe to corrosion in the presence of H2S, and on non-destructive ultrasonic methods of detecting defects.

Terrorism : legitimation and response -- Reviewed

by W. Koerner. Ottawa : Library of Parliament, Research Branch, 1987. 16 p. Bibliogr. (Current issue review ; 86-32E) *French ed. (Le terrorisme : légitimation et*

riposte) on the same fiche. ISBN 0-660-12572-2
MICROLOG 88-00932 1 fiche

The problem of how best to combat international terrorism continues to confound western democracies due to an inability to agree upon an effective, collective strategy because of the self-interest of state, the inappropriateness of international force, the limited utility of international law, and the changing nature, source and tactics of terrorism. This document traces the historical origins and tactics of terrorism (from the People's Will movement in Russia during the late nineteenth century) through to modern developments. Discusses terrorist motives, legitimation and response, the Canadian situation and federal parliamentary action.

Test program of granular materials for the thin-walled, particulate-packed container

by B. Teper. Toronto : Ontario Hydro, Research Division, 1987. v, 39 p. Bibliogr. (Report ; no. 87-154-K)
MICROLOG 88-00162 1 fiche

Thin-walled, particulate-packed and structurally supported containers were developed for immobilization and disposal of fuel bundles from CANDU nuclear power station in a vault up to 1000 m deep in the Canadian Shield, that would not leak for at least 500 years. The containers will have a thin titanium shell on the outside, supported by an internal matrix made of a granular material (particulate) which will fill all free space inside the container. Sand, bauxite, zircon, glass beads, zircox, rutile, steel shot, rutile-zircon-garnet mix, and sintered bauxite were compared for good packing properties, adequate stiffness and strength. One is recommended.

Testing and passenger demonstration of the BREL 141 light rail diesel car

report by Nicholas Vincent ; prepared for Transportation Development Centre. S.l. : VIA Rail Canada Inc, 1986. x, 38 p. Bibliogr. *TP 8166E.*
MICROLOG 88-00341 1 fiche

In February 1986, a British Rail Engineering Limited (BREL) Model 141 Light Rail Diesel Car (LRDC) was delivered to Montreal for technical tests and passenger demonstration runs to determine its suitability for service under Canadian conditions. In Montreal, as a condition to operation on CN lines, the LRDC underwent further modifications with the application of headlight, bell, horns and other necessary operational equipment. Essential engineering and operational tests were performed, with very encouraging results. These tests included instrumented measurements of the vehicle's stability, ride quality, and ability to activate signals at varying speeds. In April, the vehicle was moved to Thompson for non-revenue scheduled passenger operation to the local communities of Pikwitonei and Thicket Portage. During the July-August period, it regularly operated in tri-weekly service to these communities, which are dependent upon the train for access to Thompson and other points.

Thermal analysis of an irradiated fuel road cask for recently discharged fuel under normal and fire accident conditions

by D. Taralis. Toronto : Ontario Hydro, Research Division, 1987. vii, 84 p. : ill. Bibliogr. (Report ; no. 87-249-K)
MICROLOG 88-01751 1 fiche

An existing three-dimensional finite difference heat transfer code was extended to cover the thermal analysis of an irradiated fuel road cask for the transportation of Recently Discharged (RD) fuel under normal conditions and hypothetical fire accident conditions. The code was based on the numerical solution of the conservation equations of mass, momentum and energy. The temperature distribution within the cask cavity was obtained by modelling the cavity as two separate regions. The regions occupied by the carbon steel liner/aluminum basket was represented by a solid medium with equivalent thermal properties. The remainder of the cavity was modelled as a pure fluid region. Results for the actual road cask containing RD fuel are also presented for 700 W/bundle. The final design calculations for licensing purposes will be presented in other reports using the extended computer codes TAN-RD and TAF-RD.

Thermal properties of concretes incorporating supplementary cementing materials : final report

by Geotherm Inc. Uxbridge, Ont. : Geotherm, 1988. 28 p. : ill. Bibliogr. *CANMET contract: 79137-01-SQ.*
MICROLOG 88-03153 1 fiche

Copies of these documents are available from:
Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

Ten sets of concrete cylinders (nom. 10cm by 20cm), each consisting of three samples from the same batch, with metal probes cast in place were supplied by CANMET. Thermal testing was started after 28 days of moist curing. The thermal dryout curves, consisting of thermal conductivity and thermal diffusivity at 5 moisture levels ranging from fully saturated to completely dry, were obtained by oven drying the samples in stages. At each stage the samples were wrapped in plastic and allowed to come to moisture and temperature equilibrium prior to the thermal testing. The dry stage was obtained by leaving the concrete cylinders in the oven for 48 hours at 135 C. The transient thermal probe method was used to determine thermal conductivity (k)[W/C-m] and the Shannon and Wells technique to determine thermal diffusivity. Papers describing these procedures and their theoretical basis are attached to the report.

Thermal testing of a simulated road cask for recently discharged fuel

by D. Taralis. Toronto : Ontario Hydro, Research Division, 1987. iv, 44 p. Bibliogr. (Report ; no. 87-188-K)
MICROLOG 88-00160 1 fiche

Ontario Hydro is currently extending the capabilities of the irradiated fuel transportation system for 10-year cooled fuel to the transport of recently discharged fuel. To accomplish this, the shipping/storage modules for the 10-year fuel will be replaced by extra shielding and a fuel basket to hold the fuel bundles (after at least 8 days of cooling). Other components of the system (road cask, impact limiter and transport trailer) will be unchanged. This study was conducted to establish an optimum bundle power (decay heat) under dry and wet cavity conditions by making temperature and pressure measurements on a full scale experimental apparatus. The tests conducted involved the simulation of the conditions for dry cavity, reflood/water cavity, and dry unloading operations. This report describes the various components of the test apparatus and the instrumentation used, as well as operation of the cask and results of the tests.

Third-party review of Canada Post Corporation's rates and services : a discussion paper

Ottawa : Consumer and Corporate Affairs Canada, 1988. 21, 24 p. *Bilingual (Révision par un groupe...).* ISBN 0-662-55768-9
MICROLOG 88-02929 1 fiche

This paper has been prepared to focus discussion and stimulate input from users of the postal service on the possible establishment of a process of independent third-party review of selected Canada Post Corporation's rates and services. In recent years, Canadians have shown increasing interest in the prices charged and services offered by Canada Post. Mail volumes continue to increase and it has been considered appropriate to consider ways to increase user participation in the planning of those rates and services. This paper reviews the way the Corporation is regulated, summarizes the experience of other countries that have adopted the third-party review approach, and offers options for a similar system in Canada. Specifically, the paper explores which type of third-party process would best serve the public interest in terms of providing an open, users' forum in which rates and service issues could be discussed, and appropriate cost/service relationships examined, and reducing existing pressures for political involvement in postal operations.

Tobacco smoking -- Reviewed

by M. Baker. Ottawa : Library of Parliament, Research Branch, 1987. 20 p. Bibliogr. (Current issue review ; 86-22E) *French ed. (L'usage de tabac) on the same fiche.* ISBN 0-660-12563-3
MICROLOG 88-00802 1 fiche

Since the 1960s, research has continued to document the health hazards of both smoking tobacco and inhaling second-hand smoke. Growing anti-smoking lobbies pressuring politicians to deal with the social costs of tobacco and smoking in public places has brought them into conflict with tobacco farmers' desires for a national marketing board that would maintain prices and find new markets in Canada and abroad. This report looks at social perceptions of smoking, health issues, trends in smoking behaviour, the anti-smoking movement, the tobacco industry, and government initiatives. Also traces relevant parliamentary action.

Together we are Ontario : report of the Conference on Race and Ethnocultural Relations

Conference on Race and Ethnocultural Relations (1986 : Toronto, Ont.). Toronto : Ministry of Education, 1986. 45 p. : ill. ISBN 0-7729-2609-3
MICROLOG 88-02728 1 fiche

The purpose of the conference was to emphasize the educational priorities of the government and to outline its policies on multiculturalism, equality of status and opportunity for all. Conference sessions featured strategic models and materials on multicultural education and race relations. This document summarizes ideas from the plenary sessions and workshops, which directed their attention toward school boards evaluating and or developing race relation policies, examining course curriculums in order to eliminate discriminatory materials, and the development of school programs aimed at involving multicultural themes on both a broad and specific basis.

Total and merchantable volume equations for small coastal Douglas-fir

by S.A.Y. Omule, V.E. Fletcher and K.R. Polsson. S.l. : Forest Research Development Agreement, 1987. vii, 16 p. : ill. Bibliogr. (FRDA report ; 010) ISSN 0835-0752 ISBN 0-7718-8598-9
MICROLOG 88-04594 1 fiche

Several published tree volume equations are currently used in B.C., some in summaries of appraisal and inventory cruise data and some in studies of growth and yield and tree improvement of coastal Douglas-fir. These models are generally unsuitable for estimating volumes of small trees (under 5 cm in diameter) because of limitations of the model or sample data used. An opportunity to evaluate the existing tree volume prediction equations for coastal Douglas-fir was provided by a new large data set (about 1400 trees) recently acquired by B.C. Ministry of Forests and Lands in addition to the data used by the previous analysts. The study evaluated the prediction bias of the existing total and merchantable volume equations for coastal Douglas-fir small trees, arbitrarily defined here as trees having a diameter at breast height of less than 45 cm. In addition, new volume prediction equations were developed for the small trees, based on the expanded data set, to be used in summaries of Research Branch growth and yield plot data.

Total dissolved solids trends in the Saskatchewan River Basin

produced for the Water Quality Branch & Water Resources Branch, Environment Canada ; by Hydroqual Consultants Inc. Ottawa : Environment Canada, Inland Waters Directorate, Water Resources Branch ; Western and Northern Region, Water Quality Branch, Sediment Survey Section, 1986. xii, 107 p. : ill., maps. Bibliogr.
MICROLOG 88-04729 2 fiche

This report analyzes the historical total dissolved solids samples collected from the Saskatchewan River Basin, from its headwaters in the eastern slopes of the Rocky Mountains to its point of discharge into Cedar Lake, Manitoba. The report determines the compatibility of data, taking into account differences in sampling and analytical methods; summarizes the temporal and geographic distribution of the sampling sites, and compares the distribution of sampling sites and overlap between them; summarizes the TDS record for each site and for each basin, identifying geographic trends in mean TDS concentrations and relates these trends to basin hydrology and geology; assesses the utility of the data for analyzing trends in TDS concentration due to interventions such as dam construction, changes in land use and point-source loadings; and assesses the suitability of the data for calculation of geochemical load.

Toughness of weld metals for fabrication of cold marine structures and vessels, part 1 : shielded metal arc welding

by J.E.M. Braid and J.A. Gianetto. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 69 p. : ill. Bibliogr. (Report ; MTL 88-21(TR)) *Part 2, Submerged arc welding : 88-04998/1.*
MICROLOG 88-04997 1 fiche

Welding technology currently available for building offshore structures and ships for Canada's East Coast and Arctic regions was developed for use in fabricating North Sea structures where the minimum design temperature is -10C. However, minimum temperatures of -20C and drifting ice, including icebergs, are crucial design considerations for the Hibernia field and in the Arctic where minimum temperatures of -50C and packed ice are typical. A series of 20 butt welds in 20 mm thick steel plate were made using commercially available shielded metal-arc welding (SMAW) electrodes selected from major manufacturers in Europe, the United States and Canada of CSA E48016, E48018 and E55018 type C-Mn and C-Mn-Ni compositions. The welds were evaluated, in terms of microstructure and toughness, for their suitability in fabricating structures with -20C to -50C design temperatures and to identify areas where improvements can be made in consumable design.

Tourism in Alberta

prepared by Pamela Wight. Edmonton : Environment Council of Alberta, 1988. 44 p. Bibliogr.
MICROLOG 88-04416 1 fiche

This document looks at the present and possible future partnership of tourism and the environment. Its purpose is to examine tourism in relation to the six objectives of the Alberta Conservation Strategy: maintaining essential ecological processes, preserving genetic diversity, sustaining use of species and ecosystems, developing diverse opportunities for use of natural resources, maintaining and improving quality of life, and developing a long-term sustainable economy. Sections contain definition, history and organization of tourism in Alberta; economic and social significance of tourism; demand projections; achieving sustainable use; interactions between resource users; and legislative and regulatory regime.

Toxicity to salmonids of the herbicide glyphosate (RoundupTM) and its surfactant (MON 0818)

by M.T. Wan, R.G. Watts and D.J. Moul. West Vancouver, B.C. : Dept. of the Environment, Conservation and Protection, Environmental Protection Service, Pacific and Yukon Region, 1987. v, 18 p. Bibliogr. (Regional program report ; 86-16)
MICROLOG 88-04778 1 fiche

Roundup is the trade name of a formulated herbicide containing the active ingredient glyphosate, used as a non-selective post emergent treatment to remove unwanted vegetation in agriculture, forestry, and rights-of-way. Most of the fish toxicity information used for the registration of this herbicide in Canada was produced in the U.S.A. but there was insufficient information on the acute toxicity of Roundup to salmonid species. To assist the regional office of the Environmental Protection in the evaluation of provincial permit referrals for aerial and ground based spray applications of Roundup, a fish bioassay programme was initiated in 1980 to determine its acute toxicity and its surfactant to juvenile Pacific salmon. A literature review was conducted and bioassays were conducted on underyearling rainbow trout and Coho salmon.

The purpose of this paper is to examine the role of government policies of protection and subsidies to textiles, clothing, and footwear industries in Canada, with a view to assessing their impact on recent adjustment within the industries. Analyzes the sector's trade barriers, capital investments, labour employment and its characteristics, and market structure with a discussion of each one's affect on adjustment options and outcomes.

Traded and non-traded services : theory, measurement and policy : proceedings of a service sector roundtable

edited by James J. McRae and Martine M. Desbois. Halifax : Institute for Research on Public Policy, 1988. xv, 330 p. Bibliogr.
ISBN 0-88645-066-7
MICROLOG 88-03436 4 fiche

The service sector is steadily growing due to the emergence of services that previously were undertaken within the family unit, and now show up in social accounts as health care, education and social services being provided through the public sector. As well technological changes make possible a process of intermediation in service activities, a separation in space or time of the ultimate recipient of services from the original producer of those services, and the increase of "value-added" services. This conference met to discuss various implications of the growing service sector, with the larger goal of identifying frameworks for policies to support an efficient and expanding system for production and exchange of services domestically and internationally.

Traditional and psychological risk factors for coronary artery disease in a select military population : CFCSC 1985-86

by M.F. Kavanagh...et al. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 20 p. : ill. Bibliogr. (DCIEM research report ; 88-RR-13)
MICROLOG 88-04585 1 fiche

The Canadian Forces Command and Staff College (CFCSC) project was initiated in 1981 to study coronary risk factors in the CFCSC student population, who, over the previous few years, had exhibited a seven times higher incidence for coronary heart disease (CAD) than the sex and age matched national average. The CFCSC course is considered to be very important for career advancement and it tends to be a very intense, competitive and stressful ten month period. The original project studied the traditional physiological risk factors (i.e. smoking, serum cholesterol, blood pressure, obesity, family and exercise histories). As a progression from the original project, this study was undertaken to investigate the traditional risk factors for CAD plus several behavioral risk factors (i.e. type A behavior, anger, anxiety, hostility). These risk factors were measured prior to the course plus at what was considered to be the peak stress period for the students, (i.e. three months into the course).

Traffic signals : left-turn phasing, timing and displays, vehicle clearance intervals : recommended practice

prepared for the Transportation Development Centre by Keith G. McLean. S.l. : DelCan, 1987. xi, 25, 12 p. : ill. *TP 8226E.*
MICROLOG 88-00333 1 fiche

Report of the second phase of a project on standardization of signal displays and phasing, vehicle clearance intervals, left-turn phasing and capacity, and standardization of left-turn movement traffic signal indicators. A series of questionnaires and meetings with practicing traffic engineers was used to supplement the research from the first phase of the project as a means of developing a recommended practice for the time and phasing of traffic signals as well as for the signal indication displays that are associated with various left-turn phasing alternatives. Recent research was used to develop a recommended practice for the timing of vehicle clearance intervals in traffic signals.

Traffic signals : left-turn phasing, timing and displays, vehicle clearance intervals : recommended practice : summary report

by K.G. McLean. Montreal : Transport Canada, Transportation Development Centre, 1987. x, 23 p. : ill. *Complete report : 88-00333/1.*
MICROLOG 88-03190 1 fiche

At the outset of the project, a study group was formed comprising practising traffic engineers from provincial and municipal agencies and representatives from Transport Canada, the Canada Safety Council and Mohawk College. Questionnaires and meetings with the study group members were used to supplement the research from the first phase of the project as a means of developing a recommended practice for the timing and phasing of traffic signals as well as for the signal indication displays that are associated with the various left-turn phasing alternatives. Recent research was used to develop a recommended practice for the timing of vehicle clearance intervals in traffic signals. A basic questionnaire and the responses thereto gave rise to a number of issues which were summarized and presented to the study group.

Le Traitement des eaux usées provenant de l'exploitation des mines et de la préparation du minerai

Ottawa : Environnement Canada, Service de la protection de l'environnement, 1987. x, 92 p. : ill. Bibliogr. (Rapport ; SPE 2/MM/3)
MICROLOG 88-03019 2 fiche

Ce rapport examine les résidus miniers (eaux d'exhaure, eaux usées de préparation des minerais et eaux de ruissellement) et les polluants les plus courants qu'ils contiennent par suite de l'exploitation des gisements et de la préparation des minerais, en particulier au Canada. Il décrit à la fois la digue à résidus, un moyen traditionnel dont l'efficacité est éprouvée, et la station de traitement mécanique, un moyen plus récent, utilisée pour la gestion des eaux usées et leur épuration. Il traite en détail des eaux d'exhaure acides résultant de l'exploitation des gisements de minerais sulfurés et de l'épuration des eaux usées cyanurées provenant de l'élaboration de l'or. La dernière partie du rapport porte sur la gestion des résidus après la fermeture de l'exploitation minière.

TRANSCOL : a multi-period school bus routing and scheduling system -- Rev.

by J. Desrosiers...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1984. 33 p. Bibliogr. (Publication ; no. 164) (Publication ; no 364)
MICROLOG 88-06435 1 fiche

In the Quebec school system, the transportation of students by bus is required because of low population density and because the Government decided to establish large regional high schools of approximately 60 elementary and high schools and 2,000 students. This paper describes a modular system called TRANSCOL for planning and organizing transportation which builds the school time-tables within some ranges specified by the authorities so as to reduce the number of buses required. Each module (location, bus route generator, school scheduling, route scheduling) considers a component of the problem and generates input to other modules. A number of constraints concerning the students and their schooling are considered, as well as the operating cost for transportation and the rental cost of the buses.

TRANSCOL : un système de transport scolaire intégré : un rapport d'étape

par L. Chapleau...et al. Montréal : Université de Montréal, Centre de recherche sur les transports, 1980. 72 p. (Publication : no. 156) (Publication ; no 355)
MICROLOG 88-06428 1 fiche

L'augmentation de la population à transporter ainsi qu'une scolarisation prolongée ont eu pour conséquences d'appesantir le fardeau financier rattaché au transport scolaire et d'en rendre plus complexe l'organisation. Le projet TRANSCOL développé au Centre de recherche sur les transports vise à produire un outil efficace d'organisation et d'évaluation de diverses politiques de transport scolaire. Afin de contourner la difficulté que présente la complexité du problème, ce projet a été morcelé en 5 modules principaux: la localisation, l'affectation des écoliers aux arrêts, la génération des parcours d'autobus, la détermination des horaires d'écoles et la confection des horaires d'autobus. Ce document décrit chacun des modules de ce projet.

The Transient submergence of oil spills : tank tests and modelling

S.L. Ross Environmental Research Limited. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Centre ; Conservation and Protection, Marine Environmental Protection Branch, 1987. vii, 70 p. : ill. (Report ; EE-96)
MICROLOG 88-02059 1 fiche

Based on theory and wind/wave tank test results, process equations incorporating oil properties and sea conditions have been developed to predict whether or not a particular oil slick will break up into slicklets or blobs; the size of the resultant slicklets and blobs, whether or not they are overwashed by water and to what extent, the maximum transient submergence depth of the slicklets and blobs, and their distribution as a function of depth. These process equations have been incorporated into an oil spill fate and behaviour computer model that predicts oil spill spreading, evaporation, emulsification, natural dispersion and transient submergence. The process equations were also simplified to allow quick estimates to be made for residual fuel oil spills and a range of emulsion mat sizes.

Transitional area parking and circulation study

prepared for City of Regina ; prepared by Stanley Associates Engineering Ltd. Regina : The City, 1984. i, 85 p. : maps.
MICROLOG 88-05938 1 fiche

Study examining and evaluating vehicular circulation, vehicular parking and pedestrian circulation in the Transitional Area. It addresses specifically the following basic concerns: the high volumes of through traffic and pedestrian activity resulting in pedestrian/vehicle conflicts; vehicular traffic speed and noise; high levels of on-street parking; aesthetics/compatibility of surface parking lots with surrounding land uses and building forms; a relatively high percentage of the resident population which is vulnerable to an adverse pedestrian environment (i.e., senior citizens). In addition, it examines and analyzes the inter-relationships between traffic characteristics and present and future land uses. Recommends an overall circulation and parking strategy for the Transitional Area.

Transport of full trees over public roads in eastern Canada : a state of the art report

by C.R. Silversides and R.L. Moodie. Ottawa : Forest Engineering Research Institute of Canada, 1985. viii, 71 p. : ill. Bibliogr. (Special report ; SR-35) *ENFOR project P-312. Fiched with French ed. (Transport d'arbres entiers...).*. ISSN 0381-7733
MICROLOG 88-00256 2 fiche

There is increasing interest in eastern Canada in the utilization of a greater part of the forest, if not to increase feedstocks for merchantable products then as a source of energy to take the place of petrochemicals. Because of the constraints of highway regulations as to width, length, height and weight there has been little effort to transport full trees over public roads. The concern is (1) to obtain an economic payload and (2) to be able to contain the full trees to public highway standards. This report discusses the different characteristics of the load (full trees), analyses the situation vis-a-vis economic load capacity, estimates hauling costs under Canadian conditions and describes developments in Sweden, Norway, Finland, Denmark, Germany and United States.

Transportation planning models : a synthesis of various uses

by M. Florian, M.J.I. Gaudry and C. Lardinois. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. 16 p. Bibliogr. (Publication ; no. 471) (Cahier ; 8636) (Publication ; no. 573)
MICROLOG 88-00027 1 fiche

This paper puts forward the view that, for each transportation planning or management problem, there is a particular way to simultaneously define the multiple levels of procedures useful for the problem and set it in its proper perspective. Report extends our previous conceptual framework to include, in the first dimension, an activity location procedure, and to distinguish, in the second dimension, between operational, tactical and strategic perspectives. Concludes by relativising the use of solution techniques by making them ancillary to the situation planning requirements.

Travaux d'archéologie de Parcs Canada dans la région de l'ouest en 1984

Parcs Canada. Ottawa : Environnement Canada, Parcs, 1988. 44 p. : cartes géogr. Bibliogr. (Bulletin de recherches ; no 264) *L'éd. anglaise (Parks Canada archaeology...) sur la même fiche.* ISSN 0228-1236
MICROLOG 88-03428 1 fiche

La Sous-section des recherches archéologiques de la région de l'Ouest de Parcs Canada a géré 90 projets en Alberta et en Colombie-Britannique en 1984. Il s'agissait de 57 évaluations d'impact sur les richesses du patrimoine, de 8 projets d'atténuation et de 25 projets spéciaux. Ce document présente un résumé des résultats de ces différents projets. Les sites évalués incluent les parcs nationaux de Banff, Elk Island, Jasper, Glacier, Waterton Lakes et Yoho; ainsi que la collectivité minière de Pocahontas, le poste de traite de Jasper House et 2 sites préhistoriques à Patricia Lake. Fournit la liste des projets de 1984 (incluant le nom du chercheur et une description du projet) et comprend un sommaire des sites évalués dans les parcs nationaux.

Treating wastewater from pulp and paper mills with anaerobic technology

Burlington, Ont. : Environment Canada, Wastewater Technology Centre, 1988. 3, 3 p. (Environmental technology notes) *Bilingual (Le traitement anaérobie...).*
MICROLOG 88-04802 1 fiche

Pulp and paper manufacturing generates large volumes of wastewater that can be toxic to aquatic life. Some foreign research has suggested that anaerobic treatment could be an effective and less costly alternative to conventional pollution control systems for some pulp and paper mills. This note presents information on the selection and operation of a pilot study performed at a pulp and paper mill complex operated by Macmillan Bloedel in Sturgeon Falls, Ontario, which produces 200 tonnes per day of corrugating medium and 100 tonnes per day of exterior hardboard siding. The wastewaters produced in the complex are discharged into the Sturgeon River and although the effluents are treated to remove suspended solids, the mill complex is not equipped with a chemical recovery system.

Tree and shrub insects of the prairie provinces

by W.G.H. Ives and H.R. Wong. Edmonton : Canadian Forestry Service, Northern Forestry Centre, 1988. xii, 327 p. : ill. Bibliogr. (Information report ; NOR-X-292) ISSN 0704-7673 ISBN 0-662-15770-2
MICROLOG 88-04581 4 fiche

Guide to more than 600 species of insects and mites that feed on trees and shrubs in the prairie provinces. Distribution, hosts, importance, life cycle, appearance and damage are discussed, with illustrations for the more important species and larval stage only for less important species. Pests attacking coniferous hosts are separated from those attacking hardwoods, and each group is subdivided according to the kind of feeding damage and type of insect involved. In addition to a taxonomic index listing the order and family of each insect or mite, there is a diagnostic index listing the host species, feeding site of the pest, and species of insect or mite involved, and an insect index.

Conseil économique du Canada. Ottawa : le Conseil, 1988. x, 44 p. : ill. Bibliogr. *L'éd. anglaise (Venturing forth...) sur la même fiche.* ISBN 0-660-92298-3
MICROLOG 88-04085 2 fiche

Toute évaluation de la politique commerciale du Canada doit avoir pour toile de fond l'évolution de l'économie planétaire et tenir compte des obligations du Canada dans le cadre du GATT. Par ailleurs, une évaluation de l'accord de libre-échange doit également tenir compte de l'évolution récente des échanges canado-américains et de l'influence politique croissante des pressions protectionnistes dans les deux pays. Ces aspects généraux sont traités dans les 2 premières sections de ce document. On analyse ensuite les points saillants de l'accord ainsi que ses répercussions futures. Finalement, le Conseil présente son évaluation de l'accord.

Tube wastage in FBC boilers at Summerside : causes and resolution

by V.V. Razbin and F.D. Friedrich. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1987. vi, 36 p. : ill. Bibliogr. (Report : ERL 87-92(TR))
MICROLOG 88-06056 1 fiche

Canada's first application of fluidized bed technology to the combustion of coal was completed late in 1982, at Canadian Forces Base Summerside, Prince Edward Island. Although startup problems were numerous, by the end of the first two heating seasons the boilers had met all guarantees concerning capacity, efficiency and emissions. However, wastage of the heat exchage surfaces exposed to the bed had become evident by the second month of operation. This paper provides data on the metal wastage in the Summerside boilers, organized chronologically, with the major measures taken to prevent erosion. Effects of air jets, large particles, location of inbed tube bundles and several forms of protective hardware are discussed. Also described is a current experiment with the inbed tube bundle, which involves an alloy, two types of protective hardware, and a change in tube bundle configuration.

Two-boat trawl, gillnet, purse seine, angling, fish trap and fry trap catches of Salmonids, and other fishes captured in Masset Inlet, B.C., 1983, 1984, and 1985

by N.B. Hargreaves...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 177 p. : maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 687) ISSN 0706-6465
MICROLOG 88-04842 2 fiche

Masset Inlet is a large tidal basin located on Graham Island in the Queen Charlotte Island group. It supports the largest runs of pink salmon in the Queen Charlotte Islands, as well as substantial stocks of other salmonid species. The Masset Inlet stocks of pink salmon are somewhat unusual in that the disparity between even and odd numbered years is very strong. As a result of these concerns a four year study of the early sea-life of juvenile pink and chum salmon in Masset Inlet was initiated in 1982. Two-boat trawling and purse seining were conducted to determine near-shore concentrations of juvenile salmonids. Gillnetting, fish trapping, and angling were conducted to capture potential predators of juvenile salmon. Fry traps were used to capture juvenile pink and chum salmon for enclosure experiments. This report summarizes the results for all of these gear types.

Underground evaluation of a fan/filter system for dust reduction capabilities

by M.G. Grenier and J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iii, 14 p. : ill. Bibliogr. (Report ; MRL 87-109(TR))
MICROLOG 88-01556 1 fiche

Several sources of respirable airborne dust are present in underground hard rock mines. Recently, a fan system manufactured by Cogema (France) was developed with a silencer to reduce noise exposure. To protect the sound damping materials of the silencer, a dust filter section was added to the fan intake section. It is claimed that the filter also helps reduce airborne dust and radioactive contaminants when the fan is used as a secondary ventilation unit. This evaluation was conducted in an underground uranium mine and tests were designed to assess the filter's ability to reduce airborne respirable dust as well as airborne radioactive contaminants. Results of the radiation part of the survey are given elsewhere.

Understanding wife abuse : an educational manual for community groups in Newfoundland and Labrador

by C. Wyse. St. John's : Newfoundland and Labrador, Women's Policy Office, 1987. 78 p. : ill.
MICROLOG 88-03312 1 fiche

The issue of wife abuse is part of the larger problem of family violence and is the major priority of the Women's Policy Office. This manual is designed to be used by an individual interested in leading a project to understand wife abuse. Contains educational material and a workshop agenda, both of which will allow community groups to begin educating themselves about wife abuse.

A Unified approach for the solution of network equilibrium problems -- Rev.

by C. Fisk and S. Nguyen. Montreal : Université de Montréal, Département d'informatique et de recherche opérationnelle, 1981. 22 p. Bibliogr. (Publication ; no 408)
MICROLOG 88-06442 1 fiche

General framework for formulating network equilibrium problems in which the equilibrium conditions are given by a system of non-linear equations. Existence and uniqueness results are presented, and iterative solution techniques with well-defined convergence properties are suggested. For illustrative purposes, the results are applied to a specific two mode equilibrium model.

A Unified framework for estimating or updating origin/destination matrices from traffic counts

by S. Nguyen and E. Cascetta. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. i, 20 p. Bibliogr. (Publication ; no. 492)
MICROLOG 88-01659 1 fiche

Study of the methodology for estimating or updating origin-to-destination trip matrices from traffic counts. Following an analysis of the statistical foundation of the estimation and updating problems, various basic approaches are reviewed using a generic traffic assignment map. Computational issues related to specific assignment maps and estimation models for both road and transit networks are then discussed. Finally, additional insight into the relative performance of several estimators is provided by a set of test problems with varying input data.

MICROLOG 88-03024 1 fiche

The Council is a federal granting agency responsible for the support of research conducted primarily in universities and their affiliated institutions and it promotes, assists and undertakes basic, applied and clinical research in Canada in the health sciences. This document presents cooperative university and industry research programs that have funding elibility with information on eligibility criteria, assessment procedures, equipment and employment, as well as a consideration of selected ethics in medical research.

University-industry interaction in the social sciences and humanities : a threshold of opportunity

by R. Davidson. Ottawa : Science Council of Canada, 1988. 31 p. Bibliogr. (Discussion paper) *French ed. (L'interaction université-entreprise...) on the same fiche. CSI 22169.203.* ISBN 0-662-16192-0
MICROLOG 88-05312 1 fiche

This paper seeks to replicate for the social sciences and humanities (SSH) the research program the Science Council has undertaken on university-industry linkages involving science and engineering faculties. It reviews the current state of university-industry relations in SSH, identifies a number of basic issues surrounding the ability of the SSH to meet the changing demands being placed on them, situates the SSH in the context of the redefined economic role of universities, and provides an overview of current university-industry linkages in the SSH, within each of the core functions of universities: research, education and community service. It also summarizes the principal characteristics of these linkages and discusses some issues that arise from them. A concluding chapter addresses basic issues related to the future development of the SSH.

Upgrading Nova Scotia oil shale for potential uses : final report

by M.C. Rockwell. Halifax : The Author, 1986. iv, 99 p. : ill. Bibliogr. *CANMET contract: 1ST84-00382.*
MICROLOG 88-03138 2 fiche

Nova Scotia has an appreciable resource of low grade oil shale, with two major deposits located in Pictou and Antigonish counties. This study is a preliminary investigation into the technical feasibility of physical processing and upgrading of Nova Scotia oil shale. Four different exposed oil shale zones were trenched and sampled, with an approximately 100 kg of bulk samples collected from each zone Representative samples were prepared for extensive characterizations. The lowest oil yield zone sample was subjected to processing and upgrading by physical beneficiation methods. The sample was sized into 5 fractions and processed by heavy liquid separation, tabling and flotation techniques.

Urban crime in Canada

by T.F. Hartnagel and G.W. Lee. Edmonton : University of Alberta, Centre for Criminological Research, 1988. 25 p. Bibliogr. (Discussion paper ; 14)
MICROLOG 88-05326 1 fiche

An association between urban location and crime has long been recognized both theoretically and empirically in the literature of criminology, but a number of aspects of this association remain contentious. Alternative theoretical perspectives for explaining this relationship have been formulated; however, few attempts have been made to assess them together empirically. This study formulates hypotheses derived from a review of these theoretical perspectives. These hypotheses are tested with data from cities in Canada with a population of 25,000 and over, using multiple regression techniques. Violent and property crime rates are computed and demographic, social and economic data published by Statistics Cananda are used as indicators of the predictor variables. Implications of the findings for the several theoretical perspectives are discussed.

The Use of immobilized biomass to recover uranium from Elliott Lake type ores : final report

by M. Tsezos. Hamilton, Ont. : McMaster Engineering, 1988. ii, 81 p. : ill. *CANMET contract: 69164-01-ST.*
MICROLOG 88-05976 1 fiche

Inactive microbial biomass of the type *Rhizopus arrhizus* was immobilized in particulate form and tested, in batch, for the extraction of uranium from the bioleach solutions of Elliott Lake type ore. The batch tests were carried out using dilute process solutions supplied by Denison Mines with initial uranium concentrations of up to 30 mg/L. The solutions were adjusted to pH 4 and the resulting precipitate was filtered. The biomass was first allowed to adsorb uranium. The adsorbed uranium was then eluted, in batch, using a sodium bicarbonate solution at a solid to liquid ratio of 20 mg/mL. The batch loading-elution cycle was repeated ten times and the performance of the biomass was monitored. The same type immobilized biomass was subsequently tested using the same type uranium process solutions in an upflow continuous packed bed reactor with the help of a laboratory, bench scale pilot plant. The immobilized biomass was tested for 12 consecutive uranium uptake-elusion cycles.

The Use of tailings as backfill in underground uranium mines

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 47 p. Bibliogr. (Report ; MRL 87-106(TR)) *Report prepared for the Atomic Energy Control Board.*
MICROLOG 88-01182 1 fiche

Cemented backfill has been used to provide regional stability in areas near the Quirke/Denison boundary pillar. The backfill materials used in the stope filling program are residues derived from uranium extraction operations by hydrometallurgical processes. Because these residues are radioactive, it is important to determine the contribution from backfill operations to underground radiation levels. Two complete sampling stations were installed for sampling purposes and equipped with instrumentation to monitor the radon and thoron daughter working levels, radon and thoron gas concentrations. A meteorological package/data-logger and associated sensors gave information regarding temperature and barometric pressures. All instruments were programmed to provide readings every hour, 24 hours a day. Grab-sampling measurements were also conducted on a quasi-periodic basis of mine air flow, relative humidity, and radon gas concentration dissolved in water draining from drainpipes through bulkheaded backfilled stopes.

Using artificial barriers to protect adult Atlantic salmon : final draft

by G.A. Madden. Fredericton : Dept. of Natural Resources and Energy, 1988. xii, 84 p. : ill. Bibliogr.
MICROLOG 88-03490 2 fiche

An Atlantic salmon z*Salmo salar*) enhancement strategy was developed and implemented on three river systems in New Brunswick to concentrate the upstream migrating adult salmon in one major holding pool by means of an artifical barrier placed at the head of the pool, concentrate the enforcement at that site, and release the salmon just prior to the spawning period. The objectives were to: increase spawning escapement; evaluate an alternate protection method; and determine whether the salmon used traditional spawning grounds upstream from the site.

Using datalogger systems for environmental monitoring in forest research : an overview and case study

by D.G. Brand, M.D. Flannigan and P.S. Janas. Chalk River, Ont. : Canadian Forestry Service. Petawawa National Forestry Institute, 1988. 26 p. : ill. Bibliogr. (Information report ; PI-X-81) ISSN 0706-1854 ISBN 0-662-16298-6
MICROLOG 88-05688 1 fiche

Introduction for forest researchers to the monitoring of environmental conditions with automatic data loggers. The report discusses various aspects of the experimental design (definition of what, where, how, and when to measure), the technological design, and the management of environmental monitoring research programs. A case study of a large field installation with continuous monitoring of 92 sensors is used to demonstrate the design, operation, and management of data from a research project.

L'Usure dans les broyeurs à boulets

par S. Turenne. Boucherville, Québec : Conseil national de recherches Canada. Institut de génie des matériaux, 1988. iii, 61 p. Bibliogr.
MICROLOG 88-04489 1 fiche (Available on fiche only)

La consommation croissante des matières premières nécessite l'exploitation des produits naturels minéraux avec des teneurs en éléments de plus en plus faibles. Après l'extraction du minerai de la mine, l'étape de broyage précède celles de séparation et de concentration qui s'effectuent sur des particules de tailles fines. Cette revue se consacre principalement à décrire le phénomène de l'usure des boulets et du blindage lors du broyage du minerai. On y décrit les principales méthodes expérimentales simulant l'usure de ces composantes. De plus, on énumère les matériaux utilisés pour les boulets ainsi que leurs comportements en service. Une analyse semblable est faite en ce qui a trait aux blindages. L'influence de la corrosion est aussi abordée.

Utilisation de l'eau dans l'industrie houillère et son influence sur l'eau souterraine dans l'Ouest du Canada

par W.B. Barrie et C.H. Carr. Saskatoon, Sask. : Direction générale des eaux intérieures et des terres. Institut national de recherche en hydrologie, 1988. xix, 127 p. : ill. Bibliogr. (Rapport de l'INRH ; no 38) (Collection des rapports techniques ; étude no 154) *L'éd. anglaise (Water use in the...) : 88-03683/3. Cartes géogr. pliantes non filmées.* ISBN 0-662-94782-7
MICROLOG 88-03684 2 fiche

En 1985, environ 90% de toute la production de charbon de chaufferie et de charbon de coke provenait de la Colombie-Britannique, de l'Alberta et de la Saskatchewan. Les incidences environnementales et économiques de l'expansion de l'industrie houillère ont soulevé des inquiétudes à cause de l'utilisation de grande quantité d'eau lors de l'extraction et de la préparation de la houille. Ce rapport présente les résultats de deux études qui examinent l'approvisionnement et la demande en eau dans l'Ouest. La 1re étude évalue la demande en eau actuelle et future en fonction des activités de préparation et d'extraction houillère, tandis que la 2e détermine et évalue les ressources en eau souterraine des régions productrices de houille. Elle évalue aussi l'influence de la préparation et de l'extraction houillères sur les réseaux locaux et régionaux d'eau souterraine, pendant et après l'extraction.

Les Utilisations potentielles des tourbières suite à leur exploitation commerciale

par J.-Y. Daigle, A. Arseneau et H. Gautreau-Daigle. Fredericton : Ministère des ressources naturelles et de l'énergie, Division des minéraux et de l'énergie, 1988. x, 189 p. Bibliogr. (Dossier public ; 88-7) *Bilingue (Reclamation options for...).* ISSN 0712-4562
MICROLOG 88-05680 3 fiche

Les objectifs de cette étude sont de compléter une recherche bibliographique approfondie des usages possibles de tourbières commerciales après l'épuisement des réserves de tourbe de sphaigne et d'identifier certaines options de projets de recherche appliquée. On y discute de la conversion des tourbières résiduelles pour la culture de légumes, fourrage, céréales et petits fruits. Les efforts de réclamation de ces tourbières ont également été concentrés sur des travaux de foresterie pour la production de biomasse et de bois d'oeuvre. On présente aussi différentes approches de régénération et de renaturation des sites abandonnés. Une description de la réglementation en vigueur au Minnesota ainsi que quelques recommandations face à la situation au Nouveau-Brunswick complètent l'étude.

Utility, entropy, and a paradox of traffic flow

by M. Florian. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 10 p. Bibliogr. (Publication ; no. 151) (Publication ; no 344)
MICROLOG 88-06441 1 fiche

Considerable attention has been paid in the transportation research literature to the interpretation of counter-intuitive flows and travel times that result from the application of particular traffic assignment models after the addition of a link to the network or the modification of its length. This note offers a different utility based derivation of the stochastic assignment method of Dial and shows that the expected perceived minimum travel time, derived from random utility theory arguments, may be shown to be equal to a dual variable of a constrained maximization problem with an objective function which is the average utility of travellers using the available routes of the network. Some general conclusions are drawn on the relation between the properties of models based on utility maximization principles and on entropy maximization. The paradox of stochastic route choice, as presented by Sheffi and Daganzo is briefly revisited.

Vehicle routing with stochastic demands : models and issues

by M. Dror, G. Laporte and P. Trudeau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 30 p. Bibliogr. (Publication ; no. 579)
MICROLOG 88-05750 1 fiche

This paper considers the vehicle routing problem with stochastic demands. The objective is to provide an overview of this problem, and examine a variety of solution methodologies. First, for this class of problems, the concepts and the main issues are analyzed and some properties of optimal solutions are examined. Two solution frameworks for the problem are described: stochastic programming and Markov decision processes. The existing mathematical programming formulations are then presented and compared and a new formulation is proposed.

Vehicle weight and dimension regulations and Canada's trucking industry : final report

by F.P. Nix ; prepared for Transportation Development Centre, Transport Canada. Ottawa : Transportation Development Centre. 1987. xi, 97 p. Bibliogr. *TP 8480E.*
MICROLOG 88-00313 2 fiche

This research originated at the time of the announcement of the major study by the Roads and Transportation Association of Canada and the Canadian Council of Motor Transport Administrators study into heavy vehicle weight and dimension regulations. This study attempts to put together an understanding of how the twelve sets of weight and dimension regulations in Canada work, where the major differences are, and what the implications are. The report describes the impact of the regulations in terms of how they affect the design of truck combinations, how the vehicles that result affect trucking costs and rates, how the different regulations have affected the characteristics of truck fleets in various parts of the country, and how individual operators make decisions in terms of their own operations.
CA SC TR

Vehicle weight and dimension regulations and Canada's trucking industry : the regulations

by F.P. Nix, A.M. Clayton, B.G. Bisson ; prepared for the Transportation Development Centre, Transport Canada. Ottawa : Transportation Development Centre, 1986. ix, 93 p. Bibliogr. *TP 8481E.*
MICROLOG 88-00295 2 fiche

A comparative analysis of the regulations controlling the size and the weight of trucks in each Canadian province and territory is presented. The review of current vehicle weight and dimension regulations treats such elements as allowable heights, widths and lengths, tire loads and axle loads, and is supplemented by accounts of relevant historical changes to the regulations. Special topics such as seasonal regulations, road classes, tolerances and special permits are also covered.

Ottawa : Conseil du trésor du Canada, Secrétariat, 1987. 29, 29 p. (Norme de classification ; 204) *Bilingue (Auditing : scientific and...).* ISBN 0-660-53808-3
MICROLOG 88-05922 1 fiche

Cette norme décrit le système à utiliser dans la classification des postes attribués au groupe de vérification. L'évaluation des emplois vise à déterminer leur valeur respective au sein de chaque groupe d'occupations. Quatre facteurs régissent l'évaluation et l'attribution d'un niveau de classification des postes: connaissances, responsabilités relatives aux activités et aux contacts et responsabilités opérationnelles. Le document comprend des définitions de la catégorie scientifique et professionnelle et celle du groupe professionnel, les échelles de cotation et les descriptions des postes-repères.

Vers de plus larges horizons : l'option libérale à l'accord de commerce canado-américain

Caucus libéral national (Canada). Ottawa : Caucus libéral national, 1987. 53, 47 p. *Bilingue (Reaching out...).*
MICROLOG 88-01829 2 fiche

Ce document contient la réponse du Parti libéral du Canada à l'initiative commerciale canado-américaine proposée par le gouvernement conservateur. Il expose les principales raisons pour lesquelles les Libéraux sont contre l'initiative gouvernementale et présente des extraits des témoignages entendus par le Comité permanent des affaires étrangères et du commerce extérieur relativement à la proposition du gouvernement lors des audiences qu'il a tenues à travers le pays aux mois de novembre et décembre 1987. On y trouve aussi la solution que les Libéraux proposent en remplacement de l'initiative gouvernementale. Il est à noter que ce document est basé uniquement sur les Eléments de l'Accord du 4 octobre 1987.

Video display terminals : do they emit dangerous levels of radiation?

by A.M. Muc. Ottawa : National Research Council Canada, Associate Committee on Scientific Criteria for Environmental Quality, 1987. v, 23 p. : ill. Bibliogr. ISSN 0316-0114
MICROLOG 88-04428 1 fiche (Available on fiche only)

Many agencies and task forces have studied the questions raised by the widespread introduction and use of VDTs and microelectronic technology in general, with physical layout and environmental problems being the two major concerns identified. This paper discusses fears of radiation, (ultraviolet, X-ray, visible, infrared, microwave, low frequency, radiofrequency), and static fields, ultrasound, old or defective VDTs. Also discusses statistical clustering of miscarriages, birth defects and other adverse pregnancy outcomes among users of VDTs.

La Violence conjugale : recherche d'aide des femmes

par A. Bilodeau. Montmagny, Québec : Hôtel-Dieu de Montmagny, Département de santé communautaire ; Lévis, Québec : Hôtel-Dieu de Lévis, Département de santé communautaire, 1987. viii, 147 p. Bibliogr. ISBN 2-551-08583-7
MICROLOG 88-04039 2 fiche

Bon nombre de travaux ont exploré la nature et l'ampleur du phénomène de la violence conjugale ou en ont cherché les explications et les conséquences. Ces acquis permettent maintenant de se tourner vers des aspects plus spécifiques de la problématique. Avec le souci de donner la parole aux femmes, cette recherche tente de cerner la manière dont les femmes en situation de violence conjugale construisent leurs pratiques de recherche d'aide. L'approche développée en est une de bilan de leur propre expérience de recherche d'aide, en regard du refus ou de la cessation de la violence conjugale. Ce document présente l'objet de la recherche ainsi que les résultats.

The Viscosities of melts in the PbCl2-KCl-NaCl and PbCl2-KCl-LiCl system

by M. Kucharski and J.M. Toguri. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. 31 p. Bibliogr. *CANMET contract: OST 83-00048.*
MICROLOG 88-00477 1 fiche

The current method of extracting lead from lead sulphide concentrates, while energy-efficient and low-cost, leads to environmental problems such as sulphur dioxide production and the emission of heavy metals. Many new processes have appeared which try to ameliorate these environmental problems, one such process being the conversion of galena (PbS) to lead chloride (PbCl2), followed by fused-salt electrolysis to produce lead metal. This report presents the results of investigations of the viscosities of the ternary systems PbCl2-KCl-NaCl and PbCl2-KCl-LiCl as possible electrolytes, using a Brookfield Digital Viscometer over a temperature range of 730-1140 K.

La Vulnérabilité des forêts aux insectes : un facteur à considérer pour un meilleur aménagement forestier

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources. Direction de la recherche et du développement, 1988. 4 p. (Conservation des ressources forestières ; no 1) *En tête du titre: La foresterie sans détour*
MICROLOG 88-05108 1 fiche

La dernière infestation de tordeuse des bourgeons de l'épinette a occasionné des pertes considérables de matière ligneuse à la forêt québécoise. Ces pertes sont d'autant plus significatives que la demande de bois grandit sans cesse et que des ruptures de stock sont prévisibles dans plusieurs régions. Ce document expose brièvement les caractéristiques d'un système pour évaluer la vulnérabilité des peuplements aux insectes. Outre la composition de la forêt, ce système considère les mécanismes internes de fonctionnement de l'arbre et les facteurs du milieu et du peuplement qui prédisposent les arbres à être endommagés ou tués par une attaque de tordeuse des bourgeons de l'épinette.

Water in northern Alberta : conference report : Grande Prairie, November 4-6, 1987

Water in Northern Alberta Conference (1987 : Grande Prairie, Alta.). Peace River, Alta. : Northern Alberta Development Council, 1988. vii, 44 p. : ill. ISBN 1-55006-099-6
MICROLOG 88-04045 1 fiche

In early 1986, the Council began an eighteen month project to identify concerns related to water, a valuable northern resource. The project culminated in November of 1987 with the holding of a major conference in Grande Prairie. The conference, entitled Water in Northen Alberta, brought together 220 delegates from communities, interest groups, government and industry to examine ideas and suggest actions to deal with water issues in northern Alberta. Prior to the conference, focus groups and workshop were held across the north to obtain the thoughts of northerners. As a result of these efforts and the deliberations of the conference delegates, the Council prepared a set of recommendations for consideration by various parties. This report outlines the review process, the discussion of the conference delegates and the subsequent recommendations of the Council.

Water in northern Alberta : technical report

prepared for The Northern Alberta Development Council ; prepared by The DPA Group Inc. in association with W-E-R Engineering Ltd. and Environmental Management Associates Ltd. Peace River, Alta. : Northern Alberta Development Council, 1987. 124 p. : ill. Bibliogr. ISBN 1-55006-100-3
MICROLOG 88-03411 2 fiche

In recognition of the concern of residents of Northern Alberta in the proper management of water resources, the Northern Alberta Development Council sponsored a conference. To initiate discussion of water resource issues prior to the conference and assemble background information to be used by conference delegates, NADC commissioned pre-conference research, public consultative activites and the preparation of a conference Technical Report. This report represents the outcome of these assignments and the results of the conference delegates' deliberations. The objectives are as follows: to identify and document key issues relating to water and water management which presently affect or will affect northern Alberta; document the present status of water management programs and policies affecting water in Alberta with emphasis on the implications for northern Alberta; identify present and possible future water uses; identify constraints related to the development of future uses and identify key potential policies and programs dealing with water management which would be beneficial and practical to northerners.

Water quality and agricultural irrigation : a Canadian perspective

by D.R. Cameron. Regina : Environment Canada, Conservation and Protection, Inland Waters and Lands, Western abd Northern Region, 1988. 42 p. Bibliogr.
MICROLOG 88-05386 1 fiche

At present, water quality guidelines for agricultural irrigation vary from region to region and are altered as new knowledge is gained or to compensate for regional/local conditions. The study examines irrigation water quality guidelines for agriculture across Canada and delineates regions (B.C., Prairie provinces, Central Canada and the Maritimes) for the purposes of establishing guidelines more useful to each region. Specific considerations include crop salt tolerance, sodium absorption ratio, biocarbonates and permeability, specific ion toxicities, and soil texture.

MICROLOG 88-01158 1 fiche

As part of their commitment to the Great Lakes Water Quality Agreement, Canada and the United States carry out surveillance and monitoring activities on the Great Lakes system. This monitoring program was designed to identify instances where environmental water quality objectives were violated, to evaluate water quality trends, and to estimate loadings. As part of this monitoring strategy, the Water Quality Branch, Ontario Region, established a station in 1976 for the daily monitoring of water quality at Banford Point on the south shore of Wolfe Island in the south channel of the St. Lawrence River. This report presents the first comprehensive assessment of water quality data collected at this station. The data are compared with the data produced from a series of surveys, including transects, conducted around Wolfe Island, as well as eastern Lake Ontario surveillance cruise data. Also, seasonal variation and long-term trends of the major water quality variables are characterized, and loading estimates for the St. Lawrence River are presented. Recommendations regarding future sampling activities at this station are also included.

Water use in the coal mining industry and its influence on ground water in western Canada

by W.B. Barrie and C.H. Carr. Saskatoon, Sask. : Inland Waters/Lands Directorate, National Hydrology Research Institute, 1988. xxiv, 154 p. : ill. Bibliogr. (NHRI paper ; no. 38) (Technical bulletin ; no. 154) *French ed. (Utilisation de l'eau...) : 88-03684/2. Fold. maps not filmed.* ISBN 0-662-16015-0
MICROLOG 88-03683 3 fiche

Water is required in large quantities for the mining and preparation of coal, and concerns have been raised over the environmental and economic implications of coal industry expansion. This report presents the results of two studies: the first assesses water demands for present and planned coal mining and preparation activities in Western Canada and identifies existing and potential water supply problems due to water use by the coal industry; and the second identifies and appraises the groundwater resources of the coal-producing regions and assesses the influence of coal mining and preparation on local and regional groundwater systems before, during and after mining.

Watercourse alteration program field inspection project

by J. Terry. Fredericton : Dept. of Natural Resources and Energy, Fish and Wildlife Branch, 1987. 118 p. : ill.
MICROLOG 88-03489 2 fiche

Watercourse alterations are becoming more frequent as man moves further into the wilderness for recreation, natural resource materials and living space. In the process, alterations are made to various watercourses requiring a Watercourse Alteration Permit. The permit ensures that no unnecessary damage is caused to the natural flow of the watercourse or water quality and that the change has a minimal effect on fish habitat. A representative sample of 40 permits (12% of the total) that were processed as of July 31, 1987 were randomly selected for inspection. Ten additional sites were selected from a list provided by Water Resources Branch. A computer program was developed to record information collected, and pictures were taken of each site to develop a permanent record of each alteration. Site visits consisted of measurement and documentation of name, address and telephone number of the applicant, name of the watercourse, observed bottom material, quality of spawning and nursery area.

Weather and crop yields in the prairie provinces, 1961-1986

by R. Wisner. Ottawa : Economic Council of Canada, 1988. ix, 76 p. : ill. Bibliogr. (Discussion paper ; no. 353) *CSI 22215.215.* ISSN 0225-8013
MICROLOG 88-05292 1 fiche (Available on fiche only)

Study examining the levels, trends and viability of wheat, barley, and oat yields in the Prairie provinces between 1961 and 1986 with particular attention devoted to the impact of weather conditions. The long-run cycles of Canadian wheat production are also noted and attributed to a cyclical pattern of wheat yields over 1908-84. The analysis is carried out at both the provincial and sub-provincial level using a weather-based 'generalized crop growth index' to quantify the effect of weather on the regional variability of yields around their long-run trends. The empirical analysis begins by identifying sub-provincial regions with the highest and lowest yields and by examining the trends of the crop yields from 1961-86. Indices of the yield variability due to the weather effect are then developed for each province and for all consolidated crop districts. These indices are compared with equivalent measures of the total variability of the yields around their trends.

Welfare in Canada : the tangled safety net

National Council of Welfare (Canada). Ottawa : The Council, 1987. 120, iii p. : ill. Bibliogr. *French ed. (Le bien-être social...) : 88-00658/2.* ISBN 0-662-15710-9
MICROLOG 88-00657 2 fiche

Describes and analyzes the major features of the welfare systems in place in Canada at the federal, provincial and municipal levels. The purpose of the report is to acquire an aggregate picture of those on welfare and to dispel myths and stereotypes of the typical welfare recipient. Traces a brief history of the system and its principles. Gives selected examples of discretionary powers allowed directors of welfare programs. Profiles the "working poor" and discusses the issue of compensation rates falling below the poverty line. Also covers needs testing, rates of assistance, enforcement, appeals and lists a summary of recommendations.

West African sources of health and mortality information : a comparative review

by A.G. Hill and W.J. Graham. Ottawa : International Development Research Centre, 1988. 63 p. (Technical study ; 58e) ISBN 0-88936-506-7
MICROLOG 88-03311 1 fiche (Available on fiche only)

The Population, Health and Development project of The International Development Research Centre's Social Sciences Dvision was created in 1983 as a temporary mechanism to support and to strengthen the capacity of developing country researchers in carrying out interdisciplinary investigations of the persistent problems of high levels of infant and child mortality and poor health. This review illustrates the potential utility of existing health data in four West African countries (Mali, Senegal, the Gambia, and Sierra Leone), data other than population surveys and censuses that can be used to complement and evaluate more standard sources of demographic data. The larger purpose of the document is to make researchers rethink and improve their use of existant data collected in African health institutions.

Western Arctic fish collections 1983-1986 : sample-processing procedures and basic data on individual specimens

by J.D. Reist. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1987 iv, 69 p. ; maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 669) *19th data report from the Central and Artic Region, Winnipeg.* ISSN 0706-6465
MICROLOG 88-01214 1 fiche

5,607 fish representing 23 species were collected from 1983 to 1986 from several locations in the western North American Arctic. Of these, 3,747 have been processed to date. This report outlines the general procedures of processing which provided a variety of data and tissues from these samples for use in other studies. Processing involved the collection of biological, morphological and meristic data and the removal of tissues for further analyses. Basic background information on the specimens is provided herein. These data are details of collection information, basic biological data (fork and standard lengths, weight, sex, and maturity), and a unique identification number permits cross-referencing back to the individual of all data accured in subsequent analyses.

Westlock employer survey, 1988

Westlock, Alta. : Town of Westlock, Economic Development Committee, 1988. iv, 75 p. : ill.
MICROLOG 88-05764 1 fiche

In February 1988, Town Council, the Westlock and District Chamber of Commerce, the Westlock Economic Development Committee, Alberta Social Services and Alberta Municipal Affairs conducted an employer survey in Westlock and the surrounding area. The purpose of the survey was to develop a profile of what is happening in the business and public sectors in Westlock, and to gain some insight from employers as to what may happen in the next 1-2 years. More specifically, the survey identifies: recent gross sales trends; market area boundaries and competition sources; employment breakdown by sector; advantages and disadvantages of doing business in Westlock; employer needs; existing and future manpower and training needs; employer satisfaction levels; prospects for expansion and diversification; and possible business and service opportunities.

Wind energy research and development at the National Research Council Canada, 1975-1985

by M.S. Chappell. Ottawa : National Research Council Canada, Division of Energy, Wind Energy Program, 1986. xi, 164 p. : ill. Bibliogr. *French ed. (Recherche et développement...) : 88-04446/2. At head of title: Program report.*
MICROLOG 88-04445 2 fiche (Available on fiche only)

Research on wind energy systems began in the Low Speed Aerodynamics Laboratory, National Research Council, in 1966. Initial efforts proved the concepts underlying the technology of vertical axis wind turbines (VAWTs) and confirmed their suitability for electrical generation applications. During the decade from 1975 to 1985, the NRC wind energy R&D program continued the development of the VAWT through tests on small models and joint field trials of significant size prototypes in cooperation with potential users such as utilities. This report chronicles the technical and infrastructural aspects of the NRC Wind energy R&D program. It describes the nature and extent of wind energy resources in Canada, and outlines the basic characteristics and primary relationships of the technology. It provides a current synopsis of the state-of-the-art of wind turbine technology in Canada and enumerates priorities and recommendations for further development. It lists extensive reference material for probing deeper into technical details, and presents a perspective on Canadian achievements and opportunities through summaries of the major wind energy activities in other countries of the Western world.

The Winter hydrologic regime of the Nechako River, British Columbia

by S.P. Blachut. Vancouver, B.C. : Dept. of Fisheries and Oceans, Pacific and Yukon Region, Nechako River Project, 1988. ix, 145 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1964) ISSN 0706-6473
MICROLOG 88-03096 2 fiche

All historical winter (November-April) hydrologic data for the Nechako River were compiled and a 66-year record of air temperature data for Vanderhoof was used as an index of severity of winter. A simple water temperature model based on air temperature was used to predict cooling of river water to 0 C under different meteorological and hydrological conditions. A simple predictive model of the progression of surface ice, based on air temperature, was developed. Two years of water temperature and ice observations on the Nechako River were used to calibrate the models and document ice conditions in chinook spawning areas. The effects of winter hydrologic conditions on the intragravel environment and the risks of overwintering chinook eggs and alevins are assessed.

A Wood-waste fueled, indirectly-fired gas turbine cogeneration plant for sawmill applications, phase I : preliminary engineering design and financial evaluation

prepared for Bioenergy Development Program, Renewable Energy Branch, Energy, Mines and Resources Canada ; prepared by Canadian Resourcecon (1983) Ltd., R.L. Evans & Associates Ltd., Bachrich Consulting Ltd.. Ottawa : Energy, Mines and Resources Canada, 1987. xviii, 40 p. : ill. Bibliogr. ISBN 0-662-15616-1
MICROLOG 88-01019 1 fiche

Sawmills and planing mills in British Columbia consumed almost 75% of purchased non-motive fuels and more than 60% of purchased electricity used by the industry nationally. At the same time, a large surplus of sawmill residues is available. The analysis focuses on British Columbia since it is the largest potential market for the sawmill cogeneration system. This report presents the results of Phase I of a project to develop a cost-effective wood waste-fired power generation and lumber drying system for sawmill applications. The system proposed and evaluated is a wood-waste fuelled, indirectly-fired gas turbine cogeneration plant, research, design and development of which is planned to take place in a number of phases. The report consists of a preliminary engineering design and financial evaluation of the system.

Workers' Compensation Board of Nova Scotia : Annual report 1986

Halifax : The Board, 1987. 24 p. : ill.
CSI 52131.001.
MICROLOG 88-04204 1 fiche

The board is responsible for providing workers' compensation coverage to Nova Scotia employers and collection of assessment revenue. It classifies industries, determines rates and adjudicates claims resulting from work-related accidents, making decisions concerning the payment of claims as a result of reports from workers, employers, doctors and hospitals. It assists in the rehabilitation of workers returning to the work force, as well as the permanently disabled. To assist in claims processing the Board's Medical Department performs physical examinations and acts as medical advisor in the claims adjudication. This annual report briefly outlines accomplishments for the fiscal year and presents the financial statements. In addition, tables present statistics for claims processed during the 1986 year: accidents, causes of accidents, types of injuries, and an analysis by age, occupation, and county.

Workers' compensation study : a submission

New Brunswick. Occupational Health and Safety Commission. Halifax : The Commission, 1986. 7 p. *French ed. (Etude sur l'indemnisation...) on the same fiche.*
MICROLOG 88-00232 1 fiche

The establishment of the Commission in 1980 served to unify protection for workers that had previously been fragmented into separate industries. This report suggests a method of establishing further unity in the Commission's ability to serve workers. This method would involve stakeholders in the decision-making process, and includes having the corporate board reflect industrial, regional and multi-cultural concerns. The report recommends replacing the Workers' Compensation Board with a Commission and proposes a structure, with rationale given in terms of improved claims procedures and quicker approval of claims.

The Young Offenders Act -- Reviewed

by D. Macdonald. Ottawa : Library of Parliament, Research Branch, 1986. 18 p. Bibliogr. (Current issue review ; 86-13E) *French ed. (La Loi sur les jeunes...) on the same fiche.* ISBN 0-660-12390-8
MICROLOG 88-00835 1 fiche

The Young Offenders Act replaces the Juvenile Delinquents Act of 1908 which is considered to be corrective legislation based on the welfare model. Youths were not to be treated as criminals but rather as in need of assistance, but for a variety of reasons this Act required major changes in philosophy. The Act is based on the model of criminal justice. While continuing to recognize the special needs of youth, this model places equal importance on public protection and rights of young people. This explanation of the Act also covers pre-trial matters, testimony of children and young persons, the rights of young persons, and documents a chronology of related parliamentary action.

The Yuquot project, volume 1 : the indigenous archaeology of Yuquot, a Nootkan outside village

by J. Dewhirst. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1980. 365 p. : ill. Bibliogr. (History and archaeology ; 39) ISBN 0-660-10604-3
MICROLOG 88-04062 4 fiche

This report describes geographical and archaeological contexts at Yuquot, British Columbia, and presents an analysis of indigenous artifacts recovered there. Yuquot was the major outside village occupied by the Moachat Nootka Indians. They suggest continual human occupation of the site from as early as 2300 B.C. to the present. The indigenous artifacts recovered are classified according to shape and use. Most artifact classes are identified as part of composite devices used for fishing nearshore species, primarily salmon and rockfish. The artifact classes reflect a single conservative culture that changed gradually through time. A continuum model of four periods, each based on a dated stratigraphic zone, traces cultural continuity and change at Yuquot from 2000 B.C. until the late 19th century A.D., when indigenous culture began to change substantially from Euro-Canadian influences.

The Yuquot project, volume 2

by J.E. Muller...et al. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1980. 201 p. : ill. Bibliogr. (History and archaeology ; 43) *Contents: Geological outline of the Nootka Sound region, with notes on stone artifacts from Yuquot, British Columbia -- Lithology of stone artifacts and associated rock fragments from the Yuquot site -- Identification of and biological notes on selected bone and tooth artifacts from Yuquot, British Columbia -- Zooarchaeological analysis of mollusc remains from Yuquot, British Columbia -- Zooarchaeological analysis of barnacle remains from Yuquot, British Columbia -- Avian fauna from the Yuquot excavation -- Osteology of the human remains from Yuquot, British Columbia.* ISBN 0-660-10717-1
MICROLOG 88-04139 3 fiche

Series of geological and archaeological papers on the Yuquot site in the Nootka Sound region of British Columbia. The first paper outlines the geological history of the region with some emphasis on glacial history and recent sea-level changes. The second addresses the lithic identifications of 63 selected artifacts and materials. Paper three is an examination of a small collection of bone and tooth artifacts which provided data on sources of raw materials for artifact production and on modification methods. The fourth paper presents an analysis of shellfish remains sampled archaeologically. Complete results of the analysis are presented in tables and histograms. The fifth paper gives a zooarchaeological analysis of more than 1400 remains of barnacles excavated from the midden. Paper six identifies 5966 bones and 67 species of birds in the area. The last paper gives osteological data for human remains recovered form a large midden deposit.

archaeology ; 44) *Contents: Glassware excavated at Yuquot, British Columbia -- Glass beads from Yuquot, British Columbia -- Clay tobacco-pipes from Yuquot, British Columbia -- Ceramics from Yuquot, British Columbia -- Mexican sherds recovered from the archaeological excavations at Yuquot, British Columbia.* ISBN 0-660-10732-5
MICROLOG 88-04063 2 fiche

Archaeological investigation in the Nootkan village of Yuquot yielded a collection of different types of artifact. The first study of this document examines glassware found in the excavation: mirrors, lighting fixtures, marbles, wine, spirits and beer bottles, carbonated beverage bottles, perfume and cosmetic containers, and various unidentified objects. The second study analyses a collection of 77 glass beads representing 17 distinct types. Study number three is a description of 24 clay tobacco-pipe fragments recovered from the site. The fourth study deals with 483 ceramic objects, all of them from the historic period. Finally, the last study reports on sherds from a kitchen that was assembled from various localities in Mexico.

Zirconia-toughened mullite ceramics (ZTM)

by J. Aota...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. 24 p. : ill. Bibliogr. (Report ; MSL 87-155(IR)) *Project 30.29.01 advanced ceramic materials.*
MICROLOG 88-02658 1 fiche

Mullite is considered a candidate for structural ceramic applications because of its high melting point, high thermal shock resistance, high temperature stability, ease of processing and low cost. As part of a project to develop the technology for the preparation and characterization of advanced materials, a preliminary study of zirconia-toughened mullite ceramics was conducted. This report summarizes the results of the study.

Zones non couvertes dans l'inventaire des forêts du Canada

par M. Gillis. Chalk River, Ont. : Institut forestier national de Petawawa, 1988. v, 11 p. : ill. Bibliogr. (Rapport d'information ; PI-X-78F) *CSI 21137.201.* ISSN 0228-0736
ISBN 0-662-95035-6
MICROLOG 88-06283 1 fiche

A l'étape de planification de la version 1986 de l'Inventaire des forêts du Canada, on s'est rendu compte que de vastes superficies de terres renfermant des forêts productives n'avaient été inventoriées par aucun organisme. On a jugé qu'il serait trop coûteux et trop long d'employer les méthodes classiques pour y recueillir des statistiques en vue de leur intégration à l'inventaire national. En conséquence, un effort concerté y a été déployé pour estimer les superficies des terres forestières et les volumes selon un plan d'échantillonage général. Ce rapport décrit les techniques d'échantillonage employées et les zones étudiées et donne les résultats de l'inventaire.

Zooplankton in Lake 223, Experimental Lakes Area, northwestern Ontario, 1974-1983

by P.S.S. Chang and D.F. Malley. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1987. iv, 235 p. (Canadian data report of fisheries and aquatic sciences : no. 665) *17th data report from the Central and Arctic region.* ISSN 0706-6465
MICROLOG 88-02052 3 fiche

Report on the abundances of individual zooplankton species for 1980-83, and the abundance of eggs and females of selected major species for 1974, and 1977-83. Lake volume-weighted abundance of each species, including life stages of copepods for 1974 and 1977-83, are presented in graphs. The report also includes data collected by more frequent sampling at 3 sampling stations 10 m apart near the centre of the lake in 1980, and monthly averages of abundance and biomass for zooplankton species individually and taxonomic groups during ice-free periods from 1974 and 1977-83.

Echouages de mammifères marins sur les côtes du Québec dans l'estuaire et le golfe du Saint-Laurent de 1982 à 1985. MICROLOG 88-02368 1 fiche

Les Perspectives professionnelles au Québec, 1985-1993 : modèle québécois de prévision par profession. MICROLOG 88-05160 1 fiche

Recensements de la population de bélugas *Delphinapterus leucas* du Saint-Laurent par embarcations en 1985. MICROLOG 88-02369 1 fiche

Bélanger, L.

Modèle d'évaluation des terres humides du Québec en fonction de leur importance pour la sauvagine. MICROLOG 88-03511 1 fiche

Bélanger, M.

Rapport du Comité sur la tarification des bois en forêt publique. MICROLOG 88-01311 2 fiche

Belisle, C.

Generation of delayed replicas of a maximal-length sequence using hardware logic. MICROLOG 88-04002 1 fiche

Bélisle, S.

Etude sectorielle et professionnelle du secteur de la machinerie au Québec : effectuée dans le cadre du Système de projections des professions au Canada (S.P.P.C.). MICROLOG 88-00180 2 fiche

Etude sectorielle et professionnelle du secteur des produits métalliques au Québec effectuée dans le cadre du système de projections des professions au Canada. MICROLOG 88-02053 1 fiche

Industrial and occupational profile of the Quebec fabricated metal products sector. MICROLOG 88-01091 1 fiche

Industrial and occupational profile of the Quebec machinery sector : prepared as part of the Canadian Occupational Projection System (COPS). MICROLOG 88-00180 2 fiche

Bell, D.G.

Comparison of isokinetic and isoinertial lifting tests as predictors of maximal lifting capacity. MICROLOG 88-03274 1 fiche

Bell, D.H.

The CANMET ferric chloride leach process. MICROLOG 88-02155 1 fiche

Bell, K.E.

The Ceramic properties of two clays from Wild Cove, Newfoundland. MICROLOG 88-02165 1 fiche

Bell, R.W.

Pickering 1987 : air quality survey in the vicinity of the Brock west landfill area, Pickering, Ontario. MICROLOG 88-01139 1 fiche

Bellamy, G.

Aluminum alloy castings : production routes for optimum fracture toughness. MICROLOG 88-00140 1 fiche

Belledune Environmental Monitoring Committee (N.B.)

Submission to the Royal Society of Canada Commission on Lead in the Environment. MICROLOG 88-04554 1 fiche

Bellemare, J.

Les Entreprises en communication graphique au Québec : répertoire. MICROLOG 88-04012 3 fiche

Bellemare, L.

L'Information électronique au Québec : guide pratique des services d'information en ligne : répertoire des banques de données, applications et services d'information électronique actuellement produits ou diffusés au Québec par des entreprises québécoises. MICROLOG 88-03203 1 fiche

L'Information électronique au Québec : profil économique de l'offre. MICROLOG 88-03201 1 fiche

Belliveau, P.E.

Water Quality Branch activities in New Brunswick, 1965-1985. MICROLOG 88-04731 2 fiche

Water Quality Branch activities in Nova Scotia, 1965-1985. MICROLOG 88-04732 2 fiche

Water Quality Branch activities in Prince Edward Island, 1965-1985. MICROLOG 88-04733 1 fiche

Bellolio-Trucco, G.

Illustrated guide to some hornworts, liverworts and mosses of eastern Canada. MICROLOG 88-03288 3 fiche

Bendell, B.E.

Etude des effets de l'acidification sur la faune aquatique au Canada : rapports entre la sauvagine et les niveaux trophiques de petits lacs du nord de l'Ontario. MICROLOG 88-00405 2 fiche

Studies of the effects of acidification on aquatic wildlife in Canada : waterfowl and trophic relationships in small lakes in northern Ontario. MICROLOG 88-00405 2 fiche

Bennett, T.

An Inter-sectoral study of Canada's resource industries. MICROLOG 88-04213 3 fiche

Bennie, S.H.

Survey of wood fuel use in Prince Edward Island, 1986-87. MICROLOG 88-01514 1 fiche

Bérézay, G.F.

Fish transport techniques in common use at salmonid enhancement facilities in British Columbia. MICROLOG 88-01022 1 fiche

Berg, P.

The International debt problem. -- Reviewed. MICROLOG 88-00794 1 fiche

222RN and 220RN progeny relationship in Canadian underground uranium mines. MICROLOG 88-03386 1 fiche

Airflow determination for radiation emanation investigations of a large worked out area of a uranium mine. MICROLOG 88-01183 1 fiche

Characterization of long-lived radioactive dust clouds generated in uranium mill operations. MICROLOG 88-02650 1 fiche

Effect of some variables on thoron progeny in artificial radioactive environments. MICROLOG 88-01177 1 fiche

Evaluation of a fan/filter system to reduce radon (and thoron) progeny in underground uranium mines. MICROLOG 88-03164 1 fiche

Evaluation of conventional and modified *a*-particle track-etch sampling heads in radon (thoron) progeny atmospheres. MICROLOG 88-05524 1 fiche

Laboratory and field evaluation of a new radon progeny working level monitor using low-power CMOS electronics. MICROLOG 88-01184 1 fiche

Laboratory evaluation of a low-power CMOS electronics monitor in radon progeny and thoron progeny atmospheres. MICROLOG 88-06062 1 fiche

Laboratory evaluation of the MIMIL, a radon progeny instant working level meter. MICROLOG 88-05521 1 fiche

Measurements of radioactive air from bacterial leaching of uranium stopes. MICROLOG 88-06059 1 fiche

Performance of a wet scrubber to reduce long-lived radioactive dust emissions in underground uranium mines. MICROLOG 88-03387 1 fiche

Radiation levels in backfilled areas at Denison Mines Ltd.. MICROLOG 88-05519 1 fiche

Radioactivity conditions in a non-uranium underground mine in the absence of mining operations. MICROLOG 88-05526 1 fiche

Radioactivity emissions from bacterially-assisted leaching in uranium stopes. MICROLOG 88-03166 1 fiche

Results of a long-term personal dosimetry program at Rio Algom Ltd. : Quirke Mine. MICROLOG 88-01179 1 fiche

Technical evaluation of a radon progeny instant working level meter in an underground uranium mine. MICROLOG 88-02651 1 fiche

Underground evaluation of a fan/filter system for dust reduction capabilities. MICROLOG 88-01556 1 fiche

The Use of tailings as backfill in underground uranium mines. MICROLOG 88-01182 1 fiche

Billette, N.R.
Index of mining technology projects 1987. MICROLOG 88-00470 3 fiche

Répertoire de projets en technologie minière, 1987. MICROLOG 88-00470 3 fiche

Théorie générale sur le mélange des minerais. MICROLOG 88-02146 1 fiche

Billing, J.R.
Comparison of simulation and test of baseline and tractor-trailer vehicles. -- Draft. MICROLOG 88-01835 2 fiche

Demonstration of baseline vehicle performance : 45 ft semi. MICROLOG 88-01843 1 fiche

Demonstration of baseline vehicle performance : A-train double. -- Draft. MICROLOG 88-01842 1 fiche

Demonstration of baseline vehicle performance : A-train triple. -- Draft. MICROLOG 88-01840 1 fiche

Demonstration of baseline vehicle performance : B-train double. -- Draft. MICROLOG 88-01841 1 fiche

Demonstration of baseline vehicle performance : C-train double. -- Draft. MICROLOG 88-01839 1 fiche

Demonstration of baseline vehicle performance : C-train triple. -- Draft. MICROLOG 88-01838 1 fiche

Demonstration of tractor-trailer performance : 5-axle 48 ft. semi. -- Draft. MICROLOG 88-01836 1 fiche

Demonstration of tractor-trailer performance : 6-axle 48 ft semi. -- Draft. MICROLOG 88-01837 1 fiche

Demonstration of tractor-trailer performance : 7-axle 48 ft semi. -- Draft. MICROLOG 88-01834 1 fiche

Hitch slack and drawbar length effects on C-train stability and handling. -- Draft. MICROLOG 88-01833 1 fiche

Procedures for test of baseline and additional vehicles. -- Draft. MICROLOG 88-01844 1 fiche

Summary of tests of baseline vehicle performance. -- Draft. MICROLOG 88-01832 1 fiche

Billings, S.J.
Steelhead harvest analysis 1986-87. MICROLOG 88-04629 1 fiche

Bilodeau, A.
La Violence conjugale : recherche d'aide des femmes. MICROLOG 88-04039 2 fiche
